

# Basic security

## IC card lock

Password locks access to smartcard to avoid misuse of stolen or misplaced phone

## iD appli password

Password is required each time iD application is used.

## Biometric Authentication

### Fingerprint lock

Fingerprint locks/unlocks access to phone (simply slide fingertip over phone's scanner)

F902i, F901iS, F901iC and F702iD models support biometric authentication

### Face reader

Phone's inner camera verifies user by face and by eye-blink pattern

SH902i, P902i and P901iS models support face reader.

Compatible handsets will be available in the near future.
