

IOWN Global Forum overview

Creating Next-Generation Communications and
Computing Infrastructure Technology

IOWN Global Forum

Global Collaboration is crucial for developing cutting-edge IOWN technologies and global eco-system

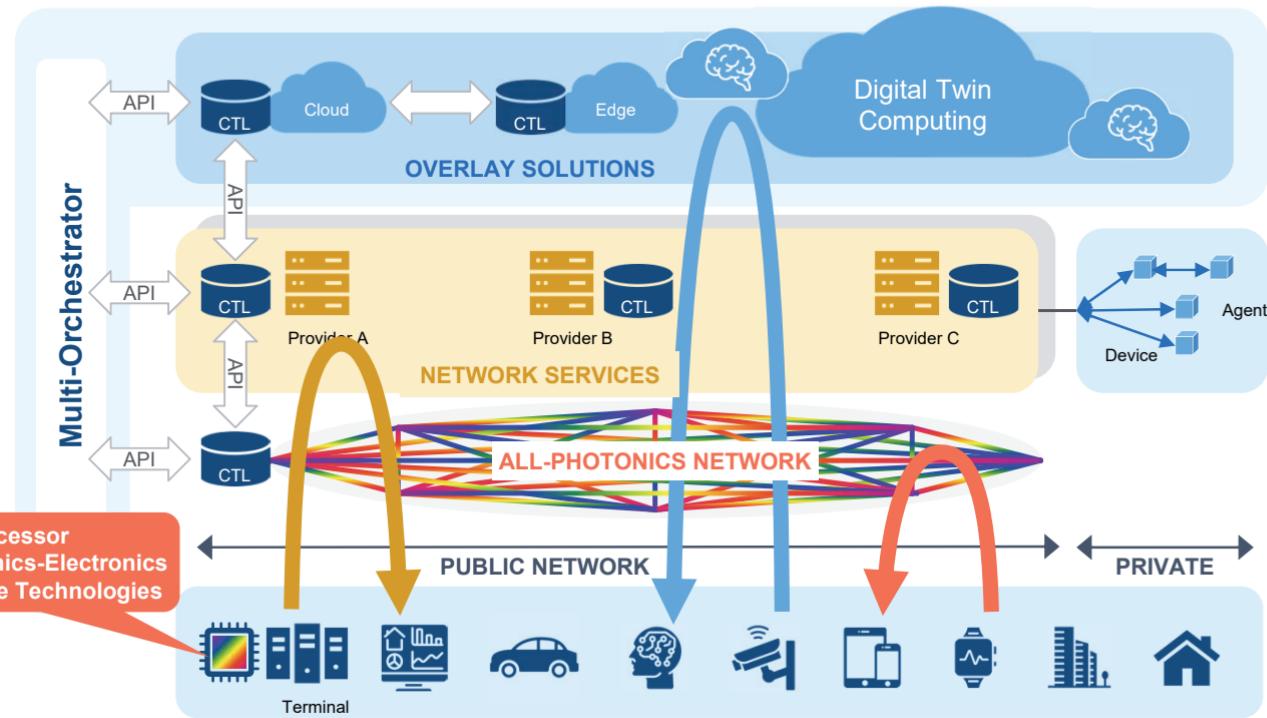

- ✓ In January 2020, NTT, Intel and Sony established Innovative Optical and Wireless Network (**IOWN**) Global Forum for the future communication
- ✓ Global non-profit organization for developing the next generation communication and computing infrastructure with new technologies, frameworks, specifications and reference architectures

What's IOWN?

Innovative Optical and Wireless Network (IOWN)

Future communication infrastructure based on leading-edge optical technology and information processing technologies to realize a smarter world.

IOWN Global Forum Vision 2030 Objectives

In order to solve various social issues and realize a smarter world,
by 2030, IOWN Global Forum will achieve:

Lower power
consumption by

100x

Higher transmission
capacity by

125x

Lower end-to-end
latency by

200x
