	Tethering *****	✓	✓

*Voice talk and digital communication (TV phone and 64K data communication) are not available.
**Requires SD card reader SC01. SD card adaptor (sample) required when using micro SD (HC).
***Requires a docomo miniUIM card. The DOCOMO UIM Card (FOMA Card) is not compatible. The docomo mini UIM card requires use with a compatible model. Some websites, data, etc. may become inaccessible after switching from a DOCOMO UIM card to docomo miniUIM card.
****The transmission speed is the theoretical maximum. Services will be provided on a best-effort basis and speeds may vary depending on network traffic or transmission environments. Even within FOMA HIGH-SPEED service areas, communications speeds may be limited to 384 Kbps depending on the location. With FOMA service outside HIGH-SPEED areas, both the maximum uplink and downlink is 384 Kbps. Please visit DOCOMO's website for information about service areas offering max. 7.2/14 Mbps downlink and 5.7 Mbps uplink.
*****Requires subscription to sp mode. When the tethering function is engaged, sp mode functions other than Internet connection and email service cannot be used. Online applications such as browsing and games may not function normally on an external device depending on the user's location and environment. In the default setting, the link between the external device and the smartphone/tablet is not protected by a password or other security measures. We highly recommend the use of password-protected security measures.

The specifications may differ slightly from the charts shown.

Continuous stand-by is approximate and may vary depending on network and phone usage.

sp-mode, sp-mode mail, Koe-no-Takuhaibin, i-channel, Osai-fu-Keitai, WORLD WING, Area Mail and FOMA are trademarks or registered trademarks of NTT DOCOMO, INC. in Japan and/or other countries.
