* Application to be available for download from summer 2011.

**Requires subscription to sp mode.

To avoid possibly excessive communication charges, a low-cost packet service such as Pake-hodai FLAT is strongly recommended for people who tether their phone to a PC or other external device. When finished with the external device, users should turn off the phone's tethering function, otherwise they will continue to be billed at tether-based communication rates.

All-inclusive FOMA low-cost data plan users can access this service.

When tethering is engaged, sp mode functions, except Internet/email, cannot be used.

Online applications such as browsing and games may not function normally on an external device depending on the user's location and environment.

In the default setting, the link between the external device and the smartphone/tablet is not protected by a password or other security measures. Password protection is highly recommended.
