	Software update	✓
	Tethering**	✓ (up to 5)

*The transmission speed is the theoretical maximum. Services will be provided on a best-effort basis and speeds may vary depending on network traffic or transmission environments. Even within FOMA HIGH-SPEED service areas, communications speeds may be limited to 384 Kbps depending on the location. With FOMA service outside HIGH-SPEED areas, both the maximum uplink and downlink is 384 Kbps. Please visit DOCOMO's website for information about service areas offering max. 7.2/14 Mbps downlink and 5.7 Mbps uplink.

**Requires subscription to sp mode. When the tethering function is engaged, sp mode functions other than Internet connection and email service cannot be used. Online applications such as browsing and games may not function normally on an external device depending on the user's location and environment. In the default setting, the link between the external device and the smartphone/tablet is not protected by a password or other security measures. We highly recommend the use of password-protected security measures.

The specifications may differ slightly from the charts shown.

Continuous stand-by, talk and TV phone times are approximate and may vary depending on network and phone usage.

sp-mode, sp-mode mail, i-mode, Koe-no-Takuhaibin, i-channel, Osaiju-Keitai, Melody Call, WORLD WING, Area Mail, FOMA and i-appli are trademarks or registered trademarks of NTT DOCOMO, INC. in Japan and/or other countries.
