

ABAL[®] System

– Virtual reality solution that allows users to move freely between virtual floors and communicate easily –

NTT DOCOMO, INC.

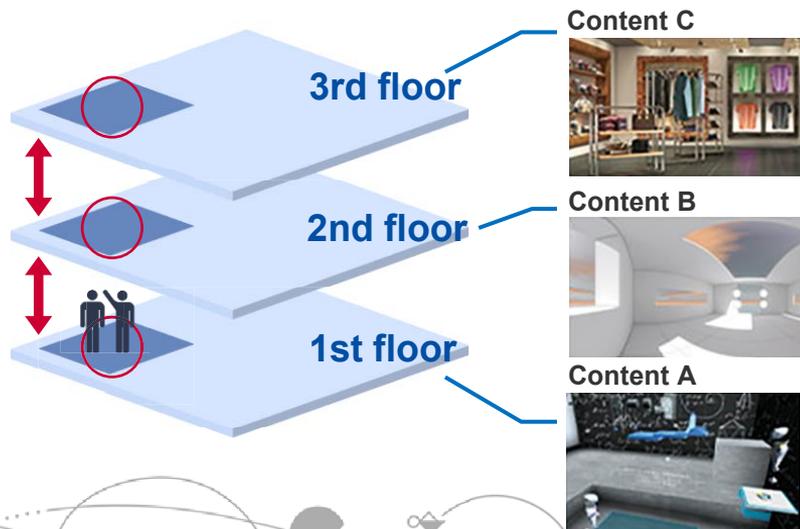

- **Multilevel VR space with simultaneous communication**
- **Communication implemented with 2D video chat**

Multilevel VR space

① Multilevel mobility

Creates a large VR space with multiple levels that users can move between easily, like riding an elevator.

② Great for virtual displays of products (fashion, furniture, etc.) grouped by theme

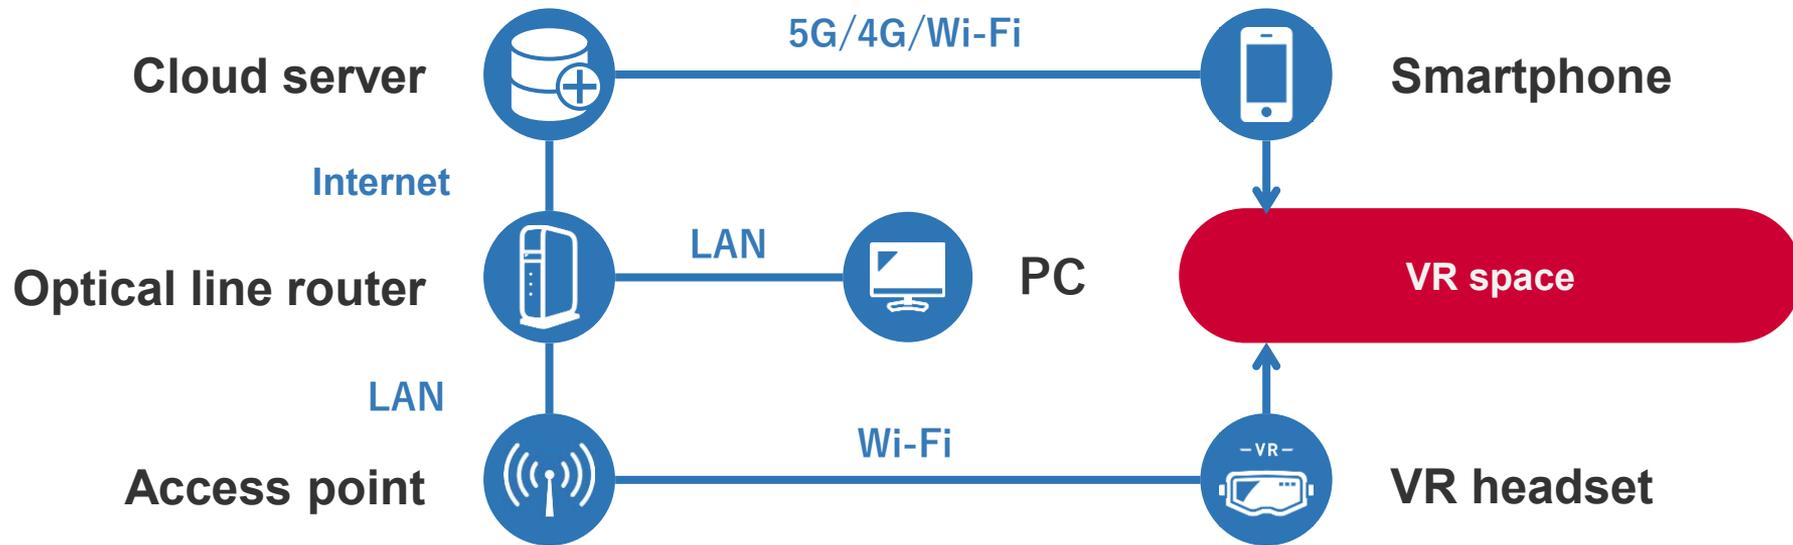

2D video chat

Enables customers in homes, offices, etc. to receive live audiovisual support.

System Configuration

5G Advantages

VR spaces supported with high-speed, high-capacity communication for stable transmission of VR content (backgrounds, 3D models, etc.) to mobile devices

The logo features the letters "NTT" in a small, red, sans-serif font positioned above the word "docomo" in a larger, bold, red, lowercase sans-serif font. The background is a light gray abstract pattern of geometric shapes and lines, including a large dotted circle on the left, a dotted triangle at the top, and various other geometric forms.
