

# Service areas and voice/data communications charges

## How to read the communications charges table

Check your destination      Check your overseas operator      Voice communications charges depend on call type      These charges are incurred when receiving a call

Country/region	Operator (abbr.) ★1	Compatible network			Voice communications charges (¥ per minute) ★5 ★6				Packet communications ★7	
		3G	3G 850	GSM	Outgoing calls			Incoming calls ★3 ★4	i-mode communications charges group	Global Pake-hodai
					Within country of stay ★2	To Japan ★3	To other countries			
○○○○○	Eeeee Fffff Ggggg Hhhhh	● ● - -	● - - -	● - - -	80	180	280	80	A A A A	● - - -

Check the compatible networks

Check whether packet communications can be used.

A	Up to 50 packets	¥50
	Usage in excess of 50 packets	¥0.2/packet
B	Up to 100 packets	¥100
	Usage in excess of 100 packets	¥0.2/packet
-	Packet communications cannot be used.	

Please check the compatible operators to see whether you can use Global Pake-hodai.

●	Global Pake-hodai can be used. - Even if you do not use Global Pake-hodai, specified operator charges will apply to data communications.
-	Global Pake-hodai cannot be used.

●Others

- Your bill may show a different name for the actual country/region and operator where you used the service.
- Usage charges overseas may not all be billed in the same month, even if incurred in the same billing period, depending on the circumstances of the operator at your destination etc.
- Voice/data communications charges for this service are non-taxable.

- ★1 Depending on the individual circumstances of the overseas operator, the operator name displayed on the mobile phone may differ from the name that appears in this table.
- ★2 Calls within your country of stay may be counted as voice communications charges to other countries according to the criteria of the operator at the destination. (Likewise, calls to other countries may be counted as domestic voice communications charges within your country of stay.)
- ★3 Charges to Japan for the caller and incoming call charges to the called party apply for calls between WORLD WING users at the destination.
- ★4 Incoming call charges handled as calls from Japan apply for WORLD WING users to receive calls abroad, regardless of the country the call originates in. (Voice communications charges to Japan apply to the caller. Voice communications charges within Japan apply to the caller if the call originates in Japan.)
- ★5 Charges may be incurred when making a local collect call, toll-free call, credit card call or prepaid call at your travel destination, and you may be charged for the full duration of the call.
- ★6 Voice/data communications charges are charged in one-minute increments.
- ★7 Packet communications such as i-mode, i-channel, and mopera U can only be used with operators indicated with "A" or "B" in the "Packet usage" column of this charges table. However, mopera U may not be available in the service areas of some operators.

Country/region	Operator (abbr.) ★1	Compatible network			Voice communications charges (¥ per minute) ★5 ★6				Packet communications ★7	
		3G	3G 850	GSM	Outgoing calls			Incoming calls ★3 ★4	i-mode communications charges group	Global Pake-hodai
					Within country of stay ★2	To Japan ★3	To other countries

1. mopera U and some other packet communications cannot be used in the former AT&T service area. In cases where the service is available, payment of packet communications charges will be the subscriber's responsibility.

2. Connection to the 3G service provided by UNICOM/CU-GSM may be difficult even when inside the service area. There may also be cases where 3G service is available even in areas other than those indicated as being within the service area.

3. The billing system differs for Local Number Roaming users.

Charges are current as of February 1, 2012.

Please be sure to check the DOCOMO International Services website for up-to-date service areas, voice/data communications charges, and information on service interruptions. <http://www.nttdocomo.co.jp/english/service/world/>

1. There are regular 3G areas and 3G 850 areas which differ depending on the city. Please be sure to check destination cities on the DOCOMO International Services website before leaving Japan.  
 2. Including Corsica.  
 3. If you apply for an itemized billing statement, a time period one hour ahead of the actual time of use will be indicated for usage amounts in Georgia.  
 4. Including the Sardinia Islands and Sicily.

Charges are current as of February 1, 2012.

Please be sure to check the DOCOMO International Services website for up-to-date service areas, voice/data communications charges, and information on service interruptions. <http://www.nttdocomo.co.jp/english/service/world/>

- Only GSM 850 area compatible models can be used.
- The service is only available on the islands of Curacao and Bonaire.
- GSM 850 area compatible models can be used. In some cities, 3G 850 area compatible models and 3G + GSM area compatible models can be used.
- There are regular GSM areas and GSM 850 areas which differ depending on the city. Please be sure to check destination cities on the DOCOMO International Services website before leaving Japan.
- mopera U and some other packet communications services cannot be used in the former AT&T service area. In cases where the service is available, payment of packet communications charges will be the subscriber's responsibility.
- The service is available in the following Iraqi cities: Baghdad, Baqubah, Basra, Falluja, and Ramadi. (Not available in Samawa.)
- On some handsets, "Cellcom" will be displayed.

Charges are current as of February 1, 2012.

Please be sure to check the DOCOMO International Services website for up-to-date service areas, voice/data communications charges, and information on service interruptions. <http://www.nttdocomo.co.jp/english/service/world/>

- Videophone service in Guam is only available with 3G 850 area compatible models. (excluding mobile phones not compatible with Videophone).
- Connection to the 3G service provided by UNICOM/CU-GSM may be difficult even when inside the service area. There may also be cases where 3G service is available even in areas other than those indicated as being within the service area.
- The billing system differs for Local Number Roaming users.

- There are regular 3G areas and 3G 850 areas in Brazil and Australia which differ depending on the city. Please be sure to check the compatible areas of your destination city on the DOCOMO International Services website before leaving Japan.
- Including Corsica.
- Including the Sardinia Islands and Sicily.
- Including the Balearic Islands and Majorca region.
- Including the Orkney Islands and Shetland Islands.

Charges are current as of February 1, 2012.

Please be sure to check the DOCOMO International Services website for up-to-date service areas, voice/data communications charges, and information on service interruptions. <http://www.nttdocomo.co.jp/english/service/world/>
