 $^{{\}small 4\ \ Total\ debt = Short-term\ borrowings + Current\ portion\ of\ long-term\ debt + Long-term\ debt}$

⁵ Free cash flows = Net cash provided by operating activities + Net cash used in investing activities.

⁶ Irregular factors represent the effects of uncollected revenues due to bank closure at the end of periods. Changes in investments for cash management purposes were derived from purchases, redemption at maturity and sales of financial instruments held for cash management purposes with original maturities of longer than three months. For the reconciliations of these Non-GAAP financial measures, see page 127.

⁷ EBITDA = Operating income + Depreciation and amortization + Losses on sale or disposal of property, plant and equipment.

EBITDA margin = EBITDA / Total operating revenues. For the reconciliations of these Non-GAAP financial measures, see page 127.

⁸ Capital expenditures are calculated on an accrual basis for the purchases of property, plant and equipment, and intangible and other assets.

⁹ ROE and ROCE are calculated using the simple average of the applicable year-end balance sheet figures.

¹⁰ ROCE (Return on capital employed) = Operating income / (Shareholders' equity + Total debt)

¹¹ Debt ratio = Total debt / (Shareholders' equity + Total debt)

Operating and Financial Review and Prospects

You should read the following discussion of our financial condition and results of operations together with our consolidated financial statements and the notes thereto included in this annual report.

This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including, but not limited to, those set forth under "Risk Factors" and elsewhere in this annual report.

We will discuss the following matters in this section:

- D. Trend Information

A. Operating Results

Our Business

We are the largest cellular network operator in Japan in terms of both revenues and number of subscriptions. As of March 31, 2008, we had approximately 53.39 million subscriptions, which represented 52.0% of all cellular subscriptions in Japan. We earn revenues and generate cash primarily by offering a variety of wireless voice and data communications services and products. In cellular services, which account for the majority of our revenues, we provide voice communication services as well as "i-mode" services, which enable our subscribers to exchange e-mails and to access various sources of information including the Internet via our nationwide packet communications network. In addition to cellular services, we presently provide wireless LAN services nationwide, a mobile credit payment platform and mobile credit payment services.

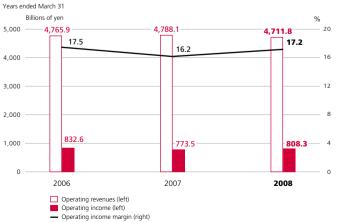

We have been the market leader in the Japanese mobile communications industry as the demand for mobile communications has grown very rapidly. Now that a cellular phone has already become a part of daily life in Japan, it is difficult to duplicate the speedy growth we experienced in the first decade of our operations. However, in order to achieve sustainable growth and establish new sources of revenues, we are committed to upgrading our cellular communications services from a telecommunication infrastructure to a life-style infrastructure so that cellular services will be rooted even more deeply in the daily lives of our subscribers and further enrich their lives and businesses.

Trends in the Mobile Communications Industry in Japan

According to a release from the Telecommunications Carriers Association, the mobile communications market in Japan saw a 5.64 million net increase in cellular and PHS subscriptions for the year ended March 31, 2008. As of March 31, 2008, the total number of wireless subscriptions including cellular and PHS reached 107.34 million and the market penetration rate reached 84.0%. The annual growth rate of cellular subscriptions rebounded to 6.2% for the year ended March 31, 2008 after a continued decline from 5.5% to 5.4% for the years ended March 31, 2006 and 2007, respectively. However, given the maturity of the market and the declining population trend, we expect that the growth rate of cellular subscriptions in Japan will be limited in the future.

As of March 31, 2008, cellular services were provided by four network operators including us and their subsidiaries in Japan. In addition to providing cellular services, the network operators also collaborate with handset manufacturers to develop handsets compatible with the specifications of their wireless services and then sell them primarily to agent resellers, who in turn sell such handsets to the subscribers. As for cellular services, since the year 2001, when we first launched "FOMA" services, our third generation ("3G") cellular services based on W-CDMA technology, our competitors have followed us in the launch of their 3G services. The network operators have been in an intense competition in pursuit of the acquisition of new subscribers and the migration of their current subscribers to 3G services. As of March 31, 2008,

Operating Revenues, Operating Income and Operating Income Margin

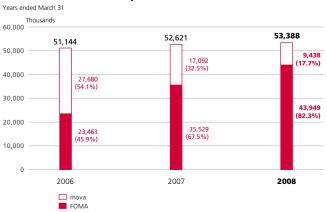

the number of 3G service subscriptions in Japan reached 88.06 million, which represented 85.7% of the total number of cellular subscriptions.

Competition among the network operators in Japan has become more intense under present market conditions as the needs of subscribers diversify and growth in new subscriptions slows. The network operators in Japan have been eager to differentiate themselves as they pursue the acquisition of new subscriptions and encourage the migration of their current subscribers to 3G services. The differentiation efforts include:

- Offering of free voice calls among family members under the same discount
 account with the same operators, free voice calls among subscribers under
 the same corporate subscription account with the same operators, introduction of new discount programs to cut basic monthly charges by half
 upon commitment of long-term subscriptions;
- Introduction of new sales methods such as installment sales for handsets;
- Launching of new services such as providing mobile credit payment services, music downloading, video downloading, news casting, web-browsing filtering, location information services and high-speed data transmission;
- Equipping new handsets with various new functions including a TV tuner, radio tuner, music player, video player, contact-less IC (Integrated Circuit) chip capability, GPS (Global Positioning System), enlarged memory capability, compatibility with GSM network or security function; and
- Partnering with entities of different industries including retail, manufacturing and financial institutions.

Recently, domestic deregulation of the industry has accelerated competition among cellular network operators, who have already implemented discounts in their service charges. Mobile Number Portability, which enables subscribers to switch subscriptions from one operator to another without changing their telephone number, was introduced in October 2006. In September 2007, the Mobile Business Study Group, which was appointed by the Ministry of Internal Affairs and Communications, concluded a report in which it proposed certain actions to be taken by regulatory authorities including (1) reformation on methods of cellular handset sales, (2) promotion of new MVNO entrants to the

Number of Cellular Subscriptions

market and (3) development of the market environment to invigorate the mobile business. The implementation of these proposals by the regulatory authorities is expected to change revenue structures and business models of incumbent cellular network operators including us.

It is possible that innovations in Internet technology will have a material impact on the mobile communications industry as well. IP (Internet Protocol) phone, voice communications based on IP technology, is becoming a popular means of fixed line communications as a result of the penetration of local broadband access. If IP phone technology is applied to the mobile communications field, we expect that it will have a material impact on the current revenue structure of the mobile communications industry. The penetration of local broadband access and cellular phones has produced an expectation for new services in the future, converging fixed and mobile communications. A "Fixed-Mobile Convergence" concept has already been partially realized when some network operators issued a single bill for both fixed and mobile subscriptions or others enable their subscribers to access common contents or e-mail accounts via both a PC and a cellular phone. The demand for a seamless service between the fixed and mobile network and a common handset compatible with both fixed and mobile network service will possibly increase in the future. Digital terrestrial TV broadcasting dedicated to mobile terminals, which was launched in April 2006, has already been included in many cellular handsets and is expected to be the first step in the future convergence of broadcasting and mobile communications. In the field of high-speed wireless networks, WiMAX has been standardized by the Institute of Electrical and Electronic Engineers in the United States. In Japan, two network operators were licensed to operate a 2.5GHz wide-band wireless broadband system in December 2007 and have started preparing for future commercial service launches.

Thus, we expect that the competitive environment for the mobile communications market will become increasingly severe in the future due to market, regulatory and technology changes.

Operating Strategies

We recognize that the cellular market in Japan has already entered into a phase of saturation as total cellular subscription exceeded 100 million in December 2007. In a phase of saturation, it is necessary to attract subscribers of competitors as it is difficult to rely on those who have not owned a cellular phone as a driving force of acquisition of new subscriptions. It is also indispensable to minimize the loss of subscriptions to competitors subsequent to intensified competition. As a market leader, we have put a top priority on the retention of our current subscriptions.

During a phase of market growth, it was a common practice for network operators including us to pay sales commissions, including handset sales incentives, to agent resellers and later recover such initial expenditures through future service charges collected from their subscribers. It was a business model where sales of handsets and of network services were vertically integrated. As the agent resellers applied the handset sales incentive to discount for handset sales, inexpensive discounted handsets contributed to the penetration of cellular subscription and growth of the market. Now that the market has entered into a phase of saturation, however, it has been often pointed out that such business model lacked transparency on the cost allocation of handset and network services, brought about unfairness on cost allocation among subscribers dependent on the duration of subscriptions and put downward pressure on the operating income of network operators.

In order to respond to such changes in the market environment, we abolished handset sales incentives and introduced new handset sales methods and discounted billing plans in November 2007. "Value Course" is a new handset sales method, where purchase of a handset not discounted by the handset sales incentive awards the subscriber with a subscription to a billing plan with discounted basic monthly charges called "Value Plan". Payment in installments is available for purchase of a handset in this "Value Course". If a subscriber chooses to make installment payments, under agreements entered into among the subscriber, the agent reseller and us, we provide financing by paying for the purchased handset to the agent resellers and include the installment charge for the purchased handset in the monthly bill for network usage for the installment payment term. Because equipment sales are recognized upon delivery of handsets to agent resellers, the advance payment for the purchased handset to agent resellers and the subsequent cash collection of the installment receivable for the purchased handset from subscribers do not have an impact on our equipment sales. While we introduced another handset sale method called "Basic Course", where a subscriber purchases a handset discounted by our direct subsidy and undiscounted billing plans are applied, we intend to put more emphasis on the promotion of "Value Course". "Value Course" and "Basic Course" are applied to handsets released after November 2007. In August and September 2007, we also introduced new discount programs called "Fami-wari MAX 50", "Hitoridemo Discount 50" and "Office Discount MAX 50", all of which discount basic monthly charges by half upon the commitment of a two-year subscription. We expect to realize the extension of subscriptions of current subscribers and a continued decline in our churn rate through these new handset sale methods and new discount programs. Please refer to "B. Liquidity and Capital Resources" for the impact of the introduction of "Value Course" on our financial position.

Operating Trends

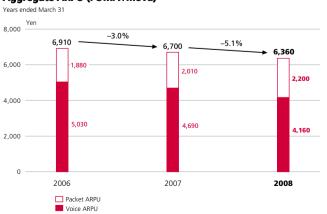

This section describes our operating trends from the perspectives of revenues and expenses.

Revenues

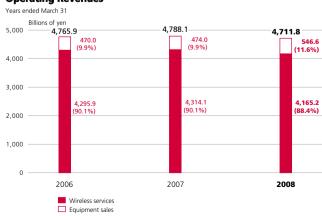

Wireless Services

We earn our wireless services revenues primarily from basic monthly charges, calling charges for outgoing calls, revenues from incoming calls including interconnection charges and charges for optional value-added services and features. Cellular services, which earn the majority of our overall revenues, consist of the third generation FOMA services, the second generation "mova" services and other services. FOMA's packet transmission technology allows our subscribers to transmit more packets per minute and the per-packet charges for data communications of FOMA services are set lower than those of mova services. Because we believe that FOMA's advanced technological capability enables us to provide our subscribers with more convenient and competitive services, we aim to induce our mova subscribers to migrate to FOMA services as well as to acquire new FOMA subscriptions. As of March 31, 2008, the number of FOMA subscriptions reached 43.95 million or 82.3% of our total number of cellular subscriptions, the largest number of 3G subscriptions among cellular operators in Japan. Cellular services revenues include voice revenues and packet communications revenues. Voice revenues are derived from a combination of basic monthly charges for service and additional calling charges depending on connection time. Our packet communications revenues, which are currently dominated by i-mode revenues, accounted for a greater portion of our wireless services revenues for the year ended March 31, 2008, representing 33.0% of wireless services revenues, as compared to 28.8% and 26.1% for the years ended March 31, 2007 and 2006, respectively. As a result of the continued migration of mova subscribers to FOMA services, the portion of FOMA packet communications revenues increased to 91.3% of the total packet communications revenues for the year ended March 31, 2008 from 78.2% and 54.8% for the years ended March 31, 2007 and 2006, respectively.

Aggregate ARPU (FOMA+mova)

Operating Revenues

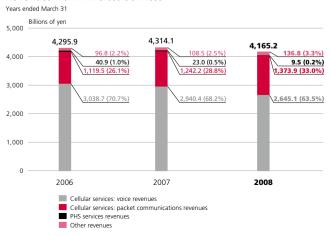

Our top operational priorities include maintaining our current subscribers and the level of our average monthly revenue per unit ("ARPU") despite the increasingly competitive market environment in which we are operating, including the introduction of Mobile Number Portability. Our cellular services revenues are essentially a function of our number of active subscriptions multiplied by ARPU.

Our number of subscriptions continues to grow while the growth rate of subscriptions has declined. Our subscription churn rate, or contract termination rate, is an important performance indicator for us to achieve retention of our current subscriptions. The churn rate has an impact on our number of subscriptions and in particular affects our number of net additional subscriptions for a given period. Efforts to reduce our churn rate through discount programs and other customer incentive programs can increase our revenues by increasing our number of net additional subscriptions, but they can also have an adverse impact on our revenues by decreasing the amount of revenues we are able to collect from each subscriber on average. In order to keep our churn rate low, we have focused on subscriber retention by implementing certain measures including offering discounts for long-term subscribers. During the year ended March 31, 2008, we introduced the previously mentioned "Value Course", new discount programs such as "Fami-wari MAX 50", "Hitoridemo Discount 50" and "Office Discount MAX 50", expanded HSDPA (High-Speed Downlink Packet Access) data transmission service areas, released attractive FOMA handsets and expanded FOMA service area coverage. For the year ended March 31, 2008, we continued to release handsets such as "Kids' PHONE" designed specifically for children and "Raku Raku PHONE" universally designed for elderly users in an effort to pioneer such new market segments.

ARPU is calculated by dividing various revenue items included in operating revenues from our wireless services, such as basic monthly charges, calling charges and packet communications charges, from designated services by the number of active subscriptions to the relevant services. ARPU is another important performance indicator for us to measure average monthly revenues per subscription. Accordingly, the calculation of ARPU excludes revenues that are not representative of monthly average usage such as subscription activation fees. We believe that our

Revenues from Wireless Services

ARPU figures calculated in this way provide useful information to analyze the trend of monthly average usage of our subscribers over time and the impact of changes in our billing arrangements. The revenue items included in the numerators of our ARPU figures are based on our U.S. GAAP results of operations. ARPU (FOMA+mova) has fallen over the past few years, due to a gradual increase in the discount rate of basic monthly charges according to an increase in the number of years of subscriptions under long-term subscription discount and a decrease in MOU (Minutes of usage, which is the average communication time per month per subscription). The shrinking trend of ARPU also resulted from an increase in the number of subscribers who subscribe to discount programs newly introduced for the retention of subscriptions. In order to boost ARPU, we have been actively involved in the promotion of "Pake-hodai", our optional packet flat-rate service for unlimited i-mode usage and "i-channel", a convenient and easy-to-use information push-delivery optional service. We also introduced more handsets compatible with international roaming service in order to increase roaming revenues. Furthermore, we are promoting cellular usage other than voice calls such as downloading of music or video-clip. We achieved a slight increase in the cellular services revenues from the prior fiscal year owing to a slower decline in ARPU for the year ended March 31, 2006. For the year ended March 31, 2007, although the decline in ARPU continued, growth in the number of subscriptions, combined with our recognition as revenue of the portion of "Nikagetsu Kurikoshi" (2 month carry-over) allowance that is projected to expire, resulted in an increase in cellular services revenues. Cellular services revenues declined again during the year ended March 31, 2008 due to the penetration of discount programs newly introduced for subscriber retention purposes. We expect that the positive effects of the moderate growth in the number of subscriptions will be more than offset by the negative effects from the continued penetration of new discount programs, and thus cellular services revenues will consequently decline for the year ending March 31, 2009. We intend to achieve sustainable growth by increasing revenues from non-traffic business while we maintain the current level of revenues through marketing activities with more focus on brand loyalty in the cellular business.

Equipment Sales

We collaborate with handset manufacturers to develop handsets compatible with our cellular services, purchase the handsets from those handset manufacturers and then sell those handsets to our subscribers through agent resellers. We provide a wide variety of handsets to the market to answer diverse needs of our current and potential subscribers. The handset offering includes "FOMA 9 series", which are equipped with most advanced functions, and "FOMA 7 series" which feature a sophisticated balance between unique designs and functionalities.

Revenues from equipment sales, primarily sales of handsets and other tele-communications equipment to agent resellers, accounted for 11.6% of total operating revenues for the year ended March 31, 2008. We adopted Emerging Issues Task Force ("EITF") Issue No. 01-9, "Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products)," and therefore account for a portion of the sales commissions that we pay to agent resellers, the main component of which is handset sales incentives, as a reduction in equipment sales revenues and selling, general and administrative expenses. As a result, structurally, the cost of equipment sold has exceeded equipment sales revenues, and thus the sale of an extra handset has had a negative impact on our operating income. During the year ended March 31, 2008, as both the number of handsets sold to agent resellers and revenues per handset declined,

equipment sales before the deduction of sales commissions to agent resellers decreased. However, due to a decrease in handset sales incentives to be deducted from gross equipment sales subsequent to the introduction of "Value Course", equipment sales after the deduction of sales commissions to agent resellers increased. We expect that, for the year ending March 31, 2009, a combination of an increase in the number of handsets sold to agent resellers and a continued decrease in handset sales incentives subsequent to the introduction of "Value Course" will result in a significant increase in the equipment sales. The number of handsets sold to agent resellers is expected to increase in response to diversified demand from subscribers. Because the trend of handset sales is closely interrelated with the cost of handsets sold, you should also refer hereafter to the "Cost of Equipment Sold" section below.

Expansion of Our Business Domain

In addition to the further buildup of our competitiveness in the cellular business, we are actively involved in the diversification of revenue sources. The most significant is our credit services business. We seek to reposition our cellular phones as tools more deeply rooted in the daily life of our subscribers by enabling transactional settlements through the use of cellular phones equipped with contact-less IC chips. We launched a credit card brand called "iD" for card issuers in December 2005 and "DCMX" credit issuing services via the "iD" platform in April 2006. For the year ended March 31, 2008, we were actively involved in the acquisition of DCMX subscriptions, promotion of credit usage and expansion of stores equipped with iD readers/writers. We are confident that our mobile credit service is steadily penetrating the market as the number of DCMX subscriptions reached 5.64 million while the number of "iD" compatible reader/writers installed reached 300,000 as of March 31, 2008.

We also collaborated with Google, Inc. to upgrade portal functions of imode so that a cellular phone will become a powerful advertisement medium.

Although contribution from the credit service business and advertisement business to our results of operations have not yet become material, we will continue to be engaged in accelerating the development of these businesses.

Expenses

Cost of Services

Cost of services represents the expenses we incur directly in connection with providing our subscribers with wireless communication services and includes the cost for usage of other operators' networks, maintenance of equipment or facilities and payroll for employees dedicated to the operations and maintenance of our wireless services. Cost of services accounted for 20.8% of our total operating expenses for the year ended March 31, 2008. Communication network charges, which we pay for the usage of other operators' networks or for access charges, occupy the largest part of cost of services, accounting for 42.5% of the total. The amount of our communication network charges is dependent on the number of our base stations installed and rates set by the other operators. In recent years, our communication network charges have steadily declined as a result of our buildup of our own back-bone network to replace circuits leased from NTT. Communication network charges decreased for the year ended March 31, 2008 as well due mainly to the discount in charges of NTT's leased circuits. We expect that the downward trend will continue and the communication network charges will decrease slightly for the year ending March 31, 2009.

Cost of Equipment Sold

Cost of equipment sold arises mainly from our procurement of handsets for sale to our new or current subscribers, which is basically dependent on the number of handsets sold to agent resellers and the purchase price per handset. Cost of equipment sold represented 29.5% of our operating expenses for the year ended March 31, 2008. Although the purchase price per handset has increased in recent years due to the increase in sales of more sophisticated FOMA handsets in the migration of mova subscribers to FOMA services, the purchase price per handset decreased for the year ended March 31, 2008. The decline in the purchase price per handset was due to a decrease in the number of "FOMA 9 series" handsets sold, which are equipped with most advanced functions, and an increase in the number of less expensive "FOMA 7 series" handsets sold, which feature a sophisticated balance between unique designs and functionalities. The total number of handsets sold decreased slightly because an increase in the number of FOMA handsets sold was more than offset by a decrease in the number of mova handsets sold as a result of the continued migration of subscribers from mova services to FOMA services. As a result, cost of equipment sold decreased from the prior fiscal year. For the year ending March 31, 2009, we expect that the level of the purchase price per handset will be the same while a decrease in the number of mova handsets sold will be more than offset by an increase in the number of FOMA handsets sold. As a result, we expect that cost of equipment sold will increase for the year ending March 31, 2009.

We have taken some measures to control the cost of equipment sold. We have saved on FOMA handset development cost by introducing a single-chip LSI and common platforms for the handset operating system. We will provide packaged software dedicated to our handsets to handset manufacturers to facilitate development of FOMA handsets as well. We also aim to procure at lower costs FOMA models such as the "FOMA 7 series", which would match the purpose and usage volume of various subscribers, and to increase sales of such FOMA models. We are also engaged in a campaign to slow down the handset upgrading cycle by introducing "Value Course" or providing members of "DOCOMO Premier Club" with free-of-charge battery packs and the extension of free warranty periods in order to slash the cost of equipment sold. Finally, we are planning to centralize our inventory management to optimize the level of equipment inventories subsequent to our merger with our regional subsidiaries.

Depreciation and Amortization

We expense the acquisition cost of a fixed asset such as telecommunications equipment, a network facility and software during its estimated useful life as depreciation and amortization. Depreciation and amortization accounted for 19.9% of our operating expenses for the year ended March 31, 2008. In order to respond attentively to demand from our subscribers, we actively invested in the FOMA services network during the year ended March 31, 2008. Our investments in the FOMA network included:

- further enhancement of FOMA network quality;
- buildup of FOMA network capacity in response to an increase in data traffic following the penetration of our packet flat-rate service for unlimited i-mode usage; and
- further expansion of HSDPA service coverage.

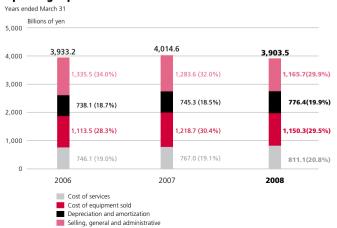

Active capital expenditures in the FOMA network in recent years are followed by an upward trend in depreciation and amortization expenses. Depreciation and amortization expenses for the year ended March 31, 2008 increased from the prior fiscal year. As we have been involved with cost saving efforts such as economized procurement, design and installment of low-cost devices and improvements in construction processes, depreciation and amortization are expected to decrease for the year ending March 31, 2009. As for our capital expenditures, please refer to "Capital Expenditures" in this section.

Selling, General and Administrative Expenses

Selling, general and administrative expenses represented 29.9% of our total operating expenses for the year ended March 31, 2008. The primary components included in our selling, general and administrative expenses are expenses related to acquisition of new subscribers and retention of current subscribers, the most significant of which was sales commissions paid to agent resellers. The main components of the sales commissions that we pay to agents who sign up new subscribers are a closing commission for each new subscription and volume incentives that vary depending on the number of new subscriptions per agent per month. In addition, we provide subsidies directly to our subscribers in the form of a discount to the handset price to be purchased subject to competition in the market. As already discussed in the "Operating Strategies" section, we abolished handset sales incentives, which were paid to agent resellers depending on the type of handset a subscriber purchased. Sales commissions differ from region to region due to such factors as the competitive and economic environments in the various regions.

We applied EITF 01-9 and therefore a portion of the sales commissions paid to agent resellers, including handset sales incentives, is recognized as a deduction from equipment sales revenues and selling, general and administrative expenses. Due to the introduction of "Value Course", sales commissions, both before and after the deduction of certain sales commissions to agent resellers, decreased for the year ended March 31, 2008 compared with the prior fiscal year. For the year ending March 31, 2009, we expect that the gross and net amount of sales commissions will continue to decrease due to the further penetration of "Value Course."

Operating Expenses

Operating Income

For the year ended March 31, 2008, a decrease in wireless services revenues, due mainly to penetration of newly introduced discount programs, exceeded an increase in equipment sales, which resulted in a decrease in operating revenues. On the other hand, a decrease in operating expenses due to a decrease in sales commissions subsequent to the introduction of "Value Course" exceeded the decrease in operating revenues. As a result, operating income increased. The factors contributing to the increase in operating income are summarized as follows:

- cellular services revenues decreased due to a gradual increase in the discount
 rate of basic monthly charges according to an increase in the number of
 years of subscriptions under long-term subscription discount, penetration of
 discount programs newly introduced for subscriber retention purposes and
 a decrease in MOU in addition to the adverse impact of changes in estimates during the prior year regarding initially recognizing as revenues the
 portion of "Nikagetsu Kurikoshi (2 month carry-over)" allowances that are
 estimated to expire:
- a decrease in both the number of handsets sold to agent resellers and revenues per handset was more than offset by a decrease in sales commissions to be deducted from gross equipment sales. As a result, net equipment sales increased from the prior fiscal year. However, operating revenues still decreased as the increase in net equipment sales was not sufficient to cover the decrease in cellular services revenues; and
- a combination of a decrease in sales commissions subsequent to the introduction
 of "Value Course" and a decrease in cost of equipment sold due to a decline
 in the purchase price per handset and in the number of handsets sold contributed to a decrease in operating expenses, which more than offset the decrease
 in operating revenues and resulted in an increase in operating income.

The market environment has become increasingly competitive after the introduction of Mobile Number Portability. Under our renewed corporate brand, we will be engaged in the promotion of new business models such as "Value Course" and the provision of various services as a life-style infrastructure through marketing activities with a focus on brand loyalty. We expect both operating revenues and operating income to increase for the year ending March 31, 2009 for the following reasons:

- we expect cellular services revenues to decrease because a decline in ARPU caused by penetration of "Value Plan", for which the basic monthly charge is discounted, penetration of discount programs newly introduced for subscriber retention purposes and negative impact of the provision of free domestic voice calls among subscribers registered in the same "Fami-wari MAX 50" account will more than offset the positive effect of our acquisition of new subscriptions;
- we expect that an increase in the number of handsets sold to agent resellers
 and a continued decrease in sales commissions subsequent to the introduction of "Value Course" will contribute to an increase in equipment sales,
 which will more than offset the decrease in cellular services revenues and
 result in an increase in operating revenues; and
- we expect that a continued decrease in sales commissions will be offset by
 an increase in expenses related to retention of current subscribers, resulting
 in a slight increase in operating expenses. We expect the net of the increases
 in operating revenues and operating expenses to be an increase in operating income.

As a life-style infrastructure, we seek to diversify revenue sources in three business domains as follows:

- promotion of optional flat rate-billing plans or flat-rate value added services including "Pake-hodai", an optional packet flat-rate service for unlimited i-mode usage, "i-channel", a convenient and easy-to-use information push-delivery service and "Music & Video Channel", a music and video downloading service;
- accelerated development of non-traffic businesses including the acquisition of DCMX subscriptions and promotion of credit usage; and
- promotion of usage of international calls and international roaming services, and growth through investment and partnership in Asia-Pacific regions.

We seek to reduce costs by:

- reduction of sales commissions through further penetration of "Value Course";
- saving on the development cost of FOMA handsets through provision of packaged software dedicated to our handsets to handset manufacturers; and
- administrative optimization and efficient inventory management through the merger with our regional subsidiaries.

Other Income and Expenses

As part of our corporate strategy, we have made investments in foreign and domestic companies in businesses that complement our mobile communications business. In accordance with U.S. GAAP, the investment is accounted for under the equity method and recognized under "Investments in affiliates" in our consolidated balance sheets when our equity in the investee's issued and outstanding capital is between 20% and 50% or we are able to exercise significant influence over the investee. In accordance with equity method accounting, we include equity in net income or losses of affiliates in our consolidated income. Where our equity in the investee's issued and outstanding capital is less than 20%, we include the investment as "Marketable securities and other investments" in our consolidated balance sheets. Our results of operations can be affected by impairments of such investments and losses and gains on the sale of such investments. In the past, we experienced material impairments in the value of our investments in equity method affiliates that were included in "Equity in net losses of affiliates" in our consolidated statements of income and comprehensive income for relevant years. It is possible that we could experience similar impairments with respect to our investments in affiliates and marketable securities and other investments again in the future. Please refer to "-Critical Accounting Policies-Impairment of investments". We may also experience material gains or losses on the sale of our investments. As of March 31, 2008, the total carrying value of our investments in affiliates was ¥349.5 billion, while the total carrying value for investments in marketable equity securities and equity securities accounted for under the cost method was ¥187.3 billion.

Operating Results for the Year Ended March 31, 2008

The following discussion includes analysis of our operating results for the year ended March 31, 2008. The tables below describe selected operating data and income statement data:

Key Performance Indicators

| | Years ended March 31 | | | | |
|--|----------------------|--------|---------------------|------------|--|
| | 2007 | 2008 | Increase (Decrease) | Change (%) | |

Analysis of Operating Results for the Year Ended March 31, 2008 and Comparison with the Prior Fiscal Year

As of March 31, 2008, the number of our cellular (FOMA+mova) subscriptions reached 53.39 million and increased by 0.77 million (1.5%) from 52.62 million at the end of the prior fiscal year. We expect that the growth rate of our cellular subscriptions will decelerate in the future as the growth rate of cellular subscriptions declines due to the maturity of the market in Japan. The number of FOMA subscriptions increased by 8.42 million (23.7%) to 43.95 million as of March 31, 2008 from 35.53 million at the end of the prior fiscal year. The ratio of FOMA subscriptions to the total cellular subscriptions reached 82.3% as of March 31, 2008. On the other hand, the number of mova subscriptions, which has decreased since the year ended March 31, 2004, decreased by 7.65 million (44.8%) to 9.44 million as of March 31, 2008 from 17.09 million as of the end of the prior fiscal year. We expect that the migration of mova subscribers to FOMA services will continue hereafter. Our market share decreased by 2.4

point to 52.0% as of March 31, 2008 from 54.4% as of the end of the prior fiscal year. The number of i-mode subscriptions increased by 0.42 million (0.9%) to 47.99 million as of March 31, 2008 from 47.57 million at the end of the prior fiscal year.

Aggregate ARPU of cellular (FOMA+mova) service decreased by ¥340 (5.1%) to ¥6,360 for the year ended March 31, 2008 from ¥6,700 in the prior fiscal year. Voice ARPU decreased by ¥530 (11.3%) to ¥ 4,160 for the year ended March 31, 2008 from ¥4,690 in the prior fiscal year. This decrease in voice ARPU was due to a gradual increase in the discount rate of basic monthly charges according to an increase in the number of years of subscriptions under long-term subscription discount, a decrease in MOU and an increase in the number of subscribers who subscribe to discount programs newly introduced for the retention of subscriptions. Packet ARPU increased by ¥190 (9.5%) to ¥2,200 for the year ended March 31, 2008 from ¥2,010 in the prior fiscal year. This increase in packet ARPU was due to penetration of services such as

"i-channel", which promote i-mode usage and of an optional packet flat-rate service for unlimited i-mode usage. The MOU (FOMA+mova) decreased by 6 minutes (4.2%) to 138 minutes from 144 minutes in the prior fiscal year.

Our churn rate for cellular subscriptions was 0.80% and 0.78% for the years ended March 31, 2008 and 2007, respectively. The churn rate increased by 0.02 point due to Mobile Number Portability. Although the churn rate for the six months ended September 30, 2007 rose to 0.90%, the introduction of new discount programs including "Fami-wari MAX 50", "Hitoridemo Discount 50" and "Office Discount MAX 50" in August and September 2007 and of "Value Course" in November 2007 helped lower the churn rate to 0.71% for the six months ended March 31, 2008. We believe that, due to various factors, such as the implementation of competitive billing arrangements, customer confidence in our network and services and the introduction of new services, our churn rate was lower than that of other operators. However, no assurance can be given that our churn rate will decline or remain low.

During the year ended March 31, 2008, we implemented various measures with focus on benefit for our subscribers, such as the introduction of "Value Course" and "Value Plan", new discount programs such as "Fami-wari MAX 50", "Hitoridemo Discount 50" and "Office Discount MAX 50", expansion of HSDPA services areas, releases of attractive FOMA handsets and the expansion of FOMA coverage areas, both indoors and outdoors.

Operating revenues decreased by ¥76.3 billion (1.6%) to ¥4,711.8 billion for the year ended March 31, 2008 from ¥4,788.1 billion in the prior fiscal year. Wireless services revenues decreased by ¥148.9 billion (3.5%) to ¥4,165.2 billion from ¥4,314.1 billion in the prior fiscal year. As a result, wireless services accounted for 88.4% of operating revenues for the year ended March 31, 2008, decreasing from 90.1% in the prior fiscal year. The decrease in wireless services revenues resulted from a decrease in cellular services revenues, especially voice revenues, and in PHS services revenues due to our termination of PHS services in January 2008. The decrease in cellular services revenues was a net of a decrease in voice revenues by ¥295.3 billion (10.0%) to ¥2,645.1 billion from ¥2,940.4 billion in the prior fiscal year, and an increase in packet communications revenues by ¥131.6 billion (10.6%) to ¥1,373.9 billion from ¥1,242.2 billion in the prior fiscal year. The factors for the decrease in cellular services revenues and the increase in packet communications revenues were already discussed in the analysis of changes in ARPU. The decrease in cellular services revenues was due partially to the adverse impact of changes in estimates during the prior fiscal year regarding initially recognizing as revenues the portion of "Nikagetsu Kurikoshi (2 month carryover)" allowances that are estimated to expire. Voice revenues from FOMA services increased by ¥291.2 billion (16.2%) to ¥2,084.3 billion from ¥1,793.0 billion in the prior fiscal year and packet communications revenues also increased by ¥282.7 billion (29.1%) to ¥1,254.6 billion from ¥971.9 billion in the prior fiscal year. The revenues from PHS services decreased by ¥13.5 billion (58.8 %) to ¥9.5 billion from ¥23.0 billion in the prior fiscal year and represented 0.2% of total wireless services revenues. Equipment sales increased by ¥72.6 billion (15.3%) to ¥546.6 billion for the year ended March 31, 2008 from ¥474.0 billion in the prior fiscal year because of a decrease in sales commissions to be deducted from gross equipment sales due to the introduction of "Value Course".

Operating expenses decreased by ¥111.1 billion (2.8%) to ¥3,903.5 billion for the year ended March 31, 2008 from ¥4,014.6 billion in the prior fiscal year. This decrease resulted mainly from a decrease in selling, general and administrative expenses, by ¥117.9 billion (9.2%) to ¥1,165.7 billion for the year ended March 31, 2008 from ¥1,283.6 billion for the prior fiscal year, due to the decrease in sales commissions subsequent to the introduction of "Value Course". As the NTT Corporate Defined Benefit Pension Plan ("NTT CDBP") transferred its substitutional obligation and related plan assets of the National Welfare Pension Plan to the government in February 2008, the aggregate amount of ¥24.7 billion was recognized as a decrease in operating expenses. Cost of services increased by ¥44.2 billion (5.8%) to ¥811.1 billion for the year ended March 31, 2008 from ¥767.0 billion in the prior fiscal year due to an increased number of FOMA base stations installed. Depreciation and amortization increased by ¥31.1 billion (4.2%) to ¥776.4 billion for the year ended March 31, 2008 from ¥745.3 billion in the prior fiscal year, reflecting intensive capital expenditures on the FOMA network in prior fiscal years.

The operating income margin improved to 17.2% for the year ended March 31, 2008 from 16.2% for the prior fiscal year. The decrease in cost of equipment sold due to the decrease in the number of handsets sold and the decrease in selling, general and administrative expenses contributed to this improvement.

As a result of the foregoing, our operating income increased by ¥34.8 billion (4.5%) to ¥808.3 billion for the year ended March 31, 2008 from ¥773.5 billion for the prior fiscal year.

Other income (or expense) includes items such as interest income, interest expense, gains and losses on sale of marketable securities and other investments and foreign exchange gains and losses. We accounted for ¥7.6 billion as other expenses for the year ended March 31, 2008. Other expenses increased by ¥7.0 billion from ¥0.6 billion for the year ended March 31, 2007.

Income before income taxes, equity in net income of affiliates and minority interests increased by ¥27.7 billion (3.6%) to ¥800.7 billion for the year ended March 31, 2008 from ¥772.9 billion for the prior fiscal year.

Income taxes were ¥323.0 billion for the year ended March 31, 2008 and ¥313.7 billion in the prior fiscal year, representing effective tax rates of approximately 40.3% and 40.6%, respectively. We are subject to income taxes imposed by various taxing authorities in Japan, including corporate income tax, corporate enterprise tax and corporate inhabitant income taxes, which in the aggregate amounted to a statutory tax rate of approximately 40.9% for the years ended March 31, 2008 and 2007. The Japanese government introduced various special tax benefits, one of which enabled us to deduct from our taxable income a portion of investments in research and development ("R&D investment tax incentive"). The government also introduced an arrangement where we could deduct a certain amount of investments in IT systems for two years effective April 1, 2006 ("IT infrastructure tax incentive"). The difference between our effective tax rate and statutory tax rate for the year ended March 31, 2008 and 2007 arose primarily from such special tax allowances.

Equity in net income of affiliates (net of applicable taxes) was ¥13.6 billion for the year ended March 31, 2008 compared to net losses of ¥1.9 billion for the prior fiscal year, due to the application of the equity method to our investment in Philippine Long Distance Telephone Company, a telecommunications operator in the Philippines.

As a result of the foregoing, we recorded net income of 491.2 billion for the year ended March 31, 2008, an increase of 33.9 billion (7.4%) from 457.3 billion for the prior fiscal year.

Operating Results for the Year Ended March 31, 2007

The following discussion includes analysis of our operating results for the year ended March 31, 2007. The tables below describe selected operating data and income statement data:

Key Performance Indicators

| | | Years ended March 31 | | | |

Analysis of Operating Results for the Year Ended March 31, 2007 and Comparison with the Prior Fiscal Year

As of March 31, 2007, the number of our cellular (FOMA+mova) subscriptions reached 52.62 million and increased by 1.48 million (2.9%) from 51.14 million at the end of the prior fiscal year. The number of FOMA subscriptions increased by 12.07 million (51.4%) to 35.53 million as of March 31, 2007 from 23.46 million at the end of the prior fiscal year. On the other hand, the number of mova subscriptions, which has decreased since the year ended March 31, 2004, decreased by 10.59 million (38.3%) to 17.09 million as of March 31, 2007 from 27.68 million as of the end of the prior fiscal year. Our market share decreased by 1.3 point to 54.4% as of March 31, 2007 from 55.7% as of March 31, 2006. The number of i-mode subscriptions increased by 1.21 million (2.6%) to 47.57 million as of March 31, 2007 from 46.36 million at the end of the prior fiscal year.

Aggregate ARPU of cellular (FOMA+mova) service decreased by ¥210 (3.0%) to ¥6,700 for the year ended March 31, 2007 from ¥6,910 in the prior fiscal year. While voice ARPU decreased by ¥340 (6.8%) to ¥4,690 for the year ended March 31, 2007 from ¥5,030 in the prior fiscal year, packet ARPU increased by ¥130 (6.9%) to ¥2,010 for the year ended March 31, 2007 from ¥1,880 in the prior fiscal year. This trend was attributable to a decrease in MOU following further penetration of cellular phones into lower usage subscriber segments and a large number of subscribers using i-mode services instead of voice calls. The shrinking trend of ARPU also resulted from our introduction of billing arrangements with reduced or flat rates intended to maintain our current subscribers, an increase in the number of subscribers who subscribe to discount programs and the increase in the number of FOMA billing plans that can be combined with our packet flat-rate service for unlimited i-mode usage. The MOU (FOMA+mova) decreased by 5 minutes (3.4%) to 144 minutes from 149 minutes in the prior fiscal year.

² Inclusive of an aggregate gain on sales of Hutchison 3G UK Holdings Limited ("H3G UK") and KPN Mobile N.V. ("KPN Mobile") shares of ¥101,992 million for the year ended March 31, 2006.

Our churn rate for cellular subscriptions was 0.78% and 0.77% for the years ended March 31, 2007 and 2006, respectively. The churn rate increased by 0.01 point due to the introduction of Mobile Number Portability. The churn rate after the introduction of Mobile Number Portability was at a higher level than that before its introduction. Although the excess of the number of our subscribers who switched their subscriptions to other network operators through Mobile Number Portability over the number of subscribers who switched to us had an adverse impact on our net additional subscriptions, we evaluated the overall impact of Mobile Number Portability on our results of operations and financial position as limited during the year ended March 31, 2007.

For the year ended March 31, 2007, we implemented various measures to retain and expand our subscriber base, such as the introduction of a new packet billing plan which enables subscribers to access internet websites in addition to i-mode sites or to browse video clips at a flat-rate, the launch of HSDPA services, releases of attractive FOMA handsets and the expansion of FOMA coverage areas, both indoors and outdoors. These measures resulted in the acquisition of new subscriptions and contributed to a net increase in the number of subscriptions. However, the downward trend of ARPU continued for the year ended March 31, 2007.

Operating revenues increased by ¥22.2 billion (0.5%) to ¥4,788.1 billion for the year ended March 31, 2007 from ¥4,765.9 billion in the prior fiscal year. Wireless services revenues increased by ¥18.3 billion (0.4%) to ¥4,314.1 billion from ¥4,295.9 billion in the prior fiscal year. As a result, wireless services accounted for 90.1% of operating revenues for the year ended March 31, 2007, maintaining the same level from the prior fiscal year. The increase in wireless services revenues resulted from the excess of the increase in cellular services revenues and other revenues, the former of which was derived from an increase in the number of cellular subscriptions and our recognition as revenue of the portion of "Nikagetsu Kurikoshi" (2 month carry-over) allowance that are projected to expire, over the decrease in revenues from PHS services, which we already decided to terminate. The increase in cellular services revenues was a net of a decrease in voice revenues, by ¥98.3 billion (3.2%) to ¥2,940.4 billion from ¥3,038.7 billion in the prior fiscal year, and an increase in packet communications revenues, by ¥122.8 billion (11.0%) to ¥1,242.2 billion from ¥1,119.5 billion in the prior fiscal year. This result demonstrated an increase in revenues from packet usage due to a large number of subscribers using i-mode services instead of voice calls, and penetration of our packet flat-rate service for unlimited i-mode usage and services such as "i-channel", through which we intend to promote i-mode usage. Voice revenues from FOMA services increased by ¥623.1 billion (53.3%) to ¥1,793.0 billion from ¥1,169.9 billion in the prior fiscal year and packet communications revenues also increased by ¥358.6 billion (58.5%) to ¥971.9 billion from ¥613.3 billion in the prior fiscal year. PHS services revenues decreased by ¥17.9 billion (43.8 %) to ¥23.0 billion from ¥40.9 billion in the prior fiscal year and represented 0.5% of total wireless services revenues. Equipment sales increased by ¥3.9 billion (0.8%) to ¥474.0 billion for the year ended March 31, 2007 from ¥470.0 billion in the prior fiscal year because of the increase in the number of handsets sold after the introduction of Mobile Number Portability.

Operating expenses increased by ¥81.3 billion (2.1%) to ¥4,014.6 billion for the year ended March 31, 2007 from ¥3,933.2 billion in the prior fiscal year. This increase resulted mainly from an increase in cost of equipment sold,

by ¥105.2 billion (9.5%) to ¥1,218.7 billion for the year ended March 31, 2007 from ¥1,113.5 billion for the prior fiscal year, due to the increase in the number of handsets sold after the introduction of Mobile Number Portability. Cost of services increased by ¥20.9 billion (2.8%) to ¥767.0 billion for the year ended March 31, 2007 from ¥746.1 billion in the prior fiscal year due to an increased number of FOMA base stations installed. Depreciation and amortization increased by ¥7.2 billion (1.0%) to ¥745.3 billion for the year ended March 31, 2007 from ¥738.1 billion in the prior fiscal year, reflecting active capital expenditures on the FOMA network in recent years.

The operating income margin decreased to 16.2% for the year ended March 31, 2007 from 17.5% in the prior fiscal year. The lower operating margin resulted mainly from the increase in cost of equipment sold after the introduction of Mobile Number Portability.

As a result of the foregoing, our operating income decreased by \$59.1 billion (7.1%) to \$773.5 billion for the year ended March 31, 2007 from \$832.6 billion in the prior fiscal year.

Other income (or expense) includes items such as interest income, interest expense, gains and losses on sale of marketable securities and other investments, and foreign exchange gains and losses. We accounted for ¥0.6 billion as other expense for the year ended March 31, 2007. Due to an adverse impact of the aggregate gains of ¥102.0 billion on the sale of H3G UK shares and KPN Mobile shares during the year ended March 31, 2006, other income decreased by ¥120.2 billion from other income of ¥119.7 billion for the year ended March 31, 2006.

Income before income taxes, equity in net losses of affiliates and minority interests decreased by ¥179.4 billion (18.8%) to ¥772.9 billion for the year ended March 31, 2007 from ¥952.3 billion in the prior fiscal year.

Income taxes were ¥313.7 billion for the year ended March 31, 2007 and ¥341.4 billion in the prior fiscal year, representing effective tax rates of approximately 40.6% and 35.9%, respectively. The statutory tax rate was approximately 40.9% for the years ended March 31, 2007 and 2006. In addition to the R&D investment tax incentive, the Japanese government introduced an arrangement where we could deduct from taxable income the amount equivalent to 10% of acquisition cost of certain IT related assets up to the amount equivalent to 20% of corporate income tax for the three years started April 1, 2003 ("IT investment promotion tax incentive") as well as the IT infrastructure tax incentive. The difference between our effective tax rate and statutory tax rate for the year ended March 31, 2006 arose primarily from such special tax allowances. For the year ended March 31, 2006, our effective tax rate became lower than our statutory tax rate as we were able to realize the tax benefits of the special tax allowances generated during the year ended March 31, 2006, and a portion of those carried forward from the prior fiscal year which had previously been reserved. For the year ended March 31, 2007, the difference between the effective tax rate and the statutory tax rate shrunk due to the effect of expiration of the IT investment promotion tax incentive on March 31, 2006 and the limited tax benefit in amount derived from the IT infrastructure tax incentive.

Equity in net losses of affiliates (net of applicable taxes) increased to \$1.9\$ billion for the year ended March 31, 2007 from \$0.4\$ billion for the prior fiscal year.

As a result of the foregoing, we recorded net income of ¥457.3 billion for the year ended March 31, 2007, a decrease of ¥153.2 billion (25.1%) from ¥610.5 billion in the prior fiscal year.

Segment Information

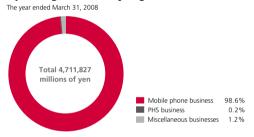

General

Our business consists of three reportable segments: mobile phone business, PHS business and miscellaneous businesses. Our management monitors and evaluates the performance of our segments based on the information that follows, as derived from our management reports.

Our mobile phone business segment includes:

- FOMA services;
- · mova services;
- · packet communications services;
- · international services;
- · satellite mobile communications services; and
- equipment sales related to these services.

Operating Revenues by Segment

Our PHS business segment includes PHS service and the related equipment sales. Our miscellaneous businesses segment includes credit services, public wireless LAN services and other miscellaneous services, the aggregate revenues or assets of which are not significant in amount.

Mobile Phone Business Segment

For the year ended March 31, 2008, operating revenues from our mobile phone business segment decreased by ¥71.7 billion (1.5 %) to ¥4,647.1 billion from ¥4,718.9 billion in the prior fiscal year. Cellular services revenues, which are revenues from voice and packet communications of mobile phone services, decreased by ¥163.6 billion (3.9%) to ¥4,019.0 billion from ¥4,182.6 billion in the prior fiscal year. Equipment sales revenues increased for the year ended March 31, 2008 from the prior fiscal year as the sales commissions to be deducted from gross equipment sales decreased due to the introduction of "Value Course". Revenues from our mobile phone business segment represented 98.6% and 98.5% of total operating revenues for the years ended March 31, 2008 and 2007, respectively. Operating expenses in our mobile phone business segment decreased by ¥126.3 billion (3.2%) to ¥3,788.9 billion from ¥3,915.2 billion in the prior fiscal year. As a result, operating income from our mobile phone business segment increased by ¥54.5 billion (6.8%) to ¥858.2 billion from ¥803.7 billion in the prior fiscal year. Analysis of the changes in revenues and expenses of our mobile phone business segment is also presented in "Operating Strategies", "Operating Trends" and "Operating Results for the year ended March 31, 2008", which were discussed above.

PHS Business Segment

Considering the outlook for our PHS business, we terminated the PHS services effective January 7, 2008. We were engaged in a campaign to encourage PHS subscribers to migrate to FOMA services until the termination of the services. Operating revenues in the PHS business segment decreased by ¥13.5 billion (57.5%) to ¥10.0 billion for the year ended March 31, 2008 from ¥23.4 billion in the prior fiscal year. Revenues from our PHS business segment represented 0.2% and 0.5% of total operating revenues for the years ended March 31, 2008 and 2007, respectively. Operating expenses in the PHS business segment increased by ¥1.1 billion (2.8%) to ¥39.9 billion from ¥38.8 billion in the prior fiscal year. As a result, operating loss in the PHS business segment for the year ended March 31, 2008 increased to ¥30.0 billion from ¥15.4 billion in the prior fiscal year.

Miscellaneous Businesses Segment

Operating revenues from our miscellaneous businesses increased by ¥9.0 billion (19.6%) to ¥54.7 billion for the year ended March 31, 2008, which represented 1.2% of total operating revenues, from ¥45.8 billion in the prior fiscal year. The increase was mainly due to an increase in revenues from businesses such as advertisement, development, sales and maintenance of IT systems, and high-speed internet connection services for hotel facilities. Operating expenses from our miscellaneous businesses increased by ¥14.1 billion (23.3%) to ¥74.7 billion from ¥60.6 billion in the prior fiscal year. The increase was mainly due to an increase in expenses related to our credit services. As a result, operating loss from our miscellaneous businesses worsened to ¥19.9 billion from ¥14.8 billion in the prior fiscal year.

Recent Accounting Pronouncements

In December 2007, the Financial Accounting Standards Board ("FASB") issued FASB Statement of Financial Accounting Standards ("SFAS") No. 141 (revised 2007) "Business Combinations" ("SFAS No. 141R"). SFAS No. 141R requires an acquirer in a business combination to generally recognize and measure all the identifiable assets acquired, the liabilities assumed and any noncontrolling interest in the acquiree at their fair values as of acquisition date. SFAS No. 141R also requires the acquirer to recognize and measure as goodwill the excess of consideration transferred plus the fair value of any noncontrolling interest in the acquiree at acquisition date over the fair value of the identifiable net assets acquired. The excess of the fair value of the identifiable net assets acquired over consideration transferred plus the fair value of any noncontrolling interest in the acquiree at acquisition date is required to be recognized and measured as a gain from a bargain purchase. SFAS No. 141R is effective for business combination transactions for which the acquisition date is on or after the fiscal years beginning on or after December 15, 2008. The impact of the adoption of SFAS No. 141R will depend on future business combination transactions

In December 2007, the FASB issued SFAS No. 160 "Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB (Accounting Research Bulletin) No. 51". SFAS No. 160 requires that the noncontrolling interest held by parties other than the parent be clearly identified, labeled and presented in the consolidated statement of financial position within equity, but separate from the parent's equity. SFAS No. 160 also requires changes in parent's ownership interest while the parent retains its controlling financial

interest in its subsidiary be accounted as equity transactions. SFAS No. 160 is effective for fiscal years and interim periods within those fiscal years beginning on or after December 15, 2008. We currently expect that the impact of the adoption of SFAS No. 160 on our result of operations and financial position will be immaterial.

In March 2008, the FASB issued SFAS No. 161 "Disclosures about Derivative Instruments and Hedging Activities – an amendment of SFAS No. 133." SFAS No. 161 requires entities with derivative instruments to disclose information that should enable financial statement users to understand how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS No. 133 and how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. SFAS No. 161 is effective for fiscal years and interim periods beginning after November 15, 2008. We are currently evaluating the impact of adoption of SFAS No. 161 on our results of operations and financial position.

Critical Accounting Policies

The preparation of our consolidated financial statements requires our management to make estimates about expected future cash flows and other matters that affect the amounts reported in our financial statements in accordance with accounting policies established by our management. Note 2 to our consolidated financial statements includes a summary of the significant accounting policies used in the preparation of our consolidated financial statements. Certain accounting policies are particularly sensitive because of their significance to our reported results and because of the possibility that future events may differ significantly from the conditions and assumptions underlying the estimates used and judgments relating thereto made by our management in preparing our financial statements. Our senior management has discussed the selection and development of the accounting estimates and the following disclosure regarding the critical accounting policies with our independent public accountants as well as our corporate auditors. The corporate auditors attend meetings of the Board of Directors and certain executive meetings to express their opinion and are under a statutory duty to oversee the administration of our affairs by our Directors and to examine our financial statements. Our critical accounting policies are as follows.

Useful Lives of Property, Plant and Equipment, Internal Use Software and Other Intangible Assets

The values of our property, plant and equipment, such as the base stations, antennas, switching centers and transmission lines used by our cellular business, our internal-use software and our other intangible assets are recorded in our financial statements at acquisition or development cost and depreciated or amortized over their estimated useful lives. We estimate the useful lives of property, plant and equipment, internal-use software and other intangible assets in order to determine the amount of depreciation and amortization expense to be recorded in each fiscal year. Our total depreciation and amortization expenses for the years ended March 31, 2008, 2007 and 2006 were ¥776.4 billion, ¥745.3 billion and ¥738.1 billion, respectively. We determine the useful lives of our assets at the time the assets are acquired and base our determinations on expected usage, experience with similar assets, established laws and regulations as well as taking into account anticipated

technological or other changes. The estimated useful lives of our wireless telecommunications equipment are generally set at from 8 to 16 years. The estimated useful life of our internal-use software is set at 5 years. If technological or other changes occur more rapidly or in a different form than anticipated, or new laws or regulations are enacted, or the intended usage changes, the useful lives assigned to these assets may need to be shortened, resulting in recognition of additional depreciation and amortization expenses or losses in future periods.

Impairment of Long-lived Assets

We perform an impairment review for our long-lived assets to be held and used, including fixed assets such as our property, plant and equipment and certain identifiable intangibles such as software for telecommunications network, internal-use software and rights to use telecommunications facilities of wire line network operators, whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. This analysis is separate from our analysis of the useful lives of our assets, although it is affected by some similar factors. Factors that we consider important and that can trigger an impairment review include, but are not limited to, the following trends or conditions related to the business that utilizes a particular asset:

- significant decline in the market value of an asset;
- loss of operating cash flow in current period;
- introduction of competitive technologies and services;
- significant underperformance of expected or historical cash flows;
- significant or continuing decline in subscriptions;
- changes in the manner of usage of an asset; and
- other negative industry or economic trends.

When we determine that the carrying amount of specific assets may not be recoverable based on the existence or occurrence of one or more of the above or other factors, we estimate the future cash inflows and outflows expected to be generated by the assets over their expected useful lives. We also estimate the sum of expected undiscounted future net cash flows based upon historical trends adjusted to reflect our best estimate of future market and operating conditions. If the carrying value of the assets exceeds the sum of the expected undiscounted future net cash flows, we record an impairment loss based on the fair values of the assets. Such fair values may be based on established markets, independent appraisals and valuations or discounted cash flows. If actual market and operating conditions under which assets are used are less favorable or subscriber numbers are less than those projected by management, either of which results in loss of cash flows, additional impairment charges for assets not previously written-off may be required.

Impairment of Investments

We have made investments in certain domestic and foreign entities. These investments are accounted for under either the equity method, cost adjusted for fair value method or cost method, as appropriate based on various conditions such as ownership percentages, exercisable influence over the investments and marketability of the investments. The total carrying value for the investments in affiliates was ¥349.5 billion, while the total carrying value for investments in marketable equity securities and equity securities accounted

Annual Report 2008

73

for under the cost method was ¥187.3 billion as of March 31, 2008. Equity method and cost method accounting require that we assess if a decline in value or an associated event regarding any such investment has occurred and, if so, whether such decline is other than temporary. We perform a review for impairment whenever events or changes in circumstances indicate that the carrying amount of an investment may not be recoverable. Factors that we consider important and that can trigger an impairment review include, but are not limited to, the following:

- significant or continued declines in the market values of the investee;
- loss of operating cash flow in current period;
- significant underperformance of historical cash flows of the investee;
- significant impairment losses or write-downs recorded by the investee:
- significant changes in the quoted market price of public investee affiliates;
- negative results of competitors of investee affiliates; and
- · other negative industry or economic trends.

In performing our evaluations, we utilize various information including discounted cash flow valuations, independent valuations and, if available, quoted market values. Determination of recoverable amounts sometimes require estimates involving results of operations and financial position of the investee, changes in technology, capital expenditures, market growth and share, discount factors and terminal values.

In the event we determine as a result of such evaluations that there are other than temporary declines in value of investment below its carrying value, we record an impairment charge. Such write-down to fair value establishes a new cost basis in the carrying amount of the investment. The impairment charge of investment in affiliates is included in "Equity in losses of affiliates" while the impairment charge of marketable securities or equity securities under the cost method is reflected in "Other income (expense)" in our consolidated statements of income and comprehensive income. During the year ended March 31, 2006, we determined that there was no other than temporary declines in the values of our investee affiliates. For the year ended March 31, 2008 and 2007, although we recorded impairment charges accompanying other than temporary declines in the values of certain investee affiliates, the impairment charges were immaterial in amount. For the years ended March 31, 2008, 2007 and 2006, we recorded impairment charges accompanying with other than temporary declines in the values of certain investments which were classified as marketable securities or equity securities under the cost method. However, the impairment charges did not have a material impact on our results of operations and financial position.

While we believe that the remaining carrying values of our investments are nearly equal to their fair value, circumstances in which the value of an investment is below its carrying amount or changes in the estimated realizable value can require additional impairment charges to be recognized in the future.

Deferred Tax Assets

We record deferred tax assets and liabilities based on enacted tax rates for the estimated future tax effects of carry-forwards and temporary differences between the tax basis of an asset or liability and the amount reported in the balance sheet. In determining the amounts of the deferred tax assets or liabilities, we have to estimate the tax rates expected to be in effect during the carry-forward periods or when the temporary differences reverse. We recognize a valuation allowance against certain deferred tax assets when it is determined that it is more likely than not some or all of future tax benefits will not be realized. In determining the valuation allowance, we estimate expected future taxable income and the timing for claiming and realizing tax deductions and assess available tax planning strategies. If we determine that future taxable income is lower than expected or that the tax planning strategies cannot be implemented as anticipated, the valuation allowance may need to be additionally recorded in the future in the period when such determination is made.

Pension Liabilities

We sponsor a non-contributory defined benefit pension plan which covers almost all of our employees. We also participate in the NTT CDBP, a contributory defined benefit welfare pension plan sponsored by NTT group.

Calculation of the amount of pension cost and liabilities for retirement allowances requires us to make various judgments and assumptions including the discount rate, expected long-term rate of return on plan assets, long-term rate of salary increases and expected remaining service lives of our plan participants. We believe that the most significant of these assumptions in the calculations are the discount rate and the expected long-term rate of return on plan assets. We determine an appropriate discount rate based on current market interest rates on high-quality, fixed-rate debt securities that are currently available and expected to be available during the period to maturity of the pension benefits. In determining the expected long-term rate of return on plan assets, we consider the current and projected asset allocations, as well as expected long-term investment returns and risks for each category of the plan assets based on analysis of historical performances. The rates are reviewed annually and we review our assumptions in a timely manner when an event occurs that would have significant influence on the rates or the investment environment changes dramatically.

The discount rates applied in determination of the projected benefit obligations as of March 31, 2008 and 2007, and expected long-term rates of return on plan assets for the years ended March 31, 2008 and 2007 were as follows:

| Years ended March 31 | | | |
|----------------------|--|--|--|
| 2007 | 2008 | | |
| | | | |
| 2.2% | 2.3% | | |
| 2.5% | 2.5% | | |
| Approximately 3% | Approximately (9)% | | |
| | | | |
| 2.2% | 2.3% | | |
| 2.5% | 2.5% | | |
| Approximately 3% | Approximately (5)% | | |
| | 2.2% 2.5% Approximately 3% 2.2% 2.5% | | |

The amount of projected benefit obligations of our non-contributory defined benefit pension plan as of March 31, 2008 and 2007 was ¥182.2 billion and ¥183.0 billion, respectively. The amount of projected benefit obligations of the NTT CDBP as of March 31, 2008 and 2007, based on actuarial computations which covered only DOCOMO employees' participation, was ¥78.3 billion and ¥131.4 billion, respectively. The amount is subject to a

substantial change due to differences in actual performance or changes in assumptions. In conjunction with the differences between estimates and the actual benefit obligations, net losses in excess of 10% of the greater of the projected benefit obligation or the fair value of plan assets are amortized from "Accumulated other comprehensive income" over the expected average remaining service life of employees in accordance with U.S. GAAP.

The following table shows the sensitivity of our non-contributory defined benefit pension plan and the NTT CDBP as of March 31, 2008 to the change in the discount rate or the expected long-term rate of return on plan assets, while holding other assumptions constant.

| | | Billions of yen | |
|--|--|---|---|
| Change in Assumptions | Change in projected benefit obligation | Change in pension cost, before applicable taxes | Accumulated other comprehensive income, net of applicable taxes |
| Non-contributory defined benefit pension plan | | | |
| 0.5% increase/decrease in discount rate | (11.6) / 12.5 | 0.3 / (0.2) | 7.0 / (7.5) |
| 0.5% increase/decrease in expected long-term rate of return on plan assets | _ | (0.4) / 0.4 | _ |
| NTT CDBP | | | |
| 0.5% increase/decrease in discount rate | (8.6) / 9.7 | 0.3 / (0.3) | 5.3 / (5.9) |
| 0.5% increase/decrease in expected long-term rate of return on plan assets | _ | (0.4) / 0.5 | _ |

Please also refer to Note 16 "Employees' retirement benefits" to our consolidated financial statements for further discussion.

Revenue Recognition

We defer upfront activation fees and recognize them as revenues over the expected term of a subscription. Related direct cost to the extent of the activation fee amount are also being deferred and amortized over the same period. While this policy does not have any material impact on our net income, the reported amounts of revenue and cost of services are affected by the level of activation fees, related direct cost and the estimated length of the subscription period over which such fees and cost are amortized. Factors that affect our estimate of the subscription period over which such fees and cost are amortized include subscriber churn rate and newly introduced or anticipated competitive products, services and technology. The current amortization periods are based on an analysis of historical trends and our experiences. For the years ended March 31, 2008, 2007 and 2006, we recognized as revenues deferred activation fees of ¥38.2 billion, ¥45.2 billion and ¥54.6 billion, respectively, as well as corresponding amounts of related deferred cost. As of March 31, 2008, remaining unrecognized deferred activation fees were ¥103.7 billion.

B. Liquidity and Capital Resources

Cash Requirements

As discussed in "Operational Strategies" section of "A. Operating Results", we introduced a new handset sales method called "Value Course" in November 2007. Under "Value Course", if a subscriber chooses to pay for a handset in installments, we pay for the purchased handset to agent resellers and then charge the installment receivable for the handset in the monthly bill to the subscriber for the installment payment term. Thus, the advance payment for the purchased handset to the agent reseller is likely to have an impact on our cash flow and liquidity. Our cash requirements for the year ending March 31, 2009 include cash needed to pay for the purchased handsets to the agent resellers, to expand our FOMA infrastructure, to invest in other facilities, to make repayments for interest bearing liabilities and other contractual obligations and to pay for strategic investments, acquisitions, joint ventures or other investments. We believe that cash generated from our operating activities,

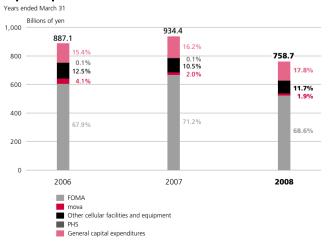

future borrowings from banks and other financial institutions or future offerings of equity or debt securities in the capital markets will provide sufficient financial resources to meet our currently anticipated capital and other expenditure requirements and to satisfy our debt service requirements. When we determine the necessity for external financing, we take into consideration the amount of cash demand, timing of payments, available reserves of cash and cash equivalents and expected cash flows from operations. If we determine that demand for cash exceeds the amount of available reserves of cash and cash equivalents and expected cash flows from operations, we plan on obtaining external financing through borrowing or the issuance of debt or equity securities. Additional debt, equity or other financing may be required if we underestimate our capital or other expenditure requirements, or overestimate our future cash flows. There can be no assurance that such external financing will be available on commercially acceptable terms or in a timely manner.

Capital Expenditures

The wireless telecommunications industry is highly capital intensive because significant capital expenditures are required for the construction of wireless telecommunications network. Our capital requirements for our networks are determined by the nature of facility or equipment, the timing of its installment, the nature and the area of coverage desired, the number of subscribers served in the area and the expected volume of traffic. They are also influenced by the number of cells required in the service area, the number of radio channels in the cell and the switching equipment required. Capital expenditures are also required for information technology and servers for Internet-related services.

Our capital expenditures for the year ended March 31, 2008 decreased from the prior fiscal year. The intensive capital expenditures for expansion of the FOMA network to prepare for Mobile Number Portability already hit its peak during the prior fiscal year. During the year ended March 31, 2008, we added approximately 7,000 outdoor base stations for our FOMA services for an aggregate of approximately 42,700 installed base stations as of March 31, 2008. We also promoted the installment of indoor systems for our FOMA services to complete coverage of approximately 15,100 facilities as of March 31, 2008. On the other hand, we were involved with cost saving efforts such as economized procurement, design and installment of low-cost devices, and improvements in construction processes.

Capital Expenditures

Total capital expenditures for the years ended March 31, 2008, 2007 and 2006 were ¥758.7 billion, ¥934.4 billion and ¥887.1 billion, respectively. For the year ended March 31, 2008, 68.6% of capital expenditures were used for construction of the FOMA network, 1.9% for construction of the second generation mova network, 11.7% for other cellular facilities and equipment and 17.8% for general capital expenditures such as an internal IT system. By comparison, in the prior fiscal year, 71.2% of capital expenditures were used for construction of the FOMA network, 2.0% for the mova network, 10.5% for other cellular facilities and equipment, 0.1% for construction of the PHS network and 16.2% for general capital expenditures.

For the year ending March 31, 2009, we expect total capital expenditures to be ¥719.0 billion, of which approximately 65.6% will be for the FOMA network, 1.1% for the mova network, 12.0% for other cellular facilities and equipment and 21.3% for general capital expenditures. We intend to attentively respond to various demands from our subscribers and increase their convenience by further improving the quality of our FOMA network quality and managing sudden increases in packet traffic with the expansion of the HSDPA network.

We currently expect that capital expenditures for the next few fiscal years will be at a lower level primarily because capital expenditures related to expanding, maintaining and upgrading our FOMA network already peaked in the prior fiscal year resulting in an expected decrease in subsequent fiscal years.

Our level of capital expenditures may vary significantly from expected levels for a number of reasons. Capital expenditures for expansion and enhancement of our existing cellular network may be influenced by the growth in subscriptions and traffic, which is difficult to predict with certainty, the ability to identify and procure suitably located base station sites on commercially reasonable terms, competitive environments in particular regions and other factors. The nature, scale and timing of capital expenditures to reinforce our 3G network may be materially different from our current plans due to demand for the services, delays in the construction of the network or in the introduction of services and changes in the variable cost of components for the network. We expect that these capital expenditures will be affected by market demand for our mobile multimedia services, including i-mode and other data transmission services, and by our schedule for ongoing expansion of the existing network to meet demand.

Long-term Debt and Other Contractual Obligations

As of March 31, 2008, we had ¥476.8 billion in outstanding long-term debt including the current maturities, primarily in corporate bonds and loans from financial institutions, compared to ¥602.9 billion as of the end of the prior fiscal year. We did not implement any long-term financing in the years ended March 31, 2008, 2007, or 2006, during which we repaid ¥131.0 billion, ¥193.7 billion and ¥150.3 billion of long-term debt, respectively.

Of our long-term debt outstanding as of March 31, 2008, ¥95.2 billion, including current portion, was indebtedness to financial institutions. The indebtedness consisted of debts denominated in Japanese yen, US dollar and Singapore dollar mainly with fixed interest rates, of which the weighted average was 1.2%, 6.4% and 4.7% per annum, respectively. The term of maturities was from the year ending March 31, 2009 through 2013. As of March 31, 2008, we also had ¥381.5 billion in bonds due from the year ending March 31, 2009 to 2012 with a weighted average coupon rate of 1.4%.

We carefully consider terms and conditions of corporate bonds and loans from financial institutions to avoid an excessive concentration of our repayment or redemption obligations.

On June 11, 2008, we issued unsecured domestic corporate bonds in the amount of ¥80.0 billion, of which the coupon rate is 1.96%, and the redemption will be due during the year ending March 31, 2019. We intend to assign cash raised through this issuance of corporate bonds mainly to the repayment of long-term debt obligations.

As of March 31, 2008, we and our long-term debt obligations were rated by rating agencies as shown in the table below. Such ratings were issued by the rating agencies upon our requests. On May 21, 2007, Standard & Poor's upgraded our long-term issue and issuer credit ratings from AA- to AA. Credit ratings reflect rating agencies' current opinions about our financial capability of meeting payment obligations of our debt in accordance with their terms. Rating agencies are able to upgrade, downgrade, reserve or withdraw their credit ratings on us anytime at their discretions. The rating is not a market rating or recommendation to buy, hold or sell our shares or any financial obligations of us.

| Rating agencies | Type of rating | Rating | Outlook |
|---|--------------------------------|--------|---------|
| Moody's | Long Term Obligation Rating | Aa1 | Stable |
| Standard & Poor's | Long-Term Issuer Credit Rating | AA | Stable |
| Standard & Poor's | Long-Term Issue Credit Rating | AA | _ |
| Japan Credit Rating Agency, Ltd. | Long-Term Senior Debt Rating | AAA | Stable |
| Rating and Investment Information, Inc. | Issuer Rating | AA+ | Stable |

None of our debt obligations has ever had a clause in which a downgrade of our credit rating could lead to a change in a payment term of such an obligation so as to accelerate its maturity.

The following table summarizes our long-term debt, lease obligations and other contractual obligations (including current portion) over the next several years.

Long Term Debt, Lease Obligations and Other Contractual Obligations

| | | Millions of yen | | |
|----------|--|--|--|--|
| | | Payments due by period | | |
| | 1 year | | | |
| Total | or less | 1-3 years | 4-5 years | After 5 years |

^{*} The amount of contractual obligations which is immaterial in amount or of which the timing of payments are uncertain is not included in "Other Contractual Obligations" in the above table.

"Other contractual obligations" principally consisted of commitments to purchase property and equipment for our cellular network, commitments to purchase inventories, mainly handsets, commitments to purchase services and commitments to acquire equity securities. As of March 31, 2008, we had committed ¥51.7 billion for property, plant and equipment, ¥22.0 billion for inventories and ¥44.9 billion for other purchase commitments.

In addition to our existing commitments, we expect to make significant capital expenditures on an ongoing basis for our FOMA network and for other purposes. Also, we consider potential opportunities for entry to new areas of business, merger and acquisitions, establishment of joint ventures, strategic investments or other arrangements primarily in wireless communications businesses from time to time. Currently, we have no contingent liabilities related to litigation or guarantees that could have a materially adverse effect on our financial position.

Sources of Cash

The following table sets forth certain information about our cash flows during the years ended March 31, 2008, 2007 and 2006:

Millions of yen Years ended March 31

| | 2006 | 2007 | 2008 |
|--|------------|-----------|------------|
| Net cash provided by operating activities | ¥1,610,941 | ¥ 980,598 | ¥1,560,140 |
| Net cash used in investing activities | (951,077) | (947,651) | (758,849) |
| Net cash used in financing activities | (590,621) | (531,481) | (497,475) |
| Net increase (decrease) in cash and cash equivalents | 70,772 | (497,662) | 303,843 |
| Cash and cash equivalents at beginning of year | 769,952 | 840,724 | 343,062 |
| Cash and cash equivalents at end of year | ¥ 840,724 | ¥ 343,062 | ¥ 646,905 |

Analysis of Cash Flows for the Year Ended March 31, 2008 and Comparison with the Prior Fiscal Year

For the year ended March 31, 2008, our net cash provided by operating activities was ¥1,560.1 billion, an increase by ¥579.5 billion (59.1%) from ¥980.6 billion in the prior fiscal year. Net cash provided by operating activities increased due mainly to the following;

- a decrease in the net payment of income taxes by ¥179.2 billion, where the
 payment of income taxes decreased to ¥ 200.1 billion from ¥359.9 billion
 in the prior fiscal year and the collection of income taxes receivable increased
 to ¥20.3 billion from ¥0.9 billion in the prior fiscal year, after deferred tax
 asset from the impairment of our investment in H3G UK was realized; and
- as banks were closed on the last day of March 2007, cash in the amount of ¥210.0 billion including cellular revenues, which would have been received by March 31, 2007, was actually received in April 2007.

Net cash used in investing activities for the year ended March 31, 2008 was ¥758.8 billion, the main components of which included expenditures of ¥765.3 billion for purchases of tangible and intangible assets and of ¥124.3 billion for strategic investments, and net proceeds of ¥148.9 billion mainly from redemption of long-term investments and changes in investments with original maturities of more than three months for cash management purposes. The net amount of cash used decreased by ¥188.8 billion (19.9%) from ¥947.7 billion used in the prior fiscal year. The decrease in the net cash used consisted mainly of the following:

- expenditures for purchases of tangible and intangible assets decreased to ¥765.3 billion from ¥948.7 billion in the prior fiscal year;
- net proceeds from redemption of long-term investments and changes in investments with original maturities of more than three months for cash management purposes increased to ¥148.9 billion from ¥50.7 billion in the prior fiscal year; and
- purchases of non-current investments increased to ¥124.3 billion from ¥41.9 billion in the prior fiscal year.

During the year ended March 31, 2008, in order to respond attentively to diverse demand from our subscribers, we invested in telecommunications facilities and equipment to expand the network coverage of HSDPA services and to enhance FOMA network reliability and capacity against the growth of traffic demand.

Net cash used in financing activities for the year ended March 31, 2008 was ¥497.5 billion, primarily from the repayment of ¥131.0 billion for long-term debt, dividend payments of ¥190.5 billion and payments of ¥173.0 billion for acquisition of treasury stock. The net amount of cash used decreased by ¥34.0 billion (6.4%) from ¥531.5 billion in the prior fiscal year. The decrease in net cash used in financing activities was due primarily to the following:

- a decrease in the repayment of long-term debt to ¥131.0 billion from ¥193.7 billion in the prior fiscal year;
- an increase in dividend payments to ¥190.5 billion from ¥176.9 billion in the prior fiscal year; and
- an increase in payments to acquire treasury stock to ¥173.0 billion from ¥157.2 billion in the prior fiscal year.

Cash and cash equivalents as of March 31, 2008 amounted to ¥646.9 billion, representing an increase by ¥303.8 billion (88.6%) from ¥343.1 billion as of the end of the prior fiscal year. The balance of investments with original maturities of longer than three months, which were made to manage a part of our cash efficiently, was ¥52.2 billion and ¥200.5 billion as of March 31, 2008 and 2007, respectively.

Analysis of Cash Flows for the Year Ended March 31, 2007 and Comparison with the Prior Fiscal Year

For the year ended March 31, 2007, our net cash provided by operating activities was ¥980.6 billion, a decrease by ¥630.3 billion (39.1%) from ¥1,610.9 billion in the prior fiscal year. Net cash provided by operating activities decreased due mainly to the following;

- an increase in the payment of income taxes to ¥359.9 billion from ¥182.9 billion and a decrease in the collection of income taxes receivable to ¥0.9 billion from ¥93.1 billion in the prior fiscal year, when deferred tax asset from the impairment of our investment in AT&T Wireless Services, Inc. was realized; and
- because the bank was closed on the last day of March 2007, which fell on a weekend, our cash reception of ¥210.0 billion including cellular revenues was deferred to the following month.

Net cash used in investing activities was ¥947.7 billion, which consisted mainly of expenditures of ¥948.7 billion for purchases of tangible and intan-

gible assets and of ¥41.9 billion for strategic investments, offset by proceeds of ¥50.7 billion mainly from redemption of long-term investments and changes in investments with original maturities of more than three months for cash management purposes. The net amount of cash used decreased by ¥3.4 billion (0.4%) from ¥951.1 billion used in the prior fiscal year. The slight decrease in the net cash used consisted mainly of the following:

- expenditures for purchases of tangible and intangible assets increased to ¥948.7 billion from ¥833.9 billion in the prior fiscal year;
- proceeds from redemption of long-term investments and changes in investments with original maturities of more than three months for cash management purposes decreased to ¥50.7 billion from ¥149.0 billion in the prior fiscal year, and
- purchases of non-current investments decreased to ¥41.9 billion from ¥292.6 billion in the prior fiscal year.

During the year ended March 31, 2007, in order to prepare for the introduction of Mobile Number Portability, we actively invested in telecommunications facilities and equipment to expand the network coverage of FOMA services and to enhance its network reliability and capacity against the growth of traffic demand.

Net cash used in financing activities was ¥531.5 billion, primarily from the repayment of ¥193.7 billion for long-term debt, dividend payments of ¥176.9 billion and payments of ¥157.2 billion for the acquisition of treasury stock. The net amount of cash used decreased ¥59.1 billion (10.0%) from ¥590.6 billion in the prior fiscal year. The decrease in net cash used in financing activities was due primarily to the followings:

- an increase in the repayment for long-term debt to ¥193.7 billion from ¥150.3 billion in the prior fiscal year;
- an increase in dividend payments to ¥176.9 billion from ¥135.5 billion in the prior fiscal year; and
- a decrease in payments to acquire treasury stock to ¥157.2 billion from ¥300.1 billion in the prior fiscal year.

Cash and cash equivalents as of March 31, 2007 amounted to ¥343.1 billion, representing a decrease by ¥497.7 billion (59.2%) from ¥840.7 billion as of the end of the prior fiscal year. The amount of investments with original

maturities of longer than three months, which were made to manage a part of our cash efficiently, was ¥200.5 billion and ¥251.0 billion as of March 31, 2007 and 2006, respectively.

Prospect of Cash Flows for the Year Ending March 31, 2009

As for our sources of cash for the year ending March 31, 2009, we currently expect our net cash flows from operating activities to decrease significantly from the prior fiscal year because of an increase in installment receivable due to penetration of "Value Course" and an increase in payment for income taxes. We currently anticipate that the trend of decreasing cash flows from operating activities will be temporary.

Our net cash flow used in investing activities for the year ending March 31, 2009 is expected to decrease because of a decrease in our capital expenditures to approximately ¥719.0 billion from ¥758.7 billion for the year ended March 31, 2008.

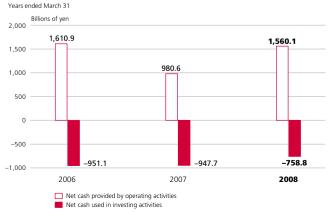

C. Research and Development

Our research and development activities embrace three key efforts: development of new products and services such as handsets and applications for 3G systems, development of infrastructure and compatible handsets featuring what is called "Super 3G" or "3.9G" technology, and research and development related to fourth-generation systems. Research and development expenditures are charged to expenses as incurred. We spent ¥100.0 billion, ¥99.3 billion and ¥110.5 billion as research and development expenses for the years ended March 31, 2008, 2007 and 2006, respectively.

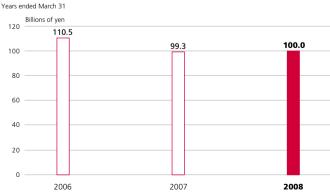

D. Trend Information

The Japanese cellular phone market is undergoing changes brought about by factors such as a higher cellular phone penetration rate, diversification of customer needs, introduction of Mobile Number Portability and market entry by new competitors. In this environment, with operators taking measures such as the enhancement of handset lineups and the introduction of value-added services and lower billing plans, we expect that competition will become increasingly fierce.

Cash Flows

Research and Development Expenses

In the year ending March 31, 2009, we expect that our operating revenues and operating income will increase in comparison with the prior fiscal year based on the following trends in our business:

- While we anticipate that an increase in new subscriptions will be limited due to the high cellular phone penetration rate, we expect to acquire a higher net increase in the number of subscriptions in the year ending March 31, 2009 compared to that in the year ended March 31, 2008, by taking measures such as lowering the churn rate through our marketing aimed at upgrading brand loyalty and improving the satisfaction of current subscribers. Furthermore, we expect the proportion of FOMA subscriptions to increase to approximately 90% of our total cellular subscriptions due to ongoing migration of our mova subscribers to FOMA services;
- Aggregate ARPU (FOMA+mova) and voice ARPU (FOMA+mova) each decreased while packet ARPU (FOMA+mova) increased in the year ended March 31, 2008, as compared to the prior fiscal year. We expect these trends to continue in the year ending March 31, 2009, primarily as a result of the penetration of the discount programs implemented in prior years to strengthen our competitiveness and the effects of a decrease in revenue in conjunction with the introduction of the "Value Plan". The "Value Plan" provides discounted basic monthly charges in exchange for the subscriber's payment for the handset price not discounted by handset sales incentives. With regards to the packet ARPU, the increase is due primarily to the uptrend in billed amounts in conjunction with the migration from mova to FOMA and the increase in subscriptions to our optional packet flat-rate service for unlimited i-mode usage;
- With regard to equipment sales, in the fiscal year ended March 31, 2008, the number of handsets sold to sales agents and handset costs declined compared to the previous fiscal year, but with the introduction of the "Value Course" in November 2007, handset sales incentives which are deducted from equipment sales were reduced, and after deduction of sales commission to agent resellers, equipment sales increased over the previous fiscal year. In the fiscal year ending March 31, 2009, we expect an increase in the number of handsets sold wholesale to agent resellers is expected,

- and combined with further market penetration by the "Value Course", we expect this increase to lead to a decline of handset sales incentives which are deducted from equipment sales, and we expect equipment sales after deduction of sales commission to agent resellers to increase significantly over the previous fiscal year.
- Due to the above, we expect operating income for the fiscal year ending March 31, 2009 to increase over the previous fiscal year. Despite a decrease in cellular services revenues resulting from the decrease in aggregate ARPU exceeding the effects of increased revenue in conjunction with subscriber growth, we expect that this decrease will be more than offset by the increase in equipment sales.
- We expect SG&A expenses, network cost (telecommunication facility use charges, depreciation and amortization cost, loss on sale or disposal of fixed assets) and other operating expenses for the fiscal year ending March 31, 2009, to remain at the same level as the previous fiscal year. While we expect measures implemented to improve the satisfaction of current subscribers (including CI changes through revamping of the corporate brand and the merger with the regional DOCOMO companies) to lead to an increase in general expenses, this increase will be offset by a decrease in sales commissions through market penetration of the "Value Course" and greater efficiency and lower costs in capital investment.

We expect net income for the year ending March 31, 2009 to increase in comparison with the prior fiscal year based on the above trends in our business.

It should be noted that with the "Value Course" introduced in November 2007, sales commissions, which in the past were applied at the time of sale, will be reduced. However, in the accompanying "Value Plan", the discount on basic monthly charges will be applied into the future, which will result in an impermanent contribution to increased revenues. We expect that this effect will be greatest in the fiscal year ending March 31, 2009 when this sales model will penetrate the market, and in the fiscal year ending March 2010 and beyond, this effect will decline.

Risk Factors

Risks Relating to Our Business and the Japanese Wireless Telecommunications Industry

As competition in the market becomes more fierce due to changes in the business environment caused by Mobile Number Portability, new market entrants, competition from other cellular service providers or other technologies, and other factors, could limit our acquisition of new subscriptions, and retention of existing subscribers, or may lead to diminishing ARPU or an increase in our costs and expenses.

Market changes such as the introduction of Mobile Number Portability (MNP) and the emergence of new service providers are resulting in increasing competition with other service providers in the telecommunications industry. For example, other mobile service providers have introduced new products and services including 3G handsets, music player handsets, music distribution services, and fixed-rate services for voice communications limited to specified recipients, e-mail, and new installment sale methods for handsets. There are also providers that now offer or may in the future offer services such as combined billing, aggregated point programs, and services offering free calls between fixed-line and cellular phones in conjunction with fixed-line communications, which may be more convenient for customers.

At the same time, there may be increased competition resulting from the introduction of other new services and technologies, especially low-priced and flat-rate services, fixed-line or mobile IP phones, high-speed fixed-line broadband Internet service and digital broadcasting, wireless LAN, and so on or an integration of the services.

In addition to competition from other service providers and technologies, there are other factors increasing competition among mobile network operators in Japan such as saturation in the Japanese cellular market, changes to business and market structures due to the entry of new competitors in the market, including MVNOs*, changes in the regulatory environment, and increased rate competition.

Under these circumstances, the number of net new subscriptions we acquire may continue to decline in the future and may not reach the number we expect. Also, in addition to difficulty acquiring new subscriptions, we may not be able to maintain existing subscriptions at expected levels due to increased competition among cellular service providers in the areas of rates and services. Furthermore, in order to capture new subscriptions and maintain existing subscriptions, we may need to incur higher than expected costs. In this fiercely competitive environment, in order to provide advanced services and increase convenience to our customers, we have made various rate revisions such as the introduction in June 2004 of "Pake-hodai", which is a flatrate packet transmission service for FOMA i-mode, the introduction of a new unified rate plan for FOMA services and mova services in November 2005 that users find simple and easy to understand, the introduction in March 2006 of a new rate plan that enables users to apply Pake-hodai to all FOMA services, the introduction in March 2007 of "Pake-hodai Full", a service that enables subscribers with full-browser handsets to view not only i-mode but also PC websites and video for a flat monthly rate, the introduction in August 2007 of "Fami-wari MAX 50" and "Hitoridemo Discount 50," which give a uniform 50% discount on basic monthly charges, regardless of length of continuous service, and the introduction in April 2008 of a new rate plan that allows users in the same "Family Discount" group to make free domestic calls to each other 24 hours a day. However, we cannot be certain that these measures will enable us to acquire new and maintain existing subscribers. Furthermore, these rate revisions are expected to lead to a certain decline in ARPU, but if the trend of subscribers using "Family Discounts" and switching to flat-rate services increases more than we expect, our ARPU may decrease more than we expect, which may have a material adverse effect on our financial condition and results of operations.

*MVNO: Mobile Virtual Network Operator, a business that borrows the wireless communication infrastructure of other companies to provide services.

Current and new services, usage patterns, and sales schemes introduced by our corporate group may not develop as planned, which could affect our financial condition and limit our growth.

We view the expansion of AV traffic such as video phones using 3G handsets, the development and expansion of new services such as credit services useful in everyday life and business through i-mode FeliCa, and increased revenue through the expansion of data communications as important to our future growth. However, a number of uncertainties may arise to prevent the development of these services and constrain our growth. In particular, we cannot be certain that:

- We will be able to find the partners and content providers needed to
 provide the new services and forms of usage we are introducing and
 persuade a sufficient number of vendors and other establishments to install
 i-mode FeliCa readers;
- We will be able to provide planned new services and forms of usage as scheduled and keep costs needed for the deployment and expansion of such services within budget;
- The services and installment sale and other methods we offer and plan to
 offer will be attractive to current and potential subscribers and there will be
 sufficient demand for such services;
- Manufacturers and content providers will create and offer products including handsets for our 3G system and handsets and programming for our 3G i-mode services at appropriate prices and on a timely basis;
- Our current and future data communications services including i-mode and other services will be attractive to existing and potential subscribers and achieve continued or new growth;
- Demand in the market for mobile handset functionality will be as we expect
 and as a result our handset procurement costs will be reduced; and
- We will be able to commence services with improved data communication speeds enabled by HSDPA (High Speed Downlink Packet Access, a highspeed packet transmission technology utilizing Wideband Code Division Multiple Access, or W-CDMA) technology planned.

If the development of our new services or forms of usage is limited, it may have a material effect on our financial condition and results of operations.

The introduction or change of various laws or regulations or the application of such laws and regulations to our corporate group could restrict our business operations, which may adversely affect our financial condition and results of operations.

The Japanese telecommunications industry has been undergoing regulatory reform in many areas including rate regulation. Because we operate on radio spectrum allocated by the Government, the mobile telecommunications industry in which we operate is particularly affected by the regulatory environment. Various governmental bodies have been recommending or considering changes that could affect the mobile telecommunications industry, and there may be continued reforms including the introduction or revision of laws or regulations that could have an adverse effect on us. These include:

- Revision of the spectrum allocation system such as reallocation of spectrum and introduction of an auction system;
- Measures to open up some segments of telecommunication platform functions such as authentication and payment collection to other operators;
- Rules that could require us to open our i-mode service to all content providers and Internet service providers or that could prevent us from setting or collecting i-mode content fees or putting i-mode service on cellular phone handsets as an initial setting;
- Regulations to prohibit or restrict certain content or transactions or mobile Internet services such as i-mode;
- Measures which would introduce new costs such as the designation of mobile phone communications as a universal service and other changes to the current universal service fund system;
- Regulations to increase handset competition such as SIM* unlocking regulations;
- Fair competition measures to promote new entry by MVNOs
- Introduction of new measures to promote competition based on a review of the designated telecommunications facilities system (dominant carrier regulation); and
- Other measures including competition safeguard measures directed toward us, NTT East and NTT West to enhance competition that would restrict our business operations in the telecommunications industry.

It is difficult to predict with certainty if any of the above changes will be proposed to the relevant laws and regulations and, if they are made, the extent to which our business will be affected. However, the implementation of one or more of the changes described above or other changes to laws and regulations could materially affect our financial condition and results of operations.

Limitations in the amount of frequency spectrum or facilities made available to us could negatively affect our ability to maintain and improve our service quality and level of customer satisfaction.

One of the principal limitations on a cellular communication network's capacity is the available radio frequency spectrum it can use. We have limited spectrum and facilities available to us to provide our services. As a result, in certain parts of metropolitan Tokyo and Osaka, such as areas near major train stations, our cellular communication network operates at or near the maximum capacity of its available spectrum during peak periods, which may cause reduced service quality. In addition, the quality of the services we provide may also decrease due to the limited processing capacity of our base stations and switching facilities during peak usage periods if our subscription base dramatically increases or the volume of content such as images and music provided through our i-mode service significantly expands. Also, in relation to our 3G service, packet transmission flat fee service for 3G i-mode, and our flat-rate service that enables subscribers to view full-browser PC websites and video, an increase in the number of subscriptions and traffic volume of our subscribers may go substantially beyond our projections, we may not be able to process such traffic with our existing facilities and our quality of service may decline.

Furthermore, with an increasing number of subscriptions and traffic volume, our quality of service may decline if we cannot obtain the necessary allocation of spectrum from the Government for the smooth operation of our business.

We may not be able to avoid reduced quality of services despite our continued efforts to improve the efficiency of our use of spectrum through technology and to acquire new spectrum. If we are not able to successfully address such problems in a timely manner, we may experience constraints on the growth of our mobile communications services or lose subscribers to our competitors, which may materially affect our financial condition and results of operations.

^{*} SIM: Subscriber Identity Module. An IC card inserted into a handset on which subscriber information is recorded, used to identify user.

The W-CDMA technology that we use for our 3G system and/or mobile multimedia services may not be introduced by other overseas operators, which could limit our ability to offer international services to our subscribers

For our 3G system, we currently use W-CDMA technology. W-CDMA technology is one of the global standards for cellular telecommunications technology approved by the International Telecommunications Union (ITU) as part of its efforts to standardize 3G cellular technology through the issuance of guidelines known as IMT-2000. We may be able to offer our services, such as global roaming, on a worldwide basis if enough other mobile operators adopt handsets and network facilities based on W-CDMA standard technology that is compatible with ours. We expect that the companies we have invested in overseas, our overseas strategic partners and many other mobile operators will adopt this technology.

Also, we have technology alliances with overseas operators in relation to i-mode services and we are aggressively promoting the spread and expansion of i-mode services by overseas operators.

However, if a sufficient number of other mobile operators do not adopt W-CDMA technology or there is a delay in the introduction of W-CDMA technology, we may not be able to offer global roaming services as expected and we may not be able to offer our subscribers the convenience of overseas service. Also, if adoption of W-CDMA technology abroad is not conducted sufficiently and the number of i-mode subscribers among our strategic partners and the usage of i-mode service by those subscribers does not increase sufficiently, we may not realize the benefits of economies of scale we currently expect in terms of purchasing network facilities and offering handsets and contents developed for our services at appropriate prices. Also, we cannot be sure that handset manufacturers or manufacturers of network equipment will be able to appropriately and promptly adjust their handsets and network equipment if we need to change the handsets or network we currently use due to a change in W-CDMA technology as a result of activities conducted by standard-setting organizations.

If W-CDMA technology and i-mode services do not develop as we expect and we are not able to improve the quality of our overseas services or enjoy the benefits of global economies of scale, this may have an adverse effect on our financial condition and results of operations.

Our domestic and international investments, alliances and collaborations may not produce the returns or provide the opportunities we expect.

One of the major components of our strategy is to increase our corporate value through domestic and overseas investments, alliances and collaborations. We have entered into alliances and collaborations with other companies and organizations overseas which we believe could help us achieve this objective. We are also promoting this strategy by investing, entering into alliances with and collaborating with domestic companies and investing in new business areas.

However, there can be no assurance that we will be able to maintain or enhance the value or performance of our past or future investments or that we will receive the returns or benefits we expect from these investments, alliances and collaborations. Our investments in new business areas outside of the mobile telecommunication business may be accompanied by challenges beyond our expectations, as we have little experience in such new areas of business.

In recent years, the companies in which we have invested have experienced a variety of negative developments, including severe competition, increased debt burdens, significant volatility in share prices and financial difficulties. To the extent that these investments are accounted for by the equity method and to the extent that the investee companies have net losses, our financial results will be adversely affected by our pro rata portion of these losses. If there is a loss in the value of our investment in any investee company and such loss in value is other than a temporary decline, we may be required to adjust the book value and recognize an impairment loss for such investment. Also, a business combination or other similar transaction involving any of our investee companies could require us to realize impairment loss for any decline in the value of investment in such investee company. In either event, our financial condition or results of operations could be materially adversely affected.

As electronic payment capability and many other new features are built into our cellular phones, and services of parties other than those belonging to our corporate group are provided through our cellular handsets, potential problems resulting from malfunctions, defects or loss of handsets, or imperfection of services provided by such other parties may arise, which could have an adverse effect on our financial condition and results of operations.

Various functions are mounted on the mobile handsets we provide, and if we cannot appropriately deal with technological problems that may arise with respect to current or future handsets or the malfunction, defect or loss of handsets, our credibility may decline and our corporate image may be damaged, leading to an increase in cancellations of subscription or an increase in expenses for indemnity payments to subscribers and our financial condition or results of operations may be affected. New issues may arise which are different from those related to mobile communications services which we have been providing, especially with i-mode handsets with FeliCa capabilities that can be used for electronic payment and credit transactions. Events that may lead to a decrease in our credibility and corporate image, or an increase in cancellations of subscriptions and indemnity payments for subscribers include the following:

- Breakdown, defect and malfunction of our handsets;
- Loss of information, e-money or points due to a breakdown of handsets or other factors;
- Illegal use of information, e-money, credit functions and points by third parties due to a loss or theft of handsets;
- Illegal access to and use of user records and balances accumulated on handsets by third-parties; and
- Inadequate and inappropriate management of e-money, credit functions or points by companies with which we make alliances or collaborate.

Social problems that could be caused by misuse or misunderstanding of our products and services may adversely affect our credibility or corporate image.

We may face an increase in cancellations of existing subscriber contracts and difficulty in acquiring new subscriptions due to decreased credibility of our products and services and damaged corporate image caused by inappropriate use of our products and services by unscrupulous subscribers.

One example is unsolicited bulk e-mail sent through our e-mail services, including i-mode service and short mail. Despite our extensive efforts to address this issue by protecting our subscribers from incurring any economic disadvantage caused by unsolicited bulk e-mails including notifying our subscribers via various brochures, providing unsolicited bulk e-mail filtering functions with our handsets and pursuing actions against companies which distribute large amounts of such unsolicited bulk e-mails, the problem has not yet been rooted out. If our subscribers receive a large amount of unsolicited e-mail, it may cause a decrease in customer satisfaction and damage our corporate image, leading to a reduction in the number of i-mode subscriptions.

Mobile phones have been used in crimes such as the "it's me" fraud, whereby callers request an emergency bank remittance pretending to be a relative. To combat these misuses of our services, we have introduced various measures such as more strict identification confirmation at points of purchase and ended new contracts for pre-paid mobile phones as of the end of March 2005 because pre-paid mobile phones are easier to use in criminal activities. However, in the event criminal usage increases, mobile phones may be regarded as a problem and lead to an increase in cancellation of contracts.

In addition, as our handsets and services become more sophisticated, new issues may arise when subscribers are charged fees for packet transmission at levels higher than they are aware of as a result of using handsets without fully recognizing over use of packet transmission in terms of frequency and volume. Also, there are issues concerning manners for phone usage in public places such as in trains and aircraft and the occurrence of car accidents caused by the use of mobile phones while driving. Further, from the perspective of encouraging sound development of the Internet society, we have introduced a filtering service that limits access to harmful web sites that can have a negative impact on minors. However, with regard to this service, there has been a wide range of debate, involving MIC, Internet content providers, and others, and the matter has become a social issue. These issues may similarly damage our corporate image.

To date, we believe that we have properly addressed the social issues involving mobile phones. However, it is uncertain whether we will be able to continue addressing those issues appropriately in the future as well and if we fail to do so, we may experience an increase in cancellation of existing subscriber contracts or fail to acquire new subscribers as expected, and this may affect our financial condition and results of operations.

Inadequate handling of confidential business information including personal information by our corporate group, contractors and other factors, may adversely affect our credibility or corporate image.

In April 2005, the Law concerning the Protection of Personal Information (the "Personal Information Protection Law") came into force and protection of personal information became an important issue at companies that handle personal information. We possess information on numerous subscribers in the telecommunications, credit, and other businesses, and to appropriately and promptly address the Personal Information Protection Law, we have set up an "information security department" to put in place comprehensive security management across the company such as thorough management of subscriber information, employee education, supervision of subcontractors and by strengthening technological security.

However, in the event an information leak occurs despite these security measures, our credibility may be significantly damaged and we may experience an increase in cancellation of subscriber contracts, an increase in indemnity costs and slower increase in additional subscriptions, and our financial condition and results of operations may be adversely affected.

Owners of intellectual property rights that are essential for our business execution may not grant us the right to license or otherwise use such intellectual property rights on acceptable terms or at all, which may limit our ability to offer certain technologies, products and/or services, and we may also be held liable for damage compensation if we infringe the intellectual property rights of others.

For the Group to carry out its business, it is necessary to obtain licenses and other rights to use the intellectual property rights of third parties. Currently, the group is obtaining licenses from the holders of the rights concerned by concluding license agreements. We will obtain the licenses from the holders of the rights concerned if others have the rights to those intellectual property rights which are necessary for us to operate our business in the future. However, if we cannot come to agreement with the holders of the rights concerned or mutual agreement concerning the granted rights cannot be maintained afterwards, there is a possibility that we will not be able to provide specific technologies, products or services of the group. Also, if the group receives claims of violation of intellectual property rights from others, we may be forced to expend considerable time and cost in reaching a resolution, and if such claims are recognized, we may be liable to pay damages for infringement of the rights concerned, which may adversely affect our financial condition and results of operations.

Earthquakes, power shortages, malfunctioning of equipment, software bugs, computer viruses, cyber attacks, hacking, unauthorized access and other problems could cause systems failures in the networks required for the provision of service, disrupting our ability to offer services to our subscribers and may adversely affect our credibility or corporate image.

We have built a nationwide network including base stations, antennas, switching centers and transmission lines and provide mobile communication service using this network. In order to operate our network systems in a safe and stable manner, we have various measures in place such as redundant systems. However, despite these measures, our system could fail for various reasons including hardware problems, network damage caused by earth-quakes, power shortages, typhoons, floods, terrorism and similar phenomena and events. These system failures can require an extended time for repair and as a result, may lead to decreased revenues and increased repair costs, and our financial condition and results of operations may be adversely affected.

There have been instances in which millions of computers worldwide were infected by viruses through the Internet. Similar incidents could occur on our mobile communications network. If such a virus entered our network or handsets through such means as hacking, unauthorized access, or otherwise, our system could fail and our mobile phones become unusable. In such an instance, the credibility of our network and customer satisfaction could decrease significantly. Although we have enhanced our security systems to block unauthorized access and remote downloading in order to provide for unexpected events, such precautions may not make our system fully prepared for every event. In addition, our network could be affected by software bugs, incorrect equipment settings and human errors which are not the result of malfeasance, but also cause system failures or breakdowns.

In the event we are unable to properly respond to any such events, our credibility or corporate image may be reduced, and we may experience a decrease in revenues as well as significant repair costs, which may affect our financial condition and results of operations.

Concerns about wireless telecommunications health risks may adversely affect our financial condition and results of operations.

Media and other reports have suggested that electric wave emissions from wireless handsets and other wireless equipment may adversely affect the health of mobile phone users and others such as by causing cancer and vision loss and interfering with various electronic medical devices including hearing aids and pacemakers, and also may present increased health risks for users who are children. While these reports have not been conclusive, and although the findings in such reports are disputed, the actual or perceived risk of wireless telecommunications devices to the health of users could adversely affect us through increased cancellation by existing subscribers, reduced subscriber growth, reduced usage per subscriber or litigation, and may also potentially adversely affect our corporate image, financial condition and results of operations. The perceived risk of wireless devices may have been elevated by certain wireless carriers and handset manufactures affixing labels to their handsets showing levels of electric wave emissions or warnings about possible health risks. Research and studies are ongoing and we are actively attempting to confirm the safety of wireless telecommunications, but there can be no assurance that further research and studies will not demonstrate a relation between electric wave emissions and health problems.

Furthermore, although the electric wave emissions of our cellular handsets and base stations comply with the electromagnetic safety guidelines of Japan, including guidelines regarding the specific absorption rate of electric waves, and the International Commission on Non-Ionizing Radiation Protection, the guidelines of which are regarded as an international safety standard, the Electromagnetic Compatibility Conference of Japan has confirmed that some electronic medical devices are affected by the electromagnetic interference from cellular phones as well as other portable radio transmitters. As a result, Japan has adopted a policy to restrict the use of cellular services inside medical facilities. We are working to ensure that our subscribers are aware of these restrictions when using cellular phones. There is a possibility that modifications to regulations, new regulations or restrictions could limit our ability to expand our market or our subscription base or otherwise adversely affect us.

Our parent company, Nippon Telegraph and Telephone Corporation (NTT), could exercise influence that may not be in the interests of our other shareholders.

As of March 31, 2008, NTT owned 64.8% of our outstanding voting shares. While being subject to the conditions for fair competition established by the Ministry of Posts and Telecommunications ("MPT", currently the Ministry of Internal Affairs and Communications, or "MIC") in April 1992, NTT retains the right to control our management as a majority shareholder, including the right to appoint directors. Currently, although we conduct our day-to-day operations independently of NTT and its other subsidiaries, certain important matters are discussed with, or reported to, NTT. As such, NTT could take actions that are in its best interests, which may not be in the interests of our other shareholders.

Notes to Consolidated Financial Statements

NTT DOCOMO, INC. AND SUBSIDIARIES

Nature of operations:

NTT DoCoMo, Inc. and subsidiaries (the "Company" or "DOCOMO") is a joint stock corporation that was incorporated under the laws of Japan in August 1991 as the wireless telecommunications arm of Nippon Telegraph and Telephone Corporation ("NTT"). NTT, 33.71% of which is owned by the Japanese government, owns 61.60% of DOCOMO's issued stock and 64.84% of DOCOMO's voting stock outstanding as of March 31, 2008.

DOCOMO provides its subscribers with wireless telecommunications services such as FOMA (3G wireless services), mova (2G wireless services), packet

communications services (wireless data communications services using packet switching) and satellite mobile communications services, primarily on its own nationwide networks. In addition, DOCOMO sells handsets and related equipment primarily to agent resellers who in turn sell such equipment to subscribers.

DOCOMO terminated Personal Handyphone System ("PHS") services on January 7, 2008.

2 Summary of significant accounting and reporting policies:

DOCOMO maintains its books and records and prepares its statutory financial statements in conformity with the Japanese Telecommunications Business Law and the related accounting regulations and accounting principles generally accepted in Japan, which differ in certain respects from accounting principles generally accepted in the United States of America ("U.S. GAAP").

The accompanying consolidated financial statements are prepared in accordance with U.S. GAAP and, therefore, reflect certain adjustments to DOCOMO's books and records.

(1) Adoption of a new accounting standard

Accounting for Uncertainty in Income Taxes

Effective April 1, 2007, DOCOMO applied Financial Accounting Standards Board ("FASB") Interpretation ("FIN") No. 48 "Accounting for Uncertainty in Income Taxes – an interpretation of Statement of Financial Accounting Standards ("SFAS") No. 109". FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS No. 109. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return as well as provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The initial application of FIN 48 did not have a material impact on DOCOMO's results of operations and financial position.

(2) Significant accounting policies

Principles of consolidation—

The consolidated financial statements include accounts of DOCOMO and its majority-owned subsidiaries. All significant intercompany balances and transactions are eliminated in consolidation.

DOCOMO applies FIN No. 46 (revised 2003) "Consolidation of Variable Interest Entities - an interpretation of Accounting Research Bulletin ("ARB") No. 51" ("FIN 46R"). FIN 46R addresses how a business enterprise should evaluate whether it has a controlling financial interest in an entity through means other than voting rights and accordingly should consolidate the entity. For the years ended March 31, 2006, 2007 and 2008, DOCOMO had no variable interest entities to be consolidated or disclosed.

Use of estimates—

The preparation of DOCOMO's consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. DOCOMO has identified the following areas where it believes estimates and assumptions are particularly critical to the consolidated financial statements. These are determination of useful lives of property, plant and equipment, internal use software and other intangible assets, impairment of long-lived assets, impairment of investments, realization of deferred tax assets, measurement of pension liabilities and revenue recognition.

Cash and cash equivalents—

DOCOMO considers cash in banks and short-term highly liquid investments with original maturities of 3 months or less at the date of purchase to be cash and cash equivalents.

Short-term investments—

The highly liquid investments, which have original maturities of longer than 3 months at the date of purchase and remaining maturities of 1 year or less at the end of fiscal year, are considered to be short-term investments.

Allowance for doubtful accounts—

The allowance for doubtful accounts is principally computed based on the historical bad debt experience plus the estimated uncollectible amount based on the analysis of certain individual accounts, including claims in bankruptcy.

Inventories—

Inventories are stated at the lower of cost or market. The cost of equipment sold is determined by the first-in, first-out method. Inventories consist primarily of handsets and accessories. DOCOMO evaluates its inventory for obsolescence on a periodic basis and records valuation adjustments as required. Due to the rapid technological changes associated with the wireless communications business, DOCOMO wrote down and disposed of obsolete handsets during the years ended March 31, 2006, 2007 and 2008 resulting in losses totaling ¥18,883 million, ¥21,353 million and ¥16,946 million (\$169,715 thousand),

respectively, which were included in "Cost of equipment sold" in the accompanying consolidated statements of income and comprehensive income.

Property, plant and equipment—

Property, plant and equipment are stated at cost and include interest cost incurred during construction, as discussed below in "Capitalized interest". Property, plant and equipment under capital leases are stated at the present value of minimum lease payments. Depreciation is computed by the declining-balance method at rates based on the estimated useful lives of the respective assets with the exception of buildings, which are depreciated on a straight-line basis. Useful lives are determined at the time the asset is acquired and are based on its expected use, past experience with similar assets and anticipated technological or other changes. If technological or other changes occur more or less rapidly or in a different form than anticipated or the intended use changes, the useful lives assigned to these assets are adjusted as appropriate. Property, plant and equipment held under capital leases and leasehold improvements are amortized using either the straight-line method or the declining-balance method, depending on the type of the assets, over the shorter of the lease term or estimated useful life of the asset.

The estimated useful lives of major depreciable assets are as follows:

Major wireless telecommunications equipment
Steel towers and poles for antenna equipment
Reinforced concrete buildings
Tools, furniture and fixtures

8 to 16 years
30 to 40 years
4 to 15 years

Depreciation and amortization expense for the years ended March 31, 2006, 2007 and 2008 was ¥554,158 million, ¥553,510 million, and ¥579,101 million (\$5,799,710 thousand), respectively.

When depreciable telecommunications equipment is retired or abandoned in the normal course of business, the amounts of such telecommunications equipment and its accumulated depreciation are deducted from the respective accounts. Any remaining balance is charged to expense immediately. DOCOMO accounts for legal or contractual obligations associated with the retirement of tangible long-lived assets in accordance with SFAS No. 143, "Accounting for Asset Retirement Obligations". DOCOMO's asset retirement obligations subject to SFAS No. 143 primarily relate to its obligations to restore certain leased land and buildings used for DOCOMO's wireless telecommunications equipment to their original states. DOCOMO has determined the aggregate fair values of its asset retirement obligations do not have a material impact on DOCOMO's results of operations or financial position.

Expenditures for replacements and betterments are capitalized, while expenditures for maintenance and repairs are expensed as incurred. Assets under construction are not depreciated until placed in service. The rental costs associated with ground or building operating leases that are incurred during a construction period are expensed.

Capitalized interest—

DOCOMO capitalizes interest related to the construction of property, plant and equipment over the period of construction. DOCOMO also capitalizes interest associated with the development of internal-use software. DOCOMO amortizes such capitalized interest over the estimated useful lives of the related assets.

Investments in affiliates—

The equity method of accounting is applied to investments in affiliates where DOCOMO owns an aggregate of 20% to 50% and/or is able to exercise significant influence. Under the equity method of accounting, DOCOMO records its share of earnings and losses of the affiliate and adjusts its carrying amount. For investments of less than 20%, DOCOMO periodically reviews the facts and circumstances related thereto to determine whether or not it can exercise significant influence over the operating and financial policies of the affiliate and therefore should apply the equity method of accounting. For investees accounted for under the equity method whose fiscal year ends are December 31, DOCOMO records its share of income or losses of such investees with a 3 month lag in its consolidated statements of income and comprehensive income. DOCOMO evaluates the recoverability of the carrying value of its investments in affiliates, which includes investor level goodwill, when there are indicators that a decline in value below its carrying amount may be other than temporary. In performing its evaluations, DOCOMO utilizes various information including cash flow projections, independent valuations and, as applicable, quoted market values to determine recoverable amounts and the length of time an investment's carrying value exceeds its estimated current recoverable amount. In the event of a determination that a decline in value is other than temporary, a charge to earnings is recorded for the loss, and a new cost basis in the investment is established

Marketable securities and other investments—

Marketable securities consist of debt and equity securities. DOCOMO accounts for such investments in debt and equity securities in accordance with SFAS No.115, "Accounting for Certain Investments in Debt and Equity Securities". Management determines the appropriate classification of its investment securities at the time of purchase. DOCOMO periodically reviews the carrying amounts of its marketable securities for impairments that are other than temporary. If this evaluation indicates that a decline in value is other than temporary, the security is written down to its estimated fair value. The impairment is charged to earnings and a new cost basis for the security is established. To determine whether an impairment is other than temporary, DOCOMO considers whether it has the ability and intent to hold the investment until a market price recovery and considers whether evidence indicating the cost of the investment is recoverable outweighs evidence to the contrary. Evidence considered in this assessment includes the reasons for the impairment, the severity and duration of the impairment, changes in value subsequent to year-end, forecasted performance of the investee and the general market condition in the geographic area or industry the investee operates in.

Equity securities held by DOCOMO, whose fair values are readily determinable, are classified as available-for-sale. Available-for-sale equity securities are carried at fair value with unrealized holding gains or losses, net of applicable taxes, included as a component of "Accumulated other comprehensive income" in shareholders' equity. Realized gains and losses are determined using the moving-average method and are reflected currently in earnings.

Debt securities held by DOCOMO, which DOCOMO has the positive intent and ability to hold to maturity, are classified as held-to-maturity, and the other debt securities that may be sold before maturity are classified as available-for-sale securities. Held-to-maturity debt securities are carried at amortized cost. Available-

for-sale debt securities are carried at fair value with unrealized holding gains or losses, net of applicable taxes, included as a component of "Accumulated other comprehensive income" in shareholders' equity. Realized gains and losses are determined using the first-in, first-out cost method and are reflected currently in earnings. Debt securities with original maturities of 3 months or less at the date of purchase are recorded as "Cash and cash equivalents", while those with original maturities of longer than 3 months at the date of purchase and remaining maturities of 1 year or less at the end of fiscal year are recorded as "Short-term investments" in the consolidated balance sheets.

DOCOMO did not hold or transact any trading securities during the years ended March 31, 2006, 2007 and 2008.

Other investments include equity securities, whose fair values are not readily determinable, and equity securities for which sales are restricted by contractual requirements ("restricted stock"). Equity securities whose fair values are not readily determinable and restricted stock are carried at cost. Other than temporary declines in value are charged to earnings. Realized gains and losses are determined using the average cost method and are reflected currently in earnings.

Goodwill and other intangible assets—

Goodwill is the excess of the acquisition cost of businesses over the fair value of the identifiable net assets acquired. Other intangible assets primarily consist of software for telecommunications network, internal-use software, software acquired to be used in manufacture of handsets, customer related assets and rights to use certain telecommunications facilities of wireline operators.

DOCOMO accounts for goodwill and other intangible assets in accordance with SFAS No. 142 "Goodwill and Other Intangible Assets". Accordingly, DOCOMO does not amortize either goodwill, including investor level goodwill related to the investments accounted for under the equity method, or other intangible assets acquired in a purchase business combination and determined to have an indefinite useful life. However, (1) goodwill, except those related to equity method investments, and (2) other intangible assets that have indefinite useful lives are tested for impairment at least annually. Intangible assets that have finite useful lives, consisting primarily of software for telecommunications network, internal-use software, software acquired to be used in manufacture of handsets, customer related assets and rights to use telecommunications facilities of wireline operators are amortized on a straight-line basis over their useful lives.

Goodwill related to equity method investments is tested for impairment as a part of the other than temporary impairment assessment of the equity method investment as a whole in accordance with Accounting Principles Board Opinion No. 18, "The Equity Method of Accounting for Investments in Common Stock".

DOCOMO capitalizes the cost of internal-use software which has a useful life in excess of 1 year in accordance with American Institute of Certified Public Accountants (AICPA) Statement of Position 98-1 "Accounting for the Costs of Computer Software Developed or Obtained for Internal Use". Subsequent costs for additions, modifications or upgrades to internal-use software are capitalized only to the extent that the software is able to perform a task it previously did not perform. Software acquired to be used in the manufacture of handsets is capitalized if the technological feasibility of the handset to be ultimately marketed has been established at the time of purchase in accordance with SFAS No. 86 "Accounting for the Costs of Computer Software to Be

Sold, Leased, or Otherwise Marketed". Software maintenance and training costs are expensed in the period in which they are incurred. Capitalized software costs are being amortized over a period of 5 years at maximum.

Customer related assets principally consist of contractual customer relationships in the mobile phone business that were recorded in connection with the acquisition of minority interests of the regional subsidiaries in November 2002 through the process of identifying separable intangible assets apart from goodwill. The customer related assets are amortized over 6 years, which is the expected term of subscription in mobile phone business.

Amounts capitalized related to rights to use certain telecommunications assets of wireline operators, primarily NTT, are amortized over 20 years.

Impairment of long-lived assets—

DOCOMO's long-lived assets other than goodwill, such as property, plant and equipment, software and intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable in accordance with SFAS No. 144 "Accounting for the Impairment or Disposal of Long-Lived Assets". Recoverability of assets to be held for use is evaluated by a comparison of the carrying amount of the asset with future undiscounted cash flows expected to be generated by the asset or asset group. If the asset (or asset group) is determined to be impaired, the loss recognized is the amount by which the carrying value of the asset (or asset group) exceeds its fair value as measured through various valuation techniques, including discounted cash flow models, quoted market value and third-party independent appraisals, as considered necessary.

Hedging activities—

DOCOMO uses derivative financial instruments including interest rate swap, foreign currency swap and foreign exchange forward contracts and other non-derivative financial instruments in order to manage its exposure to fluctuations in interest rates and foreign exchange rates. DOCOMO does not hold or issue derivative financial instruments for trading purposes.

These financial instruments are effective in meeting the risk reduction objectives of DOCOMO by generating either transaction gains and losses which offset transaction gains and losses of the hedged items or cash flows which offset the cash flows related to the underlying position in respect of amount and timing.

DOCOMO accounts for derivative financial instruments and other hedging activities in accordance with SFAS No. 133 "Accounting for Derivative Instruments and Hedging Activities", as amended by SFAS No. 138, No. 149 and No. 155. All derivative instruments are recorded on the consolidated balance sheets at fair value. The recorded fair values of derivative instruments represent the amounts that DOCOMO would receive or pay to terminate the contracts at each fiscal year end.

For derivative financial instruments that qualify as fair value hedge instruments, the changes in fair value of the derivative instruments are recognized currently in earnings, which offset the changes in fair value of the related hedged assets or liabilities that are also recognized in earnings of the period.

For derivative financial instruments that qualify as cash flow hedge instruments, the changes in fair value of the derivative instruments are initially recorded in "Accumulated other comprehensive income" and reclassified into earnings when the relevant hedged transaction is realized.

For derivative financial instruments that do not qualify as hedging instruments, the changes in fair value of the derivative instruments are recognized currently in earnings.

DOCOMO discontinues hedge accounting when it is determined that the derivative or non-derivative instrument is no longer highly effective as a hedge or when DOCOMO decides to discontinue the hedging relationship.

Cash flows from derivative instruments are classified in the consolidated statements of cash flows under the same categories as the cash flows from the relevant assets, liabilities or anticipated transactions.

Employees' retirement benefit plans-

Effective March 31, 2007, in accordance with SFAS No. 158 "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans - an amendment of SFAS No. 87, 88, 106, and 132R", DOCOMO recognizes the funded status of its benefit plan, measured as the difference between the plan assets at fair value and the benefit obligation, in the consolidated balance sheets. Changes in the funded status are recognized as changes in comprehensive income (loss) during the fiscal period in which such changes occur.

Pension benefits earned during the year as well as interest on projected benefit obligations are accrued currently. Prior service cost and net losses in excess of 10% of the greater of the projected benefit obligation or the fair value of plan assets, both of which are included in "Accumulated other comprehensive income", are amortized over the expected average remaining service period of employees on a straight-line basis.

Revenue recognition—

DOCOMO primarily generates revenues from two sources—wireless services and equipment sales. These revenue sources are separate and distinct earnings processes. Wireless service is sold to the subscriber directly or through third-party resellers who act as agents, while equipment, including handsets, are sold principally to agent resellers.

DOCOMO sets its wireless services rates in accordance with the Japanese Telecommunications Business Law and government guidelines, which currently allow wireless telecommunications operators to set their own tariffs without government approval. Wireless service revenues primarily consist of basic monthly charges, airtime charges and fees for activation.

Basic monthly charges and airtime charges are recognized as revenues as service is provided to the subscribers. DOCOMO's monthly billing plans for cellular (FOMA and mova) services generally include a certain amount of allowances (free minutes and/or packets), and the used amount of the allowances is subtracted from total usage in calculating the airtime revenue from a subscriber for the month. DOCOMO introduced a billing arrangement, called "Nikagetsu Kurikoshi" (2 month carry-over), in which the unused allowances are automatically carried over up to the following 2 months. In addition, DOCOMO then introduced an arrangement which enables the unused allowances that were carried over for

2 months to be automatically used to cover the airtime and/or packet fees exceeding the allowances of the other subscriptions in the "Family Discount" group, a discount billing arrangement for families with between 2 and 10 DOCOMO subscriptions. Until the year ended March 31, 2006, DOCOMO had deferred all the revenues based on the portion of unused allowances at the end of the period. The deferred revenues had been recognized as revenues as the subscribers make calls or data transmissions, similar to the way airtime revenues are recognized, or as allowance expires. As DOCOMO developed sufficient empirical evidence to reasonably estimate the portion of allowance that will be forfeited as unused, effective April 1, 2006, DOCOMO started to recognize the revenue attributable to such allowance ratably as the remaining allowances are utilized, in addition to the revenue recognized when subscribers make calls or utilize data transmissions. The effect of this accounting change was not material for DOCOMO's results of operations or financial position.

Equipment sales are recognized as revenues when equipment is accepted by the agent resellers and all inventory risk is transferred from DOCOMO. Certain commissions paid to agent resellers are recognized as a reduction of revenue upon delivery of the equipment to such agent resellers in accordance with Emerging Issues Task Force ("EITF") Issue No. 01-9 "Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products)".

Effective November 2007, DOCOMO introduced a new handset sales scheme which enables subscribers to select installment payments over a period of 12 or 24 months. When installment payments are selected, under agreements entered into among DOCOMO, subscribers and agent resellers, DOCOMO provides financing by providing funds for the purchase of the handset by the subscribers. DOCOMO then includes current installments for the receivable for purchased handset with basic monthly charges and airtime charges for the installment payment term. Because equipment sales are recognized upon delivery of handsets to agent resellers, the advance payment for the purchased handset to agent resellers and subsequent cash collection of the installment receivable for the purchased handset from subscribers do not have an impact on our equipment sales. The portion of installment receivable for the purchased handset which was expected to be collected within 1 year or less as of the date of the consolidated balance sheets was recorded as "Accounts receivable" and the other portion of installment receivable was recorded as "Other assets" in the consolidated balance sheets, respectively. The aggregate carrying amount of the installment receivable for handsets, which was recorded as "Accounts receivable" and "Other assets" as of March 31, 2008 was ¥111,789 million (\$1,119,569 thousand) and ¥59,036 million (\$591,247 thousand), respectively.

Non-recurring upfront fees such as activation fees are deferred and recognized as revenues over the estimated average period of the subscription for each service. The related direct costs are also deferred to the extent of the related upfront fee amount and are amortized over the same period.

Thousands of

Deferred revenue and deferred charges as of March 31, 2007 and 2008 comprised the following:

| | | i i i i u sa i i u s u i | |
|----------------------------|----------|--------------------------|-------------|
| | Million | Millions of yen | |
| | 2007 | 2008 | 2008 |
| Current deferred revenue | ¥105,506 | ¥106,348 | \$1,065,078 |
| Long-term deferred revenue | 76,499 | 76,654 | 767,692 |
| Current deferred charges | 35,142 | 27,031 | 270,716 |
| Long-term deferred charges | 76,499 | 76,654 | 767,692 |

Current deferred revenue is included in "Other current liabilities" in the consolidated balance sheets.

Selling, general and administrative expenses—

Selling, general and administrative expenses primarily include commissions paid to sales agents, expenses associated with DOCOMO's customer loyalty programs, advertising expenses, as well as other expenses such as payroll and related benefit costs of personnel not directly involved in the operations and maintenance process. Commissions paid to sales agents represent the largest portion of selling, general and administrative expenses.

Income taxes—

Income taxes are accounted for in accordance with SFAS No. 109, "Accounting for Income Taxes". Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and operating loss and tax credit carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Earnings per share—

Basic earnings per share include no dilution and are computed by dividing income available to common shareholders by the weighted average number of shares of common stock outstanding for the period. Diluted earnings per share assume the dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock. DOCOMO has no dilutive securities outstanding for the year ended March 31, 2006, 2007 and 2008, and therefore there is no difference between basic and diluted earnings per share.

Foreign currency translation—

All asset and liability accounts of foreign subsidiaries and affiliates are translated into Japanese yen at appropriate year-end current rates and all income and expense accounts are translated at rates that approximate those rates prevailing at the time of the transactions. The accompanying translation adjustments are included in "Accumulated other comprehensive income."

Foreign currency receivables and payables of DOCOMO are translated at appropriate year-end current rates and the accompanying translation gains or losses are included in earnings currently.

The effects of exchange rate fluctuations from the initial transaction date to the settlement date are recorded as exchange gain or loss, which are included in "Other income (expense)" in the accompanying consolidated statements of income and comprehensive income.

(3) Recent accounting pronouncements—

In September 2006, FASB issued SFAS No. 157 "Fair Value Measurements". SFAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. Although the definition of fair value retains the exchange price notion in earlier definitions of fair value, SFAS No. 157 clarifies that the exchange price is the price in an orderly transaction between market participants to sell the asset or transfer the liability in the market and emphasizes that fair value is a market-based measurement, rather than an entity-specific measurement. SFAS No. 157 also expands disclosures about the use of fair value to measure assets and liabilities subsequent to initial recognition through fair value hierarchy as a framework for measurement. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. DOCOMO currently estimates that the impact of adoption of SFAS No. 157 on its result of operations and financial position will be immaterial.

In February 2007, FASB issued SFAS No. 159 "The Fair Value Option for Financial Assets and Financial Liabilities - Including an amendment of SFAS No. 115". SFAS No. 159 gives entities the irrevocable option to measure most financial assets and liabilities at fair value that are not currently required to be measured at fair value. Subsequent changes in fair value for designated items will be required to be reported in earnings in the current period. SFAS No. 159 also establishes presentation and disclosure requirements for similar types of assets and liabilities measured at fair value. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. DOCOMO did not elect the fair value option as of the beginning of the fiscal year ending March 31, 2009.

In December 2007, FASB issued SFAS No. 141 (revised 2007) "Business Combinations" ("SFAS No. 141R"). SFAS No. 141R requires an acquirer in a business combination to generally recognize and measure all the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at their fair values as of acquisition date. SFAS No. 141R also requires the acquirer to recognize and measure as goodwill the excess of consideration transferred plus the fair value of any noncontrolling interest in the acquiree at acquisition date over the fair value of the identifiable net assets acquired. The excess of the fair value of the identifiable net assets acquired over consideration transferred plus the fair

value of any noncontrolling interest in the acquiree at acquisition date is required to be recognized and measured as a gain from a bargain purchase. SFAS No. 141R is effective for business combination transactions for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The impact of the adoption of SFAS No. 141R will depend on future business combinations transactions.

In December 2007, FASB issued SFAS No. 160 "Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No.51". SFAS No. 160 requires noncontrolling interest held by parties other than the parent be clearly identified, labeled and presented in the consolidated statement of financial position within equity, but separate from the parent's equity. SFAS No. 160 also requires changes in parent's ownership interest while the parent retains its controlling financial interest in its subsidiary be accounted as equity transactions. SFAS No. 160 is effective for fiscal years beginning on or after December 15, 2008 and interim periods within those years. DOCOMO currently estimates that the impact of the adoption of SFAS No. 160 on its result of operations and financial position will be immaterial.

In March 2008, FASB issued SFAS No. 161 "Disclosures about Derivative Instruments and Hedging Activities – an amendment of SFAS No. 133." SFAS No. 161 requires entities with derivative instruments to disclose information that should enable financial statement users to understand how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS No. 133, and how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. SFAS No. 161 is effective for fiscal years and interim periods beginning after November 15, 2008. DOCOMO is currently evaluating the impact of adoption of SFAS No. 161 on its results of operations and financial position.

(4) Reclassifications—

Certain reclassifications are made to the prior years' consolidated financial statements to conform to the presentation used for the year ended March 31, 2008.

5 Convenient translations:

The consolidated financial statements are stated in Japanese yen. Translations of the Japanese yen amounts into U.S. dollars are included solely for the convenience of readers by applying the noon buying rate in New York City for cable transfers in foreign currencies as certified for customs purposes by the Federal Reserve Bank of New York on March 31, 2008, which was ¥99.85 to U.S. \$1. The convenience translations should not be construed as representations that the Japanese yen amounts have been, could have been, or could in the future be, converted into U.S. dollars at this or any other rate of exchange.

4 Cash and cash equivalents:

Cash and cash equivalents as of March 31, 2007 and 2008 comprised the following:

| | | | Thousands of U.S. dollars |
|--------------------------|----------|-----------------|------------------------------|
| | Million | Millions of yen | |
| | 2007 | 2008 | 2008 |
| Cash | ¥173,067 | ¥306,905 | \$3,073,661 |
| Certificates of deposit | 150,000 | 280,000 | 2,804,206 |
| Bailment for consumption | | 50,000 | 500,751 |
| Other | 19,995 | 10,000 | 100,150 |
| Total | ¥343,062 | ¥646,905 | \$6,478,768 |

Information regarding "Bailment for consumption" is disclosed in Note 14.

5 Inventories:

Inventories as of March 31, 2007 and 2008 comprised the following:

| | | | Thousands of |
|---|----------|--------------|--------------|
| | Million | U.S. dollars | |
| | 2007 | 2008 | 2008 |
| Telecommunications equipment to be sold | ¥144,292 | ¥145,086 | \$1,453,039 |
| Materials and supplies | 306 | 306 | 3,065 |
| Other | 1,294 | 1,192 | 11,938 |
| Total | ¥145,892 | ¥146,584 | \$1,468,042 |

6 Investments in affiliates:

Hutchison 3G UK Holdings Limited-

On May 27, 2004, DOCOMO agreed to sell its entire shareholding in Hutchison 3G UK Holdings Limited ("H3G UK") to Hutchison Whampoa Limited ("HWL") for a total consideration of £120 million in a Sale and Purchase Agreement signed between DOCOMO and HWL. Under the terms of the agreement, DOCOMO were to receive payment in three installments, the final installment of which was expected to be made in December 2006, either in cash or in shares of Hutchison Telecommunications International Limited ("HTIL"), a subsidiary company of HWL. As a result of the agreement, DOCOMO waived certain of its minority shareholder's rights, including voting rights and supervisory board representation. As DOCOMO no longer had the ability to exercise significant influence over H3G UK, DOCOMO ceased to account for its investment in H3G UK applying the equity method.

On October 15, 2004, DOCOMO received 187,966,653 shares of HTIL (equivalent to £80 million) as the first installment payment by HWL, which was reported as "Marketable securities and other investments", with a corresponding amount recorded as "Other long-term liabilities" until such time that the transfer of H3G UK shares was completed. On May 9, 2005, DOCOMO received a notice from HWL that HWL intended to exercise its right to accelerate completion of the payment on June 23, 2005. Consequently, DOCOMO received £120 million in cash, and transferred the entire shareholding in HTIL to HWL. As a result of the transaction, DOCOMO recorded "Gain on sale of affiliate shares" of ¥61,962 million, including reclassification of foreign currency translation of ¥38,174 million, in the consolidated statement of income and comprehensive income for the year ended March 31, 2006.

Sumitomo Mitsui Card Co., Ltd.—

DOCOMO held 34% of outstanding common shares, which were acquired for ¥98,713 million, of Sumitomo Mitsui Card Co., Ltd. ("Sumitomo Mitsui Card") and accounted for the investment by the equity method as of March 31, 2007 and 2008. DOCOMO entered into an agreement with Sumitomo Mitsui Card, Sumitomo Mitsui Financial Group, Inc. and Sumitomo Mitsui Banking Corporation that DOCOMO and these companies would jointly promote the new credit transaction services which use mobile phones compatible with "Osaifu-Keitai" (wallet-phone) service and that DOCOMO would form a capital alliance with Sumitomo Mitsui Card.

Philippine Long Distance Telephone Company—

As of March 31, 2008, DOCOMO held approximately 14% of outstanding common shares, which were acquired for ¥151,156 million, of Philippine Long Distance Telephone Company (PLDT), a telecommunication operator in the Philippines. PLDT is a public company listed on the Philippine Stock Exchange and the New York Stock Exchange. On March 14, 2006, DOCOMO acquired

approximately 7% of PLDT's outstanding common shares for ¥52,213 million from NTT Communications Corporation ("NTT Com"), a subsidiary of NTT and accounted for the investment under the cost method. From March 2007 to February 2008, DOCOMO additionally acquired approximately 7% of equity interest and outstanding common shares of PLDT for ¥98,943 million (\$990,916 thousand) in the market. Together with the PLDT common shares continued to be held by NTT Com, on a consolidated basis NTT held approximately 21% of the total outstanding common shares of PLDT.

In accordance with the agreement entered into between PLDT and its major shareholders, including NTT Com and DOCOMO, DOCOMO has the right to exercise the entire 21% voting rights associated with the ownership interest collectively held by DOCOMO and NTT Com. As DOCOMO obtained the ability to exercise significant influence over PLDT, DOCOMO has reclassified PLDT as an affiliate and accounted for the investment by applying the equity method during the year ended March 31, 2008. The prior period financial statements have not been retroactively adjusted because the impact of retroactively adjusting the investment, results of operations and net equity of DOCOMO to reflect the application of the equity method accounting is not material to the prior or current period financial statements presented. DOCOMO is currently in the process of evaluation of fair value of tangible, intangible and other assets and liabilities of PLDT with an independent third party appraiser in order to recognize and account for DOCOMO's share of identifiable intangible assets and embedded goodwill of its investment in equity in PLDT. The purchase price allocation is preliminary and will be complete within the year ending March 31, 2009. The carrying amount of our investment in PLDT and the amount of "Equity in net income (loss) of affiliates" may be adjusted upon the completion of the evaluation. DOCOMO's carrying amount of its investment in PLDT was ¥165,099 million (\$1,653,470 thousand) as of March 31, 2008 and the aggregate market price of the PLDT shares owned by DOCOMO was ¥180,014 million (\$1,802,844 thousand).

Impairment—

DOCOMO evaluates the recoverability of the carrying value of its investments in affiliates when there are indications that a decline in value below carrying amount may be other than temporary. As a result of such evaluations, DOCOMO determined that there was no other than temporary declines in the values of its investee affiliates during the year ended March 31, 2006. During the year ended March 31, 2007 and 2008, DOCOMO recorded impairment charges for other than temporary declines in the values in certain investee affiliates that were immaterial in amount. The impairment charges are included in "Equity in net income (losses) of affiliates" in the accompanying statement of income and comprehensive income. DOCOMO believes the estimated fair values of its investments in affiliates as of March 31, 2008 to equal or exceed the related carrying values.

Annual Report 2008 97

All of the investments except PLDT, which are accounted for on the equity method, are privately held companies as of March 31, 2008.

DOCOMO's share of undistributed earnings of affiliates included in consolidated retained earnings was ¥3,363 million, ¥4,239 million and ¥8,469 million (\$84,817 thousand) as of March 31, 2006, 2007 and 2008, respectively. Dividends received from affiliates were ¥1,034 million, ¥1,258 million and ¥15,349 million (\$153,721 thousand) for the years ended March 31, 2006, 2007 and 2008, respectively. DOCOMO does not have significant business transactions with its affiliates.

The total carrying value of DOCOMO's investments in affiliates in the accompanying consolidated balance sheets as of March 31, 2007 and 2008 was greater by ¥86,183 million and ¥216,024 million (\$2,163,485 thousand), respectively than its aggregate underlying equity in net assets of such affiliates as of the date of the most recent available financial statements of the investees.

Marketable securities and other investments:

"Marketable securities and other investments" as of March 31, 2007 and 2008 comprised the following:

| Millions of yen | | U.S. dollars |

| Debt securities | | 50 0 | _ | 50 | |

The proceeds and gross realized gains (losses) from the sale of available-for-sale securities and other investments for the years ended March 31, 2006, 2007 and 2008 were as follows:

| | | Millions of yen | | |
|-----------------------|---------|-----------------|------|---------|
| | 2006 | 2007 | 2008 | 2008 |
| Proceeds | ¥14,902 | ¥ 448 | ¥896 | \$8,973 |
| Gross realized gains | 40,454 | 314 | 748 | 7,491 |
| Gross realized losses | _ | (118) | (2) | (20) |

On October 24, 2005, DOCOMO dissolved its capital alliance with KPN Mobile N.V. ("KPN Mobile"). DOCOMO transferred all of its 2.16% holding of KPN Mobile shares to Koninklijke KPN N.V. ("KPN"), the parent company of KPN Mobile. KPN agreed to cooperate with DOCOMO in the smooth operation of the global i-mode alliance, through the use of KPN's i-mode-related patents and know-how, and paid cash of €5 million (equivalent to ¥692 million) to DOCOMO.

As a result of the agreement, DOCOMO recognized a gain on the transfer of these KPN Mobile shares of ¥40,030 million, which included the reclassification of related foreign currency translation gains of ¥25,635 million,

in the consolidated statement of income and comprehensive income under the line item "Gain (loss) on sale of other investments" for the year ended March 31, 2006. DOCOMO also recognized a non-cash expense of ¥14,062 million in the consolidated statement of income and comprehensive income under the line item "Selling, general and administrative" and in the consolidated statement of cash flows under the line item "Expense associated with sale of other investments" at that time for the excess of the then fair value of KPN Mobile shares transferred over the actual cash received, which DOCOMO regarded as the consideration for the benefits from the arrangement, for the year ended March 31, 2006.

Gross unrealized holding losses on and fair value of available-for-sale securities and cost method investments included in other investments as of March 31, 2007 and 2008, aggregated by investment category and length of time during which individual securities were in a continuous unrealized loss position were as follows:

| Millions of yen | | | | | | | | |
|---|---------------------------|--|--|--|---|--|--|--|

| Equity securities | \$978,858 | \$201,523 | \$27,872 | \$16,845 | \$1,006,730 | \$218,368 | |
| Debt securities | _ | _ | _ | _ | _ | _ | |
| Cost method investments | 70 | 201 | 1,843 | 1,622 | 1,913 | 1,823 | |

Other investments include long-term investments in various privately held companies and restricted stock.

For long-term investments in various privately held companies for which there are no quoted market prices, the reasonable estimate of fair value could not be made without incurring excessive costs. DOCOMO believes that it is not practicable to estimate reasonable fair value. Accordingly, these investments are carried at cost.

Restricted stock, for which sales are restricted by contractual requirements with third parties, was accounted for as cost method investments, while the marketable equity securities for which sales are restricted for remaining terms of 1 year or less were accounted for as available-for-sale securities.

Shares of PLDT, which were accounted for as restricted stock of ¥59,734 million as of March 31, 2007, were accounted for by the equity method and recorded as "Investments in affiliates" in the consolidated balance sheets as of March 31, 2008. The prior period financial statements have not been retroactively adjusted because the impact of retroactively adjusting the investment, results of operations and net equity of DOCOMO to reflect the application of the equity method accounting is not material to the prior or current period financial statements presented.

Thousands of

The aggregate carrying amount of restricted stock as of March 31, 2007 and 2008 was as follows:

| | Million | s of yen | Thousands of U.S. dollars |
|------------------|---------|----------|---------------------------|
| | 2007 | 2008 | 2008 |
| Restricted stock | ¥68,658 | _ | _ |

DOCOMO believes that it was not practicable to estimate reasonable fair values for investments in such restricted stock, which has quoted market prices, due to the difficulty in taking into consideration the restriction of sales by contract in valuation.

The aggregate market price of the equivalent amount of unrestricted stock as of March 31, 2007 and 2008 was as follows:

| | Millions of yen | | U.S. dollars |
|---|-----------------|------|--------------|
| | 2007 | 2008 | 2008 |
| Aggregate market price of the equivalent amount of unrestricted stock | ¥96,680 | _ | _ |

The aggregate carrying amount of cost method investments included in other investments and the aggregate carrying amount of investments whose fair values were not evaluated for impairment, as their fair value was not available and it did not identify any events or changes in circumstances that may have had a significant adverse effect on the fair value of these investments as of March 31, 2007 and 2008 was as follows:

| | | | Thousands of |
|--|---------|-----------------|--------------|
| | Million | Millions of yen | |
| | 2007 | 2008 | 2008 |
| Cost method investments included in other investments | ¥92,818 | ¥29,209 | \$292,529 |
| Including: Investments whose fair values were not evaluated for impairment | 86,119 | 26,383 | 264,226 |

Because of its excessive costs, DOCOMO believed that it was not practicable to estimate fair value of investments whose fair values were not evaluated for impairment.

The amount of other than temporary impairment of marketable securities and other investments is disclosed in Note 13.

8 Goodwill and other intangible assets:

Goodwill—

Majority of DOCOMO's goodwill was recognized when DOCOMO purchased all the remaining minority interests in its eight regional subsidiaries through share exchanges and made these subsidiaries wholly owned in November 2002.

The changes in the carrying amount of goodwill by business segment for the years ended March 31, 2007 and 2008 were as follows:

| | | Millions of yen | | |
|---|--------------|-----------------|--------------|--|
| | | 2007 | | |

| Foreign currency translation adjustment | (275) | (319) | (594) |
| Balance at end of year | ¥139,890 | ¥18,999 | ¥158,889 |

| | Thousands of U.S. dollars | | |
|---|---------------------------|-----------------------------|--------------|
| | | 2008 | |
| | Mobile phone business | Miscellaneous businesses | Consolidated |
| Balance at beginning of year | \$1,403,756 | \$ 76,675 | \$1,480,431 |
| Goodwill acquired during the year | | 116,795 | 116,795 |
| Foreign currency translation adjustment | (2,754) | (3,195) | (5,949) |
| Balance at end of year | \$1,401,002 | \$190,275 | \$1,591,277 |

Information regarding business segments is discussed in Note 15.

Other intangible assets—

The following tables display the major components of DOCOMO's intangible assets, all of which are subject to amortization, as of March 31, 2007 and 2008.

| | Willions of yen | | |
|--------------------------|---|---|--|
| 2007 | | | |
| Gross carrying amount | Accumulated amortization | Net carrying amount | |

| Other | 113,170 | 28,803 | 84,367 | |
| Total | \$16,733,691 | \$11,172,760 | \$5,560,931 | |

The amount of amortizable intangible assets acquired during the year ended March 31, 2008 was ¥200,966 million (\$2,012,679 thousand), main components of which were software for telecommunications network in amount of ¥82,365 million (\$824,887 thousand) and internal-use software in amount of ¥102,825 million (\$1,029,795 thousand). The weighted-average amortization period of such software for telecommunications network and internal-use software is 5.0 years and 4.8 years, respectively. Amortization of

intangible assets for the years ended March 31, 2006, 2007 and 2008 was ¥183,979 million, ¥191,828 million and ¥197,324 million (\$1,976,204 thousand), respectively. Estimated amortization of intangible assets for fiscal years ending March 31, 2009, 2010, 2011, 2012 and 2013 is ¥184,278 million, ¥143,860 million, ¥107,695 million, ¥64,907 million, and ¥23,340 million, respectively. The weighted-average amortization period of the intangible assets acquired during the year ended March 31, 2008 is 5.1 years.

Millions of you

9 Other assets:

Other assets as of March 31, 2007 and 2008 were summarized as follows:

| | Millions of yen | | Thousands of U.S. dollars |
|--|-----------------|----------|---------------------------|
| | 2007 | 2008 | 2008 |
| Deposits | ¥ 73,504 | ¥ 74,672 | \$ 747,841 |
| Deferred customer activation costs | 76,499 | 76,654 | 767,692 |
| Long-term bailment for consumption to a related party | 50,000 | _ | _ |
| Installment receivables for handsets (non-current), net of allowance for doubtful accounts | | | |
| of ¥1,464 (\$14,662 thousand) in 2008 | _ | 57,572 | 576,585 |
| Other | 19,268 | 25,149 | 251,868 |
| Total | ¥219,271 | ¥234,047 | \$2,343,986 |

Information regarding "Long-term bailment for consumption to a related party" is disclosed in Note 14. Information regarding installment receivables for handsets is disclosed in Note 2 "Revenue recognition".

10 Short-term borrowings and long-term debt:

DOCOMO's debt obligations are denominated in Japanese yen, U.S. dollars and Singapore dollars.

Short-term borrowings, excluding the current portion of long-term debt as of March 31, 2007 and 2008 comprised the following:

| | Millions of yen | | Thousands of U.S. dollars | |
|---|-----------------|--------|------------------------------|--|
| | 2007 | 2008 | 2008 | |
| Short-term borrowings denominated in Japanese Yen: | | | | |
| Unsecured short-term loans from financial institutions | ¥102 | _ | _ | |
| (Year ended March 31, 2007 - weighted-average interest of 1.3% per annum) | | | | |
| Short-term borrowings denominated in U.S. dollars: | | | | |
| Unsecured short-term loans from financial institutions | _ | ¥1,712 | \$17,146 | |
| (Year ended March 31, 2008 - weighted-average interest of 6.3% per annum) | | | | |
| Total short-term borrowings | ¥102 | ¥1,712 | \$17,146 | |

Long-term debt as of March 31, 2007 and 2008 comprised the following:

| | Millions of yen | | Thousands of U.S. dollars | |
|---|-----------------|----------|---------------------------|--|
| | 2007 | 2008 | 2008 | |
| Debt denominated in Japanese Yen: | | | | |
| Unsecured corporate bonds | ¥ 477,058 | ¥381,511 | \$3,820,841 | |
| (Year ended March 31, 2007 - interest rates per annum : 0.7%-1.6%, due : 2008-2012) | | | | |
| (Year ended March 31, 2008 - interest rates per annum : 1.0%-1.6%, due : 2009-2012) | | | | |
| Unsecured indebtedness to financial institutions | 114,000 | 93,055 | 931,948 | |
| (Year ended March 31, 2007 - interest rates per annum : 0.8%-1.5%, due : 2008-2013) | | | | |
| (Year ended March 31, 2008 - interest rates per annum : 0.8%-2.5%, due : 2009-2013) | | | | |
| Debt denominated in U.S. dollars: | | | | |
| Unsecured corporate bonds | 11,805 | _ | _ | |
| (Year ended March 31, 2007 - interest rate per annum : 3.5%, due : 2008) | | | | |
| Unsecured indebtedness to financial institutions | _ | 1,712 | 17,146 | |
| (Year ended March 31, 2008 - interest rate per annum : 6.4%, due : 2013) | | | | |
| Debt denominated in Singapore dollars: | | | | |
| Unsecured indebtedness to financial institutions | _ | 474 | 4,747 | |
| (Year ended March 31, 2008 - interest rate per annum : 4.7%, due : 2012) | | | | |
| Sub-total | ¥ 602,863 | ¥476,752 | \$4,774,682 | |
| Less: Current portion | (131,005) | (75,662) | (757,757) | |
| Total long-term debt | ¥ 471,858 | ¥401,090 | \$4,016,925 | |

Interest rates on DOCOMO's borrowings are mainly fixed. DOCOMO uses interest rate swap transactions, under which DOCOMO receives fixed rate interest payments and pays floating rate interest payments, to hedge the changes in fair value of certain debt as a part of its asset-liability management (ALM). Information relating to interest rate swap contracts is disclosed in Note 19. Interest costs related specifically to short-term borrowings and long-term debt for the years ended March 31, 2006, 2007 and 2008 totaled ¥8,065 million, ¥5,453 million and ¥5,882 million (\$58,908 thousand), respectively.

DOCOMO filed a shelf registration for issuance of up to ¥1,000,000 million of domestic corporate bonds in Japan during a 2-year period started April 3, 2006. DOCOMO did not issue any domestic corporate bonds under this registration.

DOCOMO also filed a shelf registration for issuance of up to $\pm 1,000,000$ million of domestic corporate bonds in Japan during a 2-year period started April 3, 2008.

On June 11, 2008, DOCOMO issued domestic corporate straight bonds as follows:

Series 15 NTT DOCOMO Unsecured Straight Bonds

| Date of payment | June 11, 2008 |
|------------------|--|
| Issue amount | ¥80,000 million (\$801,202 thousand) |
| Issue price | ¥99.93 per ¥100 |
| Interest rate | 1.96% per annum |
| Date of maturity | June 20, 2018 |
| Use of proceeds | Repayment of outstanding debt, Redemption of |
| | outstanding corporate bonds, Capital expenditures, |
| | Investments, Loans, and Working capital |
| | |

The amount of unused portion of a shelf registration after the issuance was ¥920,000 million.

The aggregate amounts of annual maturities of long-term debt as of March 31, 2008, before consideration of the subsequent issuance of domestic corporate bonds were as follows:

| Year ending March 31, | Millions of yen | Thousands of U.S. dollars |
|-----------------------|-----------------|---------------------------|
| 2009 | ¥ 75,662 | \$ 757,756 |
| 2010 | 29,018 | 290,616 |
| 2011 | 180,864 | 1,811,357 |
| 2012 | 174,781 | 1,750,436 |
| 2013 | 16,427 | 164,517 |
| Thereafter | _ | _ |
| Total | ¥476,752 | \$4,774,682 |

11 Shareholders' equity:

Effective May 1, 2006, the Corporate Law of Japan provides that (i) dividends of earnings require approval at a general meeting of shareholders, (ii) interim cash dividends can be distributed upon the approval of the board of directors, if the Articles of Incorporation provide for such interim cash dividends and (iii) an amount equal to at least 10% of decrease in retained earnings by dividends payment be appropriated from retained earnings to a legal reserve up to 25% of capital stock. The legal reserve is available for distribution upon approval of the shareholders.

The distributable amount available for the payments of dividends to shareholders as of March 31, 2008 was \$1,277,120 million (\$12,790,386 thousand) and was included in "Additional paid-in capital" and "Retained earnings".

In the general meeting of shareholders held on June 20, 2008, the shareholders approved cash dividends of ¥102,307 million or ¥2,400 per share, payable to shareholders recorded as of March 31, 2008, which were declared by the board of directors on April 25, 2008.

Issued shares and treasury stock—

The changes in the number of issued shares and treasury stock for the years ended March 31, 2006, 2007 and 2008 are summarized as follows, where fractional shares are rounded off:

| | Number of | Number of |
|--|---------------|----------------|
| | issued shares | treasury stock |
| As of March 31, 2005 | 48,700,000 | 2,427,792 |
| Acquisition of treasury stock based on the resolution by the general meeting of shareholders | _ | 1,797,977 |
| Acquisition of fractional shares | _ | 4 |
| Retirement of treasury stock | (1,890,000) | (1,890,000) |
| As of March 31, 2006 | 46,810,000 | 2,335,773 |
| Acquisition of treasury stock based on the resolution by the general meeting of shareholders | _ | 880,578 |
| Acquisition of fractional shares | _ | 5 |
| Retirement of treasury stock | (930,000) | (930,000) |
| As of March 31, 2007 | 45,880,000 | 2,286,356 |
| Acquisition of treasury stock based on the resolution by the general meeting of shareholders | _ | 965,666 |
| Acquisition of fractional shares | _ | 51 |
| Retirement of treasury stock | (1,010,000) | (1,010,000) |
| As of March 31, 2008 | 44,870,000 | 2,242,073 |

DOCOMO had no issued shares other than share of its common stock.

In order to improve capital efficiency and to implement flexible capital policies in accordance with the business environment, the general meetings of shareholders approved stock repurchase plans as follows:

| Date of the general meeting of shareholders | Term of repurchase | Approved maximum number of treasury stock to be repurchased (Shares) | Approved maximum budget for share repurchase (Millions of yen) |
|---|-------------------------------|--|--|
| June 18, 2004 | June 18, 2004 - June 21, 2005 | 2,500,000 | ¥600,000 |
| June 21, 2005 | June 21, 2005 - June 20, 2006 | 2,200,000 | 400,000 |
| June 20, 2006 | June 20, 2006 - June 19, 2007 | 1,400,000 | 250,000 |
| June 19, 2007 | June 20, 2007 - June 19, 2008 | 1,000,000 | 200,000 |
| June 20, 2008 | June 21, 2008 - June 20, 2009 | 900,000 | 150,000 |

Aggregate number and price of shares repurchased for the year ended March 31, 2006, 2007 and 2008 were as follows:

| Year ended March 31, | Shares | Millions of yen |
|----------------------|-----------|---------------------------|
| 2006 | 1,797,981 | ¥300,078 |
| 2007 | 880,583 | 157,223 |
| 2008 | 965,717 | 173,002 |
| Year ended March 31, | Shares | Thousands of U.S. dollars |
| 2008 | 965,717 | \$1,732,619 |

Out of the total shares repurchased, 1,506,000 shares were purchased from NTT during the year ended March 31, 2006. No shares were purchased from NTT during the years ended March 31, 2007 and 2008.

Based on the resolution of the board of directors, DOCOMO retired its own shares held as treasury stock. The number and aggregate amount of purchase price of treasury stock retired were as follows:

| Date of the board of directors | Shares | Millions of yen |
|--------------------------------|-----------|---------------------------|
| March 28, 2006 | 1,890,000 | ¥362,659 |
| March 28, 2007 | 930,000 | 175,055 |
| March 28, 2008 | 1,010,000 | 187,387 |
| Date of the board of directors | Shares | Thousands of U.S. dollars |
| March 28, 2008 | 1,010,000 | \$1,876,685 |

As a result of the share retirement, "Retained earnings" were decreased by ¥362,659 million and the number of authorized common stock decreased from 190,020,000 shares to 188,130,000 shares during the year ended March 31, 2006.

As a result of the share retirements, "Additional paid-in capital" was decreased by \$175,055\$ million and \$187,387\$ million (\$1,876,685\$ thousand)

and the number of authorized common stock was not changed during the years ended March 31, 2007 and 2008, respectively.

In May 2008, based on a resolution of the board of directors on March 28, 2008, DOCOMO repurchased total of 311,322 shares of its common stock for ¥49,997 million (\$500,721 thousand) in the stock market.

Accumulated other comprehensive income:

The following table presents changes in accumulated other comprehensive income, net of applicable taxes:

| | | Millions of yen | | | | | |
|--|---|--|--|---------------------------------|--|--|--|
| | Unrealized holding gains (losses) on available-for-sale securities | Net revaluation of financial instruments | Foreign curency translation adjustment | Pension liability adjustment | Mimimum pension liability adjustment | Accumulated other comprehensive income | |
| As of March 31, 2005 | ¥ 21,930 | ¥(213) | ¥ 48,921 | _ | ¥(13,029) | ¥ 57,609 | |
| 2006 change | 7,662 | 121 | (42,597) | _ | 3,986 | (30,828) | |
| As of March 31, 2006 | ¥ 29,592 | ¥ (92) | ¥ 6,324 | _ | ¥ (9,043) | ¥ 26,781 | |

12 Research and development expenses and advertising expenses:

Research and development expenses

 $\label{thm:expenditures} \mbox{Expenditures for research and development are charged to expense as incurred.}$

Research and development expenses are included primarily in "Selling, general and administrative" expenses and amounted to ¥110,509 million, ¥99,315 million and ¥100,035 million (\$1,001,853 thousand) for the years ended March 31, 2006, 2007 and 2008, respectively.

Advertising expenses

Expenditures for advertising are also expensed as incurred. Such expenditures are included in "Selling, general and administrative" expenses and amounted to ¥52,610 million, ¥53,126 million and ¥55,357 million (\$554,402 thousand) for the years ended March 31, 2006, 2007 and 2008, respectively.

13 Other income (expense):

Components of other income (expense) included in "Other, net" in the consolidated statements of income and comprehensive income for the years ended March 31, 2006. 2007 and 2008 were as follows:

| | Millions of yen | | | Thousands of U.S. dollars | |
|--|-----------------|---------|-----------|---------------------------|--|
| | 2006 | 2007 | 2008 | 2008 | |
| Net realized gains on marketable securities | ¥ 366 | ¥ 309 | ¥ 748 | \$ 7,491 | |
| Other than temporary impairment of marketable securities and other investments | (251) | (8,086) | (11,418) | (114,352) | |
| Foreign exchange gains (losses), net | 8,072 | 281 | (1,609) | (16,114) | |
| Rental revenue received | 2,525 | 2,407 | 2,256 | 22,594 | |
| Dividends income | 4,446 | 7,203 | 3,310 | 33,150 | |
| Penalties and compensation for damages | 3,279 | 2,000 | 2,193 | 21,963 | |
| Other, net | 2,938 | (292) | (1,366) | (13,680) | |
| Total | ¥21,375 | ¥ 3,822 | ¥ (5,886) | \$ (58,948) | |

14. Related party transactions:

As previously noted, DOCOMO is majority-owned by NTT, which is a holding company for more than 400 companies comprising the NTT group.

DOCOMO has entered into a number of different types of transactions with NTT, its other subsidiaries and its affiliated companies in the ordinary course of business. DOCOMO's transactions with NTT group companies include purchases of wireline telecommunications services (i.e. for DOCOMO's offices and operations facilities) based on actual usage, leasing of various telecommunications facilities and sales of DOCOMO's various wireless communications services.

Receivables include primarily customer accounts receivables related to DOCOMO's sales of wireless communications services to customers, which NTT collects on behalf of DOCOMO. These sales are recorded as revenue from each third-party customer receiving the services and are not included in the amount of sales to related parties. During the years ended March 31, 2006, 2007 and 2008, DOCOMO purchased capital equipment from NTT Group companies in amount of ¥71,897 million, ¥103,728 million and ¥78,112 million (\$782,293 thousand), respectively.

DOCOMO has entered into contracts of bailment of cash for consumption with NTT FINANCE CORPORATION ("NTT FINANCE") for cash management purposes. NTT and its subsidiaries collectively own all the voting interests in NTT FINANCE, of which DOCOMO owned 4.2% as of March 31, 2008. Accordingly, NTT FINANCE is a related party of DOCOMO. Under the terms of

the contracts, funds are bailed to NTT FINANCE and DOCOMO can withdraw the funds upon its demand. The balance of bailment was ¥100,000 million as of March 31, 2007. The assets related to the contracts were recorded as "Short-term investments" of ¥50,000 million and "Other assets" of ¥50,000 million in the consolidated balance sheets as of March 31, 2007. The contracts had remaining terms to maturity ranging from 3 months to 1 year and 3 months with the average interest rate of 0.2% per annum as of March 31, 2007.

The balance of bailment was \$100,000\$ million (\$1,001,502\$ thousand) as of March 31, 2008. The assets related to the contracts were recorded as "Cash and cash equivalents" of <math>\$50,000\$ million (\$500,751\$ thousand) and "Short-term investments" of <math>\$50,000\$ million (\$500,751\$ thousand) in the consolidated balance sheets as of March 31, 2008. The contracts had remaining terms to maturity ranging from 1 month to 3 months with the average interest rate of 0.4% per annum as of March 31, 2008.

The fair values of the bailment contracts are not determinable as these contracts are with a related party and a secondary market for such contracts does not exist. There were no contracts of bailment expired during the year ended March 31, 2006. The average balance of the contracts of bailment expired during the year ended March 31, 2007 and 2008 was ¥25,178 million and ¥51,243 million (\$513,200 thousand), respectively. The recorded amount of interest income derived from the contracts was ¥95 million, ¥269 million and ¥388 million (\$3,886 thousand) for the years ended March 31, 2006, 2007 and 2008, respectively.

15 Segment reporting:

From a resource allocation perspective, DOCOMO views itself as having three primary business segments. The mobile phone business segment includes FOMA services, mova services, packet communications services, satellite mobile communications services, international services and the equipment sales related to these services. The PHS business segment includes PHS services and the related equipment sales for such service. DOCOMO terminated its PHS services on January 7, 2008. The miscellaneous business segment includes credit services, wireless LAN services, Quickcast (paging) services and other miscellaneous services, which in the aggregate are not significant in amount. DOCOMO terminated its Quickcast services on March 31, 2007. The "Corporate" column in the tables below is not an operating segment but is included to reflect the recorded amounts of common assets which cannot be allocated to any business segment.

DOCOMO identifies its reportable segments based on the nature of services included, as well as the characteristics of the telecommunications networks

used to provide those services. DOCOMO's management monitors and evaluates the performance of its segments based on the information that follows as derived from the Company's management reports. Assets by segment are not included in the management reports, however, they are included herein only for the purpose of disclosure. Depreciation and amortization is shown separately, as well as included as part of operating expenses. Corporate assets primarily include cash, deposits, securities, loans and investments in affiliates. DOCOMO allocates common assets, such as buildings for telecommunications purposes and common facilities, on a systematic and rational basis based on the proportionate amount of network assets of each segment. Capital expenditures in the "Corporate" column include expenditures in "Miscellaneous businesses" and certain expenditures related to the buildings for telecommunications purposes and common facilities, which are not allocated to each segment.

Segment information is prepared in accordance with U.S. GAAP.

DOCOMO does not disclose geographical segments, since the amounts of operating revenues generated and long-lived assets owned outside Japan are immaterial.

There were no sales and operating revenue from transactions with a single external customer amounting to 10% or more of DOCOMO's revenues for the years ended March 31, 2006, 2007 and 2008.

Revenues from external customers for each similar product and service were presented as follows:

| | | Millions of yen | | Thousands of U.S. dollars |
|--|------------|-----------------|------------|---------------------------|
| Year ended March 31 | 2006 | 2007 | 2008 | 2008 |

16 Employees' retirement benefits:

Severance payments and contract-type corporate pension plan—

Employees whose services with DOCOMO are terminated are normally entitled to lump-sum severance or retirement payments and pension benefits based on internal labor regulations, the amount of which is determined by a combination of factors such as the employee's salary eligibility, length of service and other conditions. The pension benefit is covered by the non-contributory defined

benefit pension plans ("Defined benefit pension plans") sponsored by DOCOMO.

The following table presents reconciliations of the changes in the Defined benefit pension plans' projected benefit obligations and fair value of plan assets for the years ended March 31, 2007 and 2008. DOCOMO uses a measurement date of March 31 for its Defined benefit pension plans.

| At March 31: | | | | |
| Funded status | ¥ (97,797) | ¥(102,684) | \$(1,028,383) | |

The following table provides the amounts recognized in DOCOMO's consolidated balance sheets as of March 31, 2007 and 2008:

| | Million | Millions of yen | |
|--|-----------|-----------------|---------------|
| | 2007 | 2008 | 2008 |
| Liability for employees' retirement benefits | ¥(98,621) | ¥(102,912) | \$(1,030,666) |
| Prepaid pension cost | 824 | 228 | 2,283 |
| Net amount recognized | ¥(97,797) | ¥(102,684) | \$(1,028,383) |

Prepaid pension cost is included in "Other assets" in the consolidated balance sheets.

Items recognized in "Accumulated other comprehensive income" as of March 31, 2007 and 2008 were summarized in the following table:

| | | | Thousands of |
|-------------------------------|-----------|-----------------|--------------|
| | Million | Millions of yen | |
| | 2007 | 2008 | 2008 |
| Actuarial gains (losses), net | ¥(28,737) | ¥(33,921) | \$(339,720) |
| Prior service cost | 20,239 | 18,332 | 183,595 |
| Transition obligation | (1,439) | (1,312) | (13,140) |
| Total | ¥ (9,937) | ¥(16,901) | \$(169,265) |

The accumulated benefit obligation for the Defined benefit pension plans was ¥176,586 million and ¥176,476 million (\$1,767,411 thousand) as of March 31, 2007 and 2008, respectively.

The projected benefit obligation, the accumulated benefit obligation and the fair value of plan assets in the pension plans with the projected or accumulated benefit obligation in excess of the plan assets as of March 31, 2007 and 2008 were summarized as follows:

| | | | Thousands of |
|--|-----------------|----------|--------------|
| | Millions of yen | | U.S. dollars |
| | 2007 | 2008 | 2008 |
| Plans with projected benefit obligation in excess of plan assets | | | |
| Projected benefit obligation | ¥178,323 | ¥177,963 | \$1,782,303 |
| Fair value of plan assets | 79,702 | 75,051 | 751,637 |
| Plans with accumulated benefit obligation in excess of plan assets | | | |
| Accumulated benefit obligation | ¥171,549 | ¥172,239 | \$1,724,977 |
| Fair value of plan assets | 79,313 | 75,051 | 751,637 |

The net periodic pension cost for the Defined benefit pension plans for the years ended March 31, 2006, 2007 and 2008 included the following components:

| | Millions of yen | | | Thousands of U.S. dollars | |
|---|-----------------|---------|---------|---------------------------|--|
| | 2006 | 2007 | 2008 | 2008 | |
| Service cost | ¥ 9,879 | ¥10,219 | ¥ 9,521 | \$ 95,353 | |
| Interest cost on projected benefit obligation | 3,493 | 3,654 | 3,889 | 38,948 | |
| Expected return on plan assets | (1,640) | (2,028) | (2,144) | (21,472) | |
| Amortization of prior service cost | (1,861) | (1,907) | (1,907) | (19,099) | |
| Amortization of actuarial gains and losses | 2,018 | 1,600 | 834 | 8,353 | |
| Amortization of transition obligation | 132 | 127 | 127 | 1,272 | |
| Net periodic pension cost | ¥12,021 | ¥11,665 | ¥10,320 | \$103,355 | |

Other changes in plan assets and benefit obligations of the Defined benefit pension plans recognized in "Accumulated other comprehensive income" for the years ended March 31, 2006, 2007 and 2008 included the following components:

| | Millions of yen | | | Thousands of U.S. dollars | |
|--|-----------------|-----------|---------|------------------------------|--|
| | 2006 | 2007 | 2008 | 2008 | |
| Other changes in plan assets and benefit obligations recognized in "Accumulated other comprehensive income": | | | | | |
| Adjustment to minimum pension liability | ¥(4,564) | ¥ (8,778) | _ | _ | |
| Actuarial (gains) losses arising during period, net | _ | 28,737 | ¥ 6,018 | \$ 60,270 | |
| Prior service cost arising during period | _ | (20,239) | _ | _ | |
| Transition obligation arising during period | _ | 1,439 | _ | _ | |
| Amortization of prior service cost | _ | _ | 1,907 | 19,099 | |
| Amortization of actuarial gains and losses | _ | _ | (834) | (8,353) | |
| Amortization of transition obligation | _ | _ | (127) | (1,272) | |
| Elimination of minimum pension liability | _ | (5,206) | _ | _ | |
| Total recognized in "Accumulated other comprehensive income" | ¥(4,564) | ¥ (4,047) | ¥ 6,964 | \$ 69,744 | |
| Total recognized in net periodic pension cost and "Accumulated other comprehensive income" | ¥ 7,457 | ¥ 7,618 | ¥17,284 | \$173,099 | |

The amount of actuarial losses, unrecognized transition obligation and prior service cost, which are expected to be amortized and reclassified from "Accumulated other comprehensive income" to net pension cost during the year ending March 31, 2009 is ¥1,192 million, ¥127 million and ¥(1,907) million, respectively.

The assumptions used in determination of the pension plans' projected benefit obligations as of March 31, 2007 and 2008 were as follows:

| | 2007 | 2008 |
|------------------------------------|------|------|
| Discount rate | 2.2% | 2.3% |
| Long-term rate of salary increases | 2.1 | 2.2 |

The assumptions used in determination of the net periodic pension cost for the years ended March 31, 2006, 2007 and 2008 were as follows:

| | 2006 | 2007 | 2008 |
|--|------|------|------|
| Discount rate | 2.0% | 2.0% | 2.2% |
| Long-term rate of salary increases | 2.1 | 2.1 | 2.1 |
| Expected long-term rate of return on plan assets | 2.5 | 2.5 | 2.5 |

In determining the expected long-term rate of return on plan assets, DOCOMO considers the current and projected asset allocations, as well as expected long-term investment returns and risks for each category of the plan assets based on analysis of historical results.

The weighted-average asset allocations of Defined benefit pension plans as of March 31, 2007 and 2008 by asset category were as follows:

| | 2007 | 2008 |
|----------------|--------|--------|
| Domestic bonds | 32.8% | 42.6% |
| Domestic stock | 23.8 | 23.0 |
| Foreign stock | 14.8 | 13.8 |
| Foreign bonds | 18.3 | 10.7 |
| Other | 10.3 | 9.9 |
| Total | 100.0% | 100.0% |

The Defined benefit pension plans' policy toward plan asset management is formulated with the ultimate objective of ensuring the steady disbursement of pension benefits in future periods. The long-term objective of asset management, therefore, is to secure the total profits deemed necessary to ensure financial soundness of plan assets. To achieve this, DOCOMO selects various investments and takes into consideration their expected returns and risks and the correlation among the investments. DOCOMO then sets a target allocation ratio for the plan assets and endeavors to maintain that ratio. The target ratio is formulated from a mid- to long-term perspective and reviewed annually. In the event that the investment environment changes dramatically, DOCOMO will review the asset allocation as necessary. The target ratio in March 2008 was: domestic bonds, 45.0%; domestic stock, 25.0%; foreign stock, 15.0%; foreign bonds, 10.0%; and other financial instruments 5.0%.

As of March 31, 2007 and 2008, domestic stock owned by the Defined benefit pension plans as its plan asset included common stock of NTT and the

NTT group companies listed in Japan including DOCOMO in amount of \pm 666 million (0.8% of total plan assets) and \pm 479 million (\pm 4,797 thousand, 0.6% of total plan assets), respectively.

Occasionally, employees of the NTT group companies transfer to DOCOMO. Upon such transfer, the NTT group companies transfer the relevant vested pension obligation for each employee along with a corresponding amount of plan assets and cash. Therefore, the difference between the pension obligation and related plan assets transferred from the NTT group companies to DOCOMO, included in the above table which presents reconciliations of the changes in the Defined benefit pension plans' projected benefit obligations and fair value of plan assets, represents cash paid by the NTT group companies to DOCOMO, which has not been invested in plan assets.

DOCOMO expects to contribute ¥2,747 million to the Defined benefit pension plans in the year ending March 31, 2009.

The benefit payments, which reflect expected future service under the Defined benefit pension plans, are expected to be as follows:

| | | Thousands of |
|-----------------------|-----------------|--------------|
| Year ending March 31, | Millions of yen | U.S. dollars |
| 2009 | ¥13,365 | \$133,851 |
| 2010 | 12,164 | 121,823 |
| 2011 | 11,701 | 117,186 |
| 2012 | 11,435 | 114,522 |
| 2013 | 11,176 | 111,928 |
| 2014–2018 | 65,981 | 660,801 |

Social welfare pension scheme and NTT Kigyou-Nenkin-Kikin (NTT Corporate Defined Benefit Pension Plan) —

DOCOMO participates in the national welfare pension plan ("National Plan") and a contributory defined benefit pension plan sponsored by the NTT group (NTT Kigyou-Nenkin-Kikin or NTT Corporate Defined Benefit Pension Plan, "NTT CDBP"). The National Plan is a government-regulated social welfare pension plan under the Japanese Welfare Pension Insurance Law and both NTT Group and its employees provide contributions to such plan every year. The National Plan is considered a multi-employer plan as defined by SFAS No. 87 "Employers' Accounting for Pensions" and contributions to such plan are recognized as expenses. The total amount of contributions by DOCOMO was ¥12,787 million, ¥13,108 million and ¥13,369 million (\$133,891 thousand) for the years ended March 31, 2006, 2007 and 2008, respectively.

Both NTT Group, including DOCOMO and its employees provide contributions to the NTT CDBP to supplement the pension benefits to which the employees are entitled under the National Plan. The NTT CDBP is regulated under the Defined-Benefit Corporate Pension Law. The NTT CDBP is considered a defined benefit pension plan as defined by SFAS No. 87. The participation by DOCOMO and its subsidiaries in the NTT CDBP is accounted for as a single employer plan. The number of DOCOMO's employees covered by the NTT CDBP represented approximately 10.5% of the total members as of both March 31, 2007 and 2008.

In June 2003, under the Defined-Benefit Corporate Pension Law, NTT Kosei-Nenkin-Kikin or NTT Employee's Pension Fund ("NTT Plan"), which was the antecedent of the NTT CDBP, applied to the Japanese government for permission for the NTT Plan to be released from the future obligations to disburse the NTT Plan benefits covering the substitutional portion, and the application was approved in September 2003. The NTT Plan also applied to the government for

permission for the NTT Plan to be released from the substitutional portion of the past obligations in April 2007, and the application was approved in July 2007. As a result, the participants of the NTT Plan were transferred to the NTT CDBP.

In February 2008, the NTT CDBP transferred the remaining substitutional obligation and related plan assets, determined pursuant to the government formula, of the pension fund to the government agency. In accordance with EITF Issue No.03-2, "Accounting for the Transfer to the Japanese Government of the Substitutional Portion of Employee Pension Fund Liabilities", DOCOMO accounted for the entire transfer process as a single settlement event upon completion of the transfer. The net amount of actuarial gains and losses proportionate to the substitutional portion immediately prior to the transfer, which was ¥3,892 million (\$38,978 thousand), and the excess of projected benefit obligation over the accumulated benefit obligation, which was ¥4,395 million (\$44,016 thousand), were netted and recognized as settlement gain of ¥503 million (\$5,038 thousand) from the transaction. The net of the obligation settled and the assets transferred to the government was recognized as a gain on subsidy from the government of ¥24,199 million (\$242,353 thousand). As a result of recording the settlement gain and governmental subsidy as reduction of "Selling, general and administrative", the aggregate amount of ¥24,702 million (\$247,391 thousand) was recognized as decrease in operating expenses in the consolidated statements of income and comprehensive income for the year ended March 31, 2008. A "Decrease in liability for employees' retirement benefits" of ¥19,002 million (\$190,306 thousand) recognized in the consolidated statements of cash flows for the year ended March 31, 2008 was net of a decrease of ¥24,702 million (\$247,391 thousand) in liability for employees' retirement benefits due to gain on transfer of substitutional portion and an increase of ¥5,700 million (\$57,085 thousand) in liability for employees' retirement benefits which was derived from other factors.

The following table presents reconciliations of the changes in the NTT CDBP's projected benefit obligation and fair value of plan assets for the years ended March 31, 2007 and 2008. The amount in the table is based on actuarial

computations which covered only DOCOMO employees' participation in the NTT CDBP. The funded status was recognized as "Liability for employees' retirement benefits" in the consolidated balance sheets as of March 31, 2007 and 2008.

| | Millions of yen | | Thousands of U.S. dollars |

| Fair value of plan assets, end of year | ¥ 94,136 | ¥ 64,309 | \$ 644,056 |
| At March 31: | | | |
| Funded status | ¥ (37,269) | ¥ (13,976) | \$ (139,970) |

Items recognized in "Accumulated other comprehensive income", based on actuarial computations which covered only DOCOMO employees' participation in the NTT CDBP, were summarized in the following table:

| | Millions | Millions of yen | |
|-------------------------------|----------|-----------------|------------|
| | 2007 | 2008 | 2008 |
| Actuarial gains (losses), net | ¥(6,080) | ¥(5,221) | \$(52,288) |
| Prior service cost | 2,497 | 2,140 | 21,432 |
| Total | ¥(3,583) | ¥(3,081) | \$(30,856) |

The accumulated benefit obligation regarding DOCOMO employees for the NTT CDBP based on actuarial computations which covered only DOCOMO employees' participation was ¥109,680 million and ¥61,864 million (\$619,569 thousand) at March 31, 2007 and 2008, respectively.

The projected benefit obligation, the accumulated benefit obligation and the fair value of plan assets in the pension plans with the projected or accumulated benefit obligation in excess of the plan assets as of March 31, 2007 and 2008 were summarized as follows:

| | Millions of yen | | U.S. dollars |
|--|-----------------|---------|--------------|
| | 2007 | 2008 | 2008 |
| Plans with projected benefit obligation in excess of plan assets | | | |
| Projected benefit obligation | ¥131,405 | ¥78,285 | \$784,026 |
| Fair value of plan assets | 94,136 | 64,309 | 644,056 |
| Plans with accumulated benefit obligation in excess of plan assets | | | |
| Accumulated benefit obligation | ¥109,680 | ¥19,518 | \$195,473 |
| Fair value of plan assets | 94,136 | 16,803 | 168,282 |

The net periodic pension cost related to the NTT CDBP based on actuarial computations which covered only DOCOMO employees' participation for the years ended March 31, 2006, 2007 and 2008, included the following components:

| | | | | Thousands of |
|---|-----------------|---------|-----------|--------------|
| | Millions of yen | | | U.S. dollars |
| | 2006 | 2007 | 2008 | 2008 |
| Service cost | ¥ 3,626 | ¥ 3,440 | ¥ 3,244 | \$ 32,489 |
| Interest cost on projected benefit obligation | 2,580 | 2,619 | 2,872 | 28,763 |
| Expected return on plan assets | (1,970) | (2,254) | (2,339) | (23,425) |
| Amortization of prior service cost | (357) | (357) | (357) | (3,575) |
| Amortization of actuarial gains and losses | 1,956 | 362 | 16 | 160 |
| Contribution from employees | (532) | (522) | (452) | (4,527) |
| Net periodic pension cost | ¥ 5,303 | ¥ 3,288 | ¥ 2,984 | \$ 29,885 |
| Gain on transfer of substitutional portion of pension liabilities | <u> </u> | | (24,702) | (247,391) |
| Total | ¥ 5,303 | ¥ 3,288 | ¥(21,718) | \$(217,506) |

Other changes in plan assets and benefit obligations of the NTT CDBP based on actuarial computations which covered only DOCOMO employees' participation recognized in "Accumulated other comprehensive income" for the years ended March 31, 2006, 2007 and 2008 included the following components:

| | Millions of yen | | | Thousands of U.S. dollars |
|---|-----------------|---------|-----------|---------------------------|
| | 2006 | 2007 | 2008 | 2008 |
| Other changes in plan assets and benefit obligations recognized in "Accumulated other comprehensive income": | | | | |
| Adjustment to minimum pension liability | ¥(2,132) | ¥ (600) | _ | |
| Actuarial (gains) losses arising during period, net | _ | 6,080 | ¥ 3,049 | \$ 30,536 |
| Prior service cost arising during period | _ | (2,497) | _ | _ |
| Amortization of prior service cost | _ | _ | 357 | 3,575 |
| Amortization of actuarial gains and losses | _ | _ | (16) | (160) |
| Reclassification of actuarial gains and losses due to transfer of the substitutional portion to the government | _ | _ | (3,892) | (38,978) |
| Elimination of minimum pension liability | _ | (311) | _ | _ |
| Total recognized in "Accumulated other comprehensive income" | ¥(2,132) | ¥ 2,672 | ¥ (502) | \$ (5,027) |
| Total recognized in net periodic pension cost, gain on transfer of substitutional portion of pension liabilities and "Accumulated other comprehensive income" | ¥ 3,171 | ¥ 5,960 | ¥(22,220) | \$(222,533) |

The amount of actuarial losses and prior service cost, which are expected to be amortized and reclassified from "Accumulated other comprehensive income" to net periodic pension cost during the year ending March 31, 2009 is ¥97 million and ¥(357) million, respectively.

The assumptions used in determination of the NTT CDBP's projected benefit obligations, based on actuarial computations which covered only DOCOMO employees' participation in the NTT CDBP, as of March 31, 2007 and 2008 were as follows:

| | 2007 | 2008 |
|------------------------------------|------|------|
| Discount rate | 2.2% | 2.3% |
| Long-term rate of salary increases | 2.6 | 2.6 |

The assumptions used in determination of the net periodic pension cost, based on actuarial computations which covered only DOCOMO employees' participation in the NTT CDBP, for the years ended March 31, 2006, 2007 and 2008 were as follows:

| | 2006 | 2007 | 2008 |
|--|------|------|------|
| Discount rate | 2.0% | 2.0% | 2.2% |
| Long-term rate of salary increases | 2.6 | 2.6 | 2.6 |
| Expected long-term rate of return on plan assets | 2.5 | 2.5 | 2.5 |

In determining the expected long-term rate of return on plan assets, the NTT CDBP considers the current and projected asset allocations, as well as expected long-term investment returns and risks for each category of the plan assets based on analysis of historical results.

The weighted-average asset allocations of the NTT CDBP as of March 31, 2007 and 2008 by asset category were as follows:

| | 2007 | 2008 |
|----------------|--------|--------|
| Domestic bonds | 49.6% | 58.2% |
| Domestic stock | 17.9 | 17.4 |
| Foreign stock | 11.4 | 10.4 |
| Foreign bonds | 14.2 | 8.1 |
| Other | 6.9 | 5.9 |
| Total | 100.0% | 100.0% |

The NTT CDBP's policy toward plan asset management is formulated with the ultimate objective of ensuring the steady disbursement of pension benefits in future periods. The long-term objective of asset management, therefore, is to secure the total profits deemed necessary to ensure financial soundness of plan assets. To achieve this, the NTT CDBP selects various investments and takes into consideration their expected returns and risks and the correlation among the investments. The NTT CDBP then sets a target allocation ratio for the plan assets and endeavors to maintain that ratio. The target ratio is formulated from a mid- to long-term perspective and reviewed annually. In the event that the investment environment changes dramatically, the NTT CDBP

will review the asset allocation as necessary. The target ratio in March 2008 was: domestic bonds, 60.8%; domestic stock, 18.2%; foreign stock, 10.5%; foreign bonds, 7.7%; and other financial instruments 2.8%. As of March 31, 2007 and 2008, domestic stock owned by the NTT CDBP as its plan asset included common stock of NTT and the NTT group companies including DOCOMO in the amount of \$9,548 million (0.7% of total plan assets) and \$4,744 million (\$47,511 thousand, 0.5% of total plan assets), respectively.

DOCOMO expects to contribute \$799 million to the NTT CDBP in the year ending March 31, 2009.

The benefit payments, which reflect expected future service under the NTT CDBP, based on actuarial computations which covered only DOCOMO employees are expected to be as follows:

| | | Thousands of |
|-----------------------|-----------------|--------------|
| Year ending March 31, | Millions of yen | U.S. dollars |
| 2009 | ¥ 981 | \$ 9,825 |
| 2010 | 1,323 | 13,250 |
| 2011 | 1,497 | 14,992 |
| 2012 | 1,672 | 16,745 |
| 2013 | 1,852 | 18,548 |
| 2014–2018 | 11,729 | 117,466 |

17 Income taxes

Total income taxes for the years ended March 31, 2006, 2007 and 2008 were computed as follows:

| | Millions of yen | | | Thousands of U.S. dollars |
|--|-----------------|----------|----------|---------------------------|
| | 2006 | 2007 | 2008 | 2008 |
| Income from continuing operations before equity in net income (losses) of affiliates and minority interest | ¥341,382 | ¥313,679 | ¥322,955 | \$3,234,401 |
| Equity in net income (losses) of affiliates | 1,653 | (850) | 9,257 | 92,709 |
| Other comprehensive income (loss): | | | | |
| Unrealized holding gains (losses) on available-for-sale securities | 6,927 | (10,586) | (11,668) | (116,855) |
| Less: Reclassification of realized gains and losses included in net income | (1,618) | (276) | 299 | 2,994 |
| Net revaluation of financial instruments | 256 | 576 | (363) | (3,635) |
| Less: Reclassification of realized gains and losses included in net income | (172) | (552) | 455 | 4,557 |
| Foreign currency translation adjustment | (234) | 76 | 6,634 | 66,440 |
| Less: Reclassification of realized gains and losses included in net income | (15,779) | _ | (88) | (881) |
| Adjustment to initially apply SFAS No. 158 | _ | (3,395) | _ | _ |
| Pension liability adjustment: | | | | |
| Actuarial gains (losses) arising during period, net | _ | _ | (3,513) | (35,183) |
| Less: Amortization of prior service cost | _ | _ | (926) | (9,274) |
| Less: Amortization of actuarial gains and losses | _ | _ | 348 | 3,486 |
| Less: Amortization of transition obligation | _ | _ | 52 | 521 |
| Less: Reclassification of actuarial gains and losses due to transfer of the substitutional portion to the government | <u> </u> | _ | 1,660 | 16,624 |
| Minimum pension liability adjustment | 2,758 | 3,849 | _ | _ |
| Total income taxes | ¥335,173 | ¥302,521 | ¥325,102 | \$3,255,904 |

Substantially all income or loss before income taxes and income tax expenses or benefits are domestic.

For the years ended March 31, 2006, 2007 and 2008, the Company and its domestic subsidiaries were subject to a National Corporate Tax of 30%, a Corporate Inhabitant Tax of approximately 6% and a deductible Corporate Enterprise Tax of approximately 8%. The rate of the Corporate Inhabitant Tax and Corporate Enterprise Tax differs subject to municipalities.

The aggregate statutory income tax rate was 40.9% all through the years ended March 31, 2006, 2007 and 2008. The effective income tax rate for the years ended March 31, 2006, 2007 and 2008 was 35.9%, 40.6% and 40.3%, respectively.

Reconciliation of the difference of the effective income tax rates of DOCOMO and the statutory tax rates are as follows:

| | 2006 | 2007 | 2008 |
|--|-------|-------|-------|
| Statutory income tax rate | 40.9% | 40.9% | 40.9% |
| Expenses not deductible for tax purposes | 0.2 | 0.2 | 0.3 |
| Tax credit for special tax treatment such as R&D investment tax incentive, IT investment promotion tax incentive and IT infrastructure tax incentive | (2.6) | (0.9) | (0.8) |
| Changes in valuation allowance | (0.9) | _ | _ |
| Other | (1.7) | 0.4 | (0.1) |
| Effective income tax rate | 35.9% | 40.6% | 40.3% |

Deferred income taxes result from temporary differences between the financial statement carrying amounts and the tax bases of existing assets and liabilities. Significant components of deferred tax assets and liabilities as of March 31, 2007 and 2008 were as follows:

| | Millior | Millions of yen | |
|---|----------|-----------------|-------------|
| | 2007 | 2008 | 2008 |
| Deferred tax assets: | | | |
| Property, plant and equipment and intangible assets principally due to differences in depreciation and amortization | ¥ 45,139 | ¥ 48,618 | \$ 486,911 |
| Liability for employees' retirement benefits | 54,329 | 46,965 | 470,356 |
| Reserve for point loyalty programs | 42,397 | 46,004 | 460,731 |
| Deferred revenues regarding "Nikagetsu Kurikoshi" (2 month carry-over) | 28,779 | 32,441 | 324,897 |
| Accrued enterprise tax | 6,244 | 16,594 | 166,189 |
| Compensated absences | 9,276 | 12,455 | 124,737 |
| Accrued commissions to agent resellers | 23,293 | 9,343 | 93,570 |
| Marketable securities and other investments | 3,604 | 7,873 | 78,848 |
| Accrued bonus | 7,006 | 6,897 | 69,074 |
| Inventories | 14,861 | 5,428 | 54,362 |
| Unrealized holding losses on available–for-sale securities | _ | 1,746 | 17,486 |
| Other | 10,571 | 12,435 | 124,537 |
| Total deferred tax assets | ¥245,499 | ¥246,799 | \$2,471,698 |
| Deferred tax liabilities: | | | |
| Foreign currency translation adjustment | 128 | 6,674 | 66,840 |
| Property, plant and equipment due to differences in capitalized interest | 1,738 | 2,343 | 23,465 |
| Investment in affiliates | 438 | 2,292 | 22,955 |
| Intangible assets (principally customer related assets) | 5,499 | 2,026 | 20,291 |
| Unrealized holding gains on available-for-sale securities | 9,623 | _ | _ |
| Other | 7,436 | 3,551 | 35,563 |
| Total deferred tax liabilities | ¥ 24,862 | ¥ 16,886 | \$ 169,114 |
| Net deferred tax assets | ¥220,637 | ¥229,913 | \$2,302,584 |
| | | | |

The components of net deferred tax assets included in the consolidated balance sheets as of March 31, 2007 and 2008 were as follows:

| | | | Thousands of |
|--|-----------------|----------|--------------|
| | Millions of yen | | U.S. dollars |
| | 2007 | 2008 | 2008 |
| Deferred tax assets (current assets) | ¥ 94,868 | ¥108,037 | \$1,081,993 |
| Deferred tax assets (non-current investments and other assets) | 127,696 | 123,403 | 1,235,884 |
| Other current liabilities | (7) | _ | _ |
| Other long-term liabilities | (1,920) | (1,527) | (15,293) |
| Total | ¥220,637 | ¥229,913 | \$2,302,584 |

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences and tax carry-forwards become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. Management believes that the amount of the deferred tax assets is realizable, however, could be reduced in the near term if estimates of future taxable income during the carry-forward period are reduced.

Effective April 1, 2007, DOCOMO applied the provisions of FIN 48, which, among other things, requires applying a "more-likely-than-not" threshold to the recognition and derecognizing of tax positions. As of the date of the application of FIN 48 DOCOMO had no material unrecognized tax benefit which would favorably affect the effective income tax rate in future periods and does not believe that there will be any significant increases or decreases within the next 12 months. DOCOMO has elected to classify interest and penalties related to unrecognized tax benefits, if and when required, as part of income tax expense in the consolidated statements of income and comprehensive income. No interest or penalties have been accrued at the date of application.

Thousands of

DOCOMO mainly files income tax returns in Japan. According to the Japanese tax law, the statute of limitation is 5 years (i.e. the years ended March 31, 2003 to 2007) in the case of underreporting of the taxable income. In addition, the statute of limitations is 7 years (i.e. the years ended March 31, 2001 to 2007) in the case of amendment of net operating losses and tax evasion. The Company and

its major domestic subsidiaries are no longer subject to regular income tax examination by the tax authority before the year ended March 31, 2007. In the case of transfer pricing, the statute of limitations is 6 years (i.e. the years ended March 31, 2002 to 2007).

Other taxes—

The consumption tax rate for all taxable goods and services, with minor exceptions, is 5 percent. Consumption tax payable or receivable is determined based on consumption taxes levied on operating revenues offset by consumption taxes directly incurred by the Company when purchasing goods and services.

18 Commitments and contingencies:

Leases—

DOCOMO leases certain facilities and equipment in the normal course of business under capital leases or operating leases.

Assets covered under capital leases at March 31, 2007 and 2008 were as follows:

| | | Thousands of |
|---------|---|--|
| Million | U.S. dollars | |
| 2007 | 2008 | 2008 |
| ¥12,016 | ¥11,699 | \$117,166 |
| 875 | 409 | 4,096 |
| 12,891 | 12,108 | 121,262 |
| (7,143) | (7,833) | (78,448) |
| ¥ 5,748 | ¥ 4,275 | \$ 42,814 |
| | 2007 ¥12,016 875 12,891 (7,143) | ¥12,016 ¥11,699 875 409 12,891 12,108 (7,143) (7,833) |

Tools, furniture and fixtures are classified as part of property, plant and equipment, while software is classified as part of intangible assets.

Future minimum lease payments by year under capital leases together with the present value of the net minimum lease payments as of March 31, 2008 were as follows:

| | | Thousands of |
|---|-----------------|--------------|
| Year ending March 31, | Millions of yen | U.S. dollars |
| 2009 | ¥ 3,036 | \$ 30,405 |
| 2010 | 2,332 | 23,355 |
| 2011 | 1,591 | 15,934 |
| 2012 | 882 | 8,833 |
| 2013 | 382 | 3,826 |
| Thereafter | 61 | 611 |
| Total minimum lease payments | 8,284 | 82,964 |
| Less—Amount representing interest | (506) | (5,067) |
| Present value of net minimum lease payments | 7,778 | 77,897 |
| Less—Amounts representing estimated executory costs | (1,031) | (10,326) |
| Net minimum lease payments | 6,747 | 67,571 |
| Less—Current obligation | (2,422) | (24,256) |
| Long-term capital lease obligations | ¥ 4,325 | \$ 43,315 |

The above obligations are classified as part of other current and long-term liabilities as appropriate.

The minimum rental payments required under operating leases that have initial or remaining non-cancellable lease terms in excess of one year as of March 31, 2008 were as follows:

| | | Thousands of |
|------------------------------|-----------------|--------------|
| Year ending March 31, | Millions of yen | U.S. dollars |
| 2009 | ¥ 2,152 | \$ 21,553 |
| 2010 | 1,870 | 18,728 |
| 2011 | 1,521 | 15,233 |
| 2012 | 1,424 | 14,261 |
| 2013 | 1,424 | 14,261 |
| Thereafter | 14,238 | 142,594 |
| Total minimum future rentals | ¥22,629 | \$226,630 |

The following schedule shows total rental expense for all operating leases for the years indicated except those with terms of 1 month or less that were not renewed:

| | | Millions of yen | | U.S. dollars |
|-----------------|---------|-----------------|---------|--------------|
| | 2006 | 2007 | 2008 | 2008 |
| Minimum rentals | ¥64,323 | ¥67,897 | ¥70,673 | \$707,792 |

Litigation—

As of March 31, 2008, DOCOMO had no litigation or claims outstanding, pending or threatened against which in the opinion of management would have a materially adverse effect on its results of operations or financial position.

Purchase commitments—

DOCOMO has entered into various contracts for the purchase of property, plant and equipment, inventories (primarily handsets) and services and the acquisition of equity securities. Commitments outstanding as of March 31, 2008 amounted to ¥51,746 million (\$518,237 thousand) (of which ¥3,632 million (\$36,375 thousand) are with related parties) for property, plant and equipment, ¥22,029 million (\$220,621 thousand) (of which none are with related parties) for inventories and ¥44,920 million (\$449,875 thousand) (of which ¥849 million (\$8,503 thousand) are with related parties) for the other purchase commitments.

Guarantees—

DOCOMO applied FIN No. 45 "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness

of Others" ("FIN 45"). FIN 45 requires that if a company issues or modifies a guarantee, the company must recognize an initial liability for the fair value of the obligations it has undertaken and must disclose that information in its financial statements.

DOCOMO enters into agreements in the normal course of business that provide guarantees for counterparties. These counterparties include subscribers, related parties, foreign wireless telecommunications service providers and other business partners. While the most of guarantees provided for subscribers relate to product defects of cellular phone handsets sold by DOCOMO, DOCOMO is provided with similar guarantees by the handset vendors. Though the guarantees or indemnifications provided in other transactions than with the subscribers are different in each contract, the likelihood of almost all of the performance of these guarantees or indemnifications are remote and amount of payments DOCOMO could be claimed for is not specified in almost all of the contracts. Historically, DOCOMO has not made any significant guarantee or indemnification payments under such agreements. DOCOMO estimates the estimated fair value of the obligations related to these agreements is not significant. Accordingly, no liabilities were recognized for these obligations as of March 31, 2008.

19 Financial instruments:

(1) Risk management

The fair values for DOCOMO's assets and liabilities and DOCOMO's cash flows may be negatively impacted by fluctuations in interest rates and foreign exchange rates. To manage these risks, DOCOMO uses derivative financial instruments such as interest rate swaps, currency swaps and foreign exchange forward contracts and also uses non-derivative financial instruments. The financial instruments are executed with creditworthy financial institutions and DOCOMO management believes that there is little risk of default by these counterparties. DOCOMO sets and follows internal regulations that establish conditions to enter into derivative contracts and procedures of approving and monitoring such contracts.

(2) Fair value of financial instruments

Short-term financial instruments -

All cash and short-term investments, current receivables, current payables and certain other short-term financial instruments are short-term in nature. Therefore their carrying amounts approximate fair values except the items separately referred below.

Long-term debt including current portion -

The fair value of long-term debt including current portion is estimated based on the discounted amounts of future cash flows using DOCOMO's current incremental borrowings rates for similar liabilities.

The carrying amount and the estimated fair value of long-term debt including current portion as of March 31, 2007 and 2008 were as follows:

| | Million | Thousands o | f U.S. dollars | | |
|----------|----------|-------------|----------------|-------------|-------------|
| 2 | 2007 | | 2008 | | 08 |
| Carrying | Fair | Carrying | Fair | Carrying | Fair |
| amount | value | amount | value | amount | value |
| ¥602,863 | ¥606,910 | ¥476,752 | ¥481,832 | \$4,774,682 | \$4,825,558 |

Interest rate swap agreements -

DOCOMO uses interest rate swap transactions, under which DOCOMO receives fixed rate interest payments and pays floating rate interest payments, to hedge the changes in fair value of certain debt as a part of its asset-liability management (ALM). DOCOMO designated this derivative as a fair value hedge utilizing the short-cut method in SFAS No. 133, which permits an

assumption of no ineffectiveness if these and other criteria are met. The offset to the change in fair value of the interest rate swap was reflected in the balance of the hedged instrument within "Long-term debt" in the consolidated balance sheets and interest expense was adjusted to include the effects of payments made and received under the swap.

The table below shows the contract amount and fair value of the interest rate swap agreement as of March 31, 2007 and 2008:

| | | | IVIIIIONS C | or yen | |
|--|-----------------|-------------------|-----------------|------------|--|
| Contract Term (in the year ended/ending March 31,) | Weighted averag | je rate per annum | 2007 | | |
| | Receive fixed | Pay floating | Contract amount | Fair value | |
| 2004–2012 | 1.5% | 0.9% | ¥235,800 | ¥858 | |

| | | | Millions of yen | | Thousands of U.S. dollars | |
|--|---------------------------------|--------------|-----------------|------------|---------------------------|------------|
| Contract Term (in the year ended/ending March 31,) | Weighted average rate per annum | | 2008 | | 2008 | |
| | Receive fixed | Pay floating | Contract amount | Fair value | Contract amount | Fair value |
| 2004–2012 | 1.5% | 1.2% | ¥235,800 | ¥3,511 | \$2,361,542 | \$35,163 |

The interest rate swap agreements have remaining terms to maturity ranging from 3 years to 3 years and 9 months.

The fair values of interest rate swaps were obtained from counterparty financial institutions and represent the amount that DOCOMO could have settled with the counterparties to terminate the swaps outstanding as of March 31, 2007 and 2008.

Foreign currency swap agreement—

In February 2005, DOCOMO entered into a currency swap contract to hedge currency exchange risk associated with the principal and interest payments of the \$100 million unsecured corporate bonds. As this currency swap contract qualified as a cash flow hedge instrument for accounting purposes and all the essential terms of the currency swap and the hedged item are identical, there was no ineffective portion to the hedge. The gain or loss from the fluctuation in the fair value of the swap transaction was recorded as "Accumulated other comprehensive income". The amount recorded as "Accumulated other comprehensive income" was reclassified as gain or loss when the offsetting gain or loss derived from the hedged item was recorded in the accompanying consolidated statements of income and comprehensive income.

For the year ended March 31, 2006, ¥1,262 million of loss from currency translation and ¥28 million of interest expense in the consolidated statements of income and comprehensive income were reclassified, and ¥92 million of loss, net of applicable taxes, was recorded as "Net revaluation of financial

instruments" included in "Accumulated other comprehensive income" in the consolidated balance sheets as of March 31, 2006.

For the year ended March 31, 2007, ¥1,320 million of loss from currency translation and ¥30 million of interest expense in the consolidated statements of income and comprehensive income were reclassified, and ¥58 million of loss, net of applicable taxes, was recorded as "Net revaluation of financial instruments" included in "Accumulated other comprehensive income" in the consolidated balance sheets as of March 31, 2007.

In March 2008, DOCOMO redeemed the \$100 million unsecured corporate bonds hedged by the contract. As a result of the redemption, ¥1,114 million (\$11,157 thousand) related to the hedged transaction recorded as "Net revaluation of financial instruments" included in "Accumulated other comprehensive income" in the consolidated balance sheets was reclassified to ¥1,462 million (\$14,642 thousand) of currency transaction loss and ¥348 million (\$3,485 thousand) of deduction of interest expense in the consolidated statements of income and comprehensive income for the year ended March 31, 2008.

The table below shows the contract amount and fair value of the derivative financial instrument as of March 31, 2007 and 2008:

| | Millions of yen | | | | U.S. dollars | |
|------------------|-----------------|--------------------|---------------|----------|---------------|---|
| 2007 2008 | | 08 | 200 | 08 | | |
| Contract | Fair value | Contract amount | Fair value | Contract | Fair value | |
| ¥10.485 | ¥1.251 | _ | _ | _ | _ | i |

Foreign exchange forward contracts—

DOCOMO has foreign exchange forward contracts to hedge currency exchange risk associated with foreign currency assets and liabilities. The table below shows the contract amount and fair value of foreign exchange forward contracts as of March 31, 2007 and 2008:

| | Millions of yen | | | Thousands of | t U.S. dollars |
|----------|------------------|----------|-------|--------------|----------------|
| 20 | 2007 2008 | | 20 | 08 | |
| Contract | Fair | Contract | Fair | Contract | Fair |
| amount | value | amount | value | amount | value |
| ¥938 | ¥4 | ¥4,731 | ¥(16) | \$47,381 | \$(160) |

The fair values of foreign exchange forward contracts were obtained from counterparty financial institutions and represent the amounts that DOCOMO could have settled with the counterparties to terminate the swaps outstanding as of March 31, 2007 and 2008.

Other—

Information regarding "Investments in affiliates", "Marketable securities and other investments" and contracts of bailment of cash for consumption with related party is disclosed in Notes 6, 7 and 14, respectively.

(3) Concentrations of risk—

As of March 31, 2008, DOCOMO did not have any significant concentration of business transacted with an individual counterparty or groups of counterparties that could, if suddenly eliminated, severely impact its results of operations.

20. Subsequent event:

There were no significant subsequent events other than those described in other footnotes to this consolidated financial statements.

Management's Report on Internal Control over Financial Reporting

The management of NTT DoCoMo, Inc. (the "Company") is responsible for establishing and maintaining internal control over financial reporting as defined in Rule 13a-15(f) of the Securities Exchange Act of 1934. Internal control over financial reporting of the Company is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting standards generally accepted in the United States.

Because of its inherent limitations, however, internal control over financial reporting may not prevent or detect misstatements. In addition, projections of any evaluation of effectiveness of internal control to future periods are subject to the risk that controls may become inadequate because of changes in conditions and that the degree of compliance with the policies and procedures may deteriorate.

The management of the Company evaluated the effectiveness of the company's internal control over financial reporting using the criteria set forth in Internal Control -- Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this evaluation, the management concluded that the Company's internal control over financial reporting was effective as of March 31, 2008.

KPMG AZSA & Co., the independent registered public accounting firm that has audited the Company's consolidated financial statements for the year ended March 31, 2008 has issued an attestation report on the Company's internal control over financial reporting as of March 31, 2008.

Date: June 20, 2008

Ryuji Yamada

President and Chief Executive Officer

Kazuto Tsubouchi
Executive Vice President and

Chief Financial Officer

Report of Independent Registered Public Accounting Firm

The Board of Directors and the Shareholders NTT DoCoMo, Inc.:

We have audited the internal control over financial reporting of NTT DoCoMo, Inc. and subsidiaries (the "Company") as of March 31, 2008, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of March 31, 2008, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of NTT DoCoMo, Inc. and subsidiaries as of March 31, 2007 and 2008, and the related consolidated statements of income and comprehensive income, shareholders' equity, and cash flows for each of the years in the three-year period ended March 31, 2008, and our report dated June 20, 2008 expressed an unqualified opinion on those consolidated financial statements.

Report of Independent Registered Public Accounting Firm

The Board of Directors and the Shareholders NTT DoCoMo, Inc.:

We have audited the accompanying consolidated balance sheets of NTT DoCoMo, Inc. and subsidiaries (the "Company") as of March 31, 2007 and 2008, and the related consolidated statements of income and comprehensive income, shareholders' equity, and cash flows for each of the years in the three-year period ended March 31, 2008. In connection with our audits of the consolidated financial statements, we also have audited financial statement schedule. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of NTT DoCoMo, Inc. and subsidiaries as of March 31, 2007 and 2008, and the results of their operations and their cash flows for each of the years in the three-year period ended March 31, 2008, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

The accompanying consolidated financial statements as of and for the year ended March 31, 2008 have been translated into United States dollars solely for the convenience of the reader. We have audited the translation and, in our opinion, the consolidated financial statements expressed in Japanese yen have been translated into dollars on the basis set forth in Note 3 of the notes to the consolidated financial statements.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of March 31, 2008, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated June 20, 2008 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.
